Challenges in dentistry

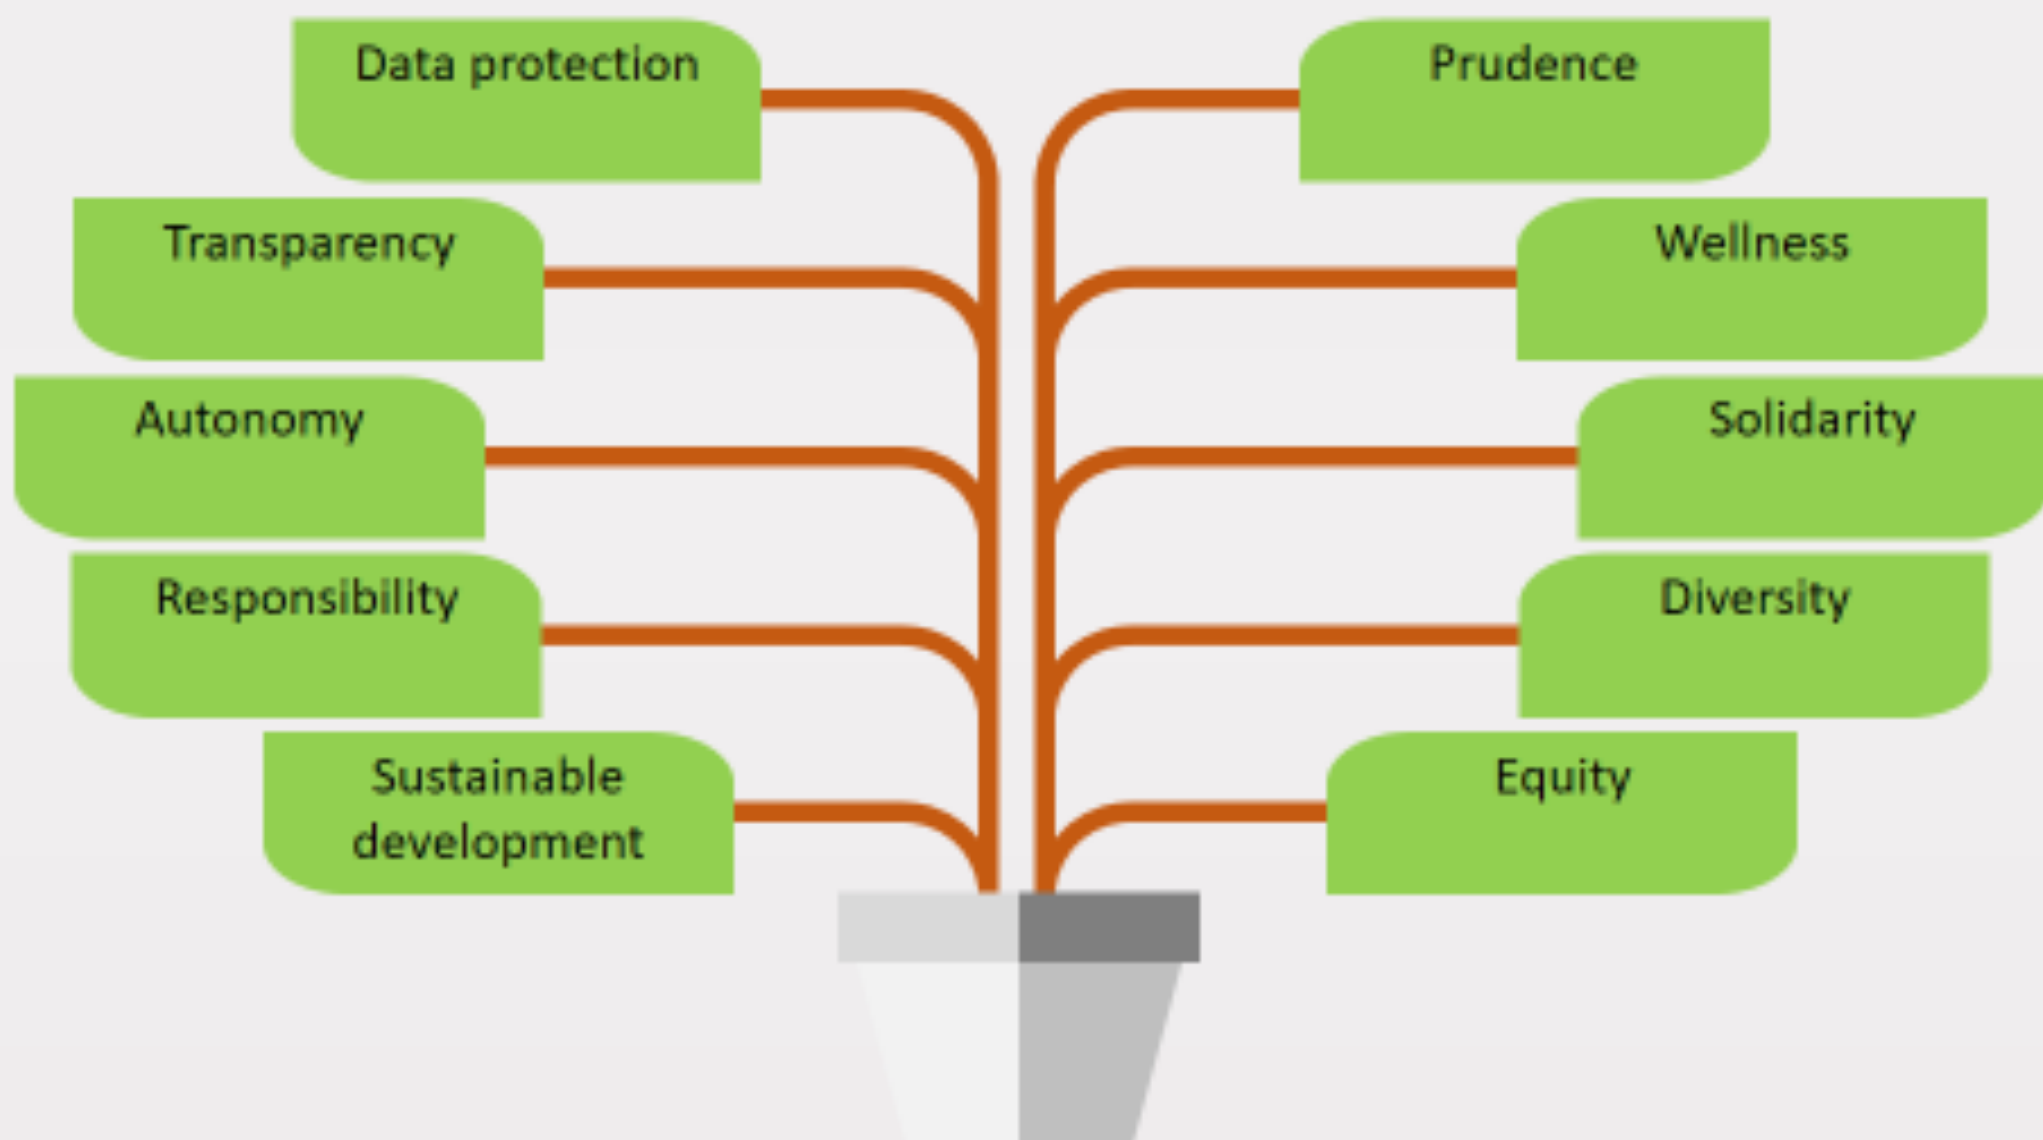

itu.int/go/fgai4h

World Health
Organization

Ethical issues

Data Protection

Reliability and safety

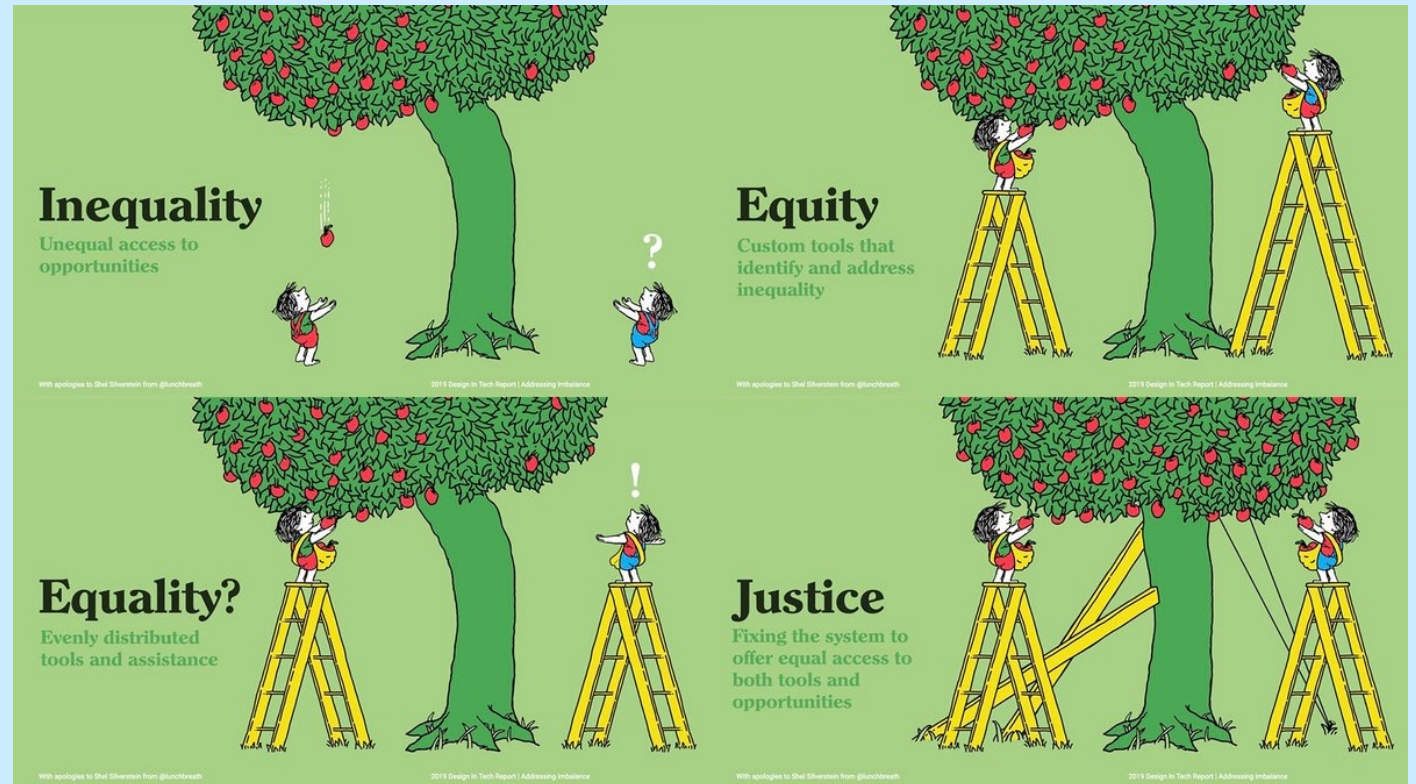

Diversity

Equity

Availability
Fairness

Decision making and responsibility

Who is responsible for the treatment, diagnosis and dental procedure?

Patient and clinician relationship?!

Transparency

Explainable AI for both patient and clinician

*Data set, methods, model

Sustainable development and Prudence

Bias

Outcomes in clinic

Improve satisfaction and outcomes

Solidarity and Wellness

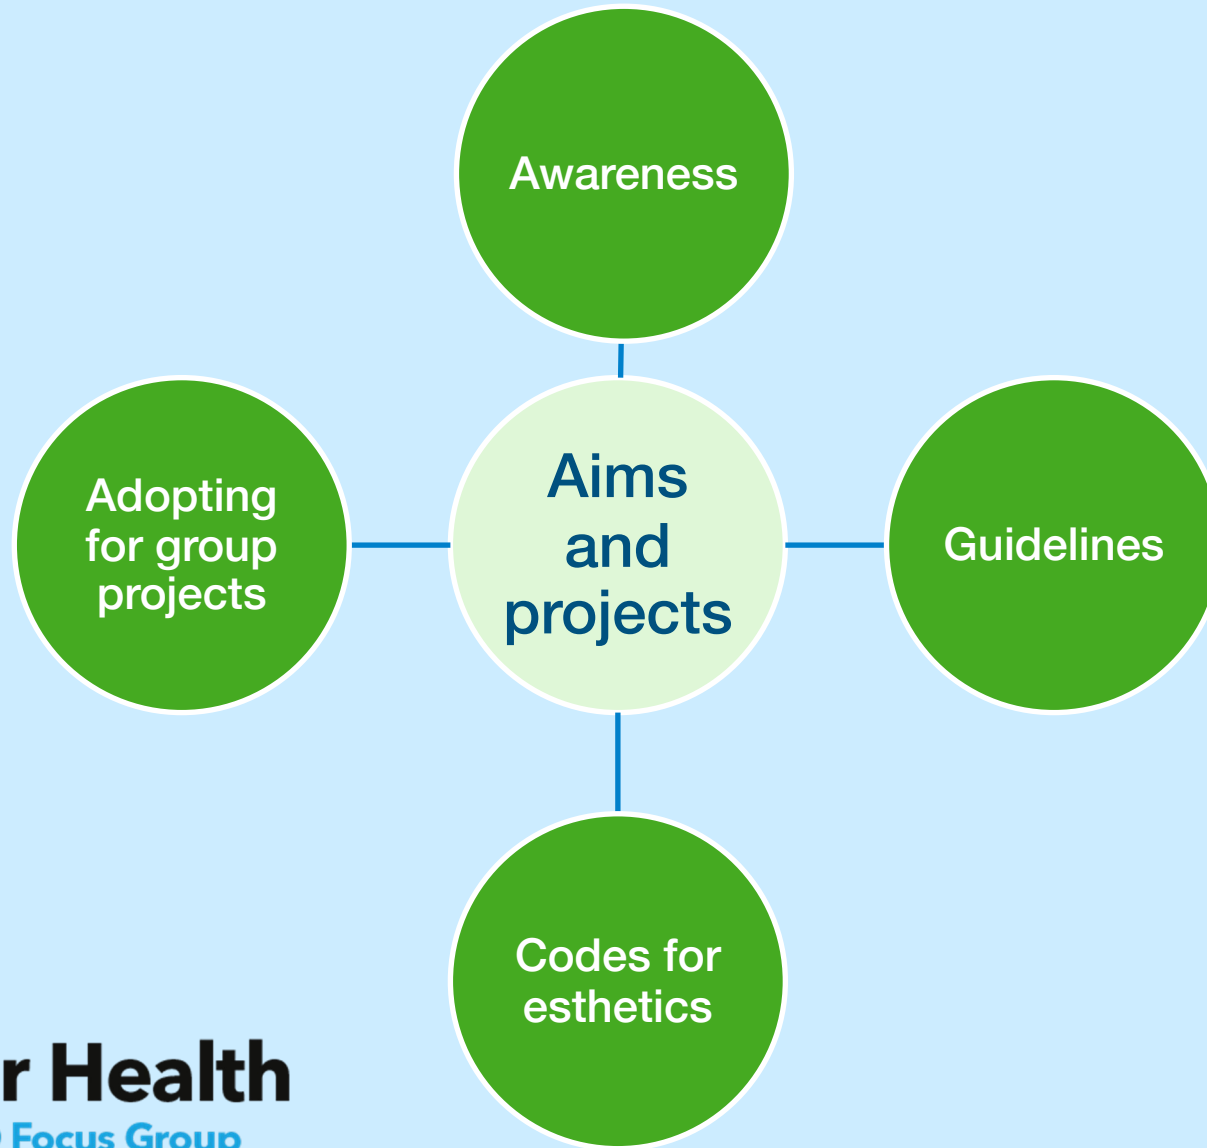

Generation and people solidarity
Grow well-being

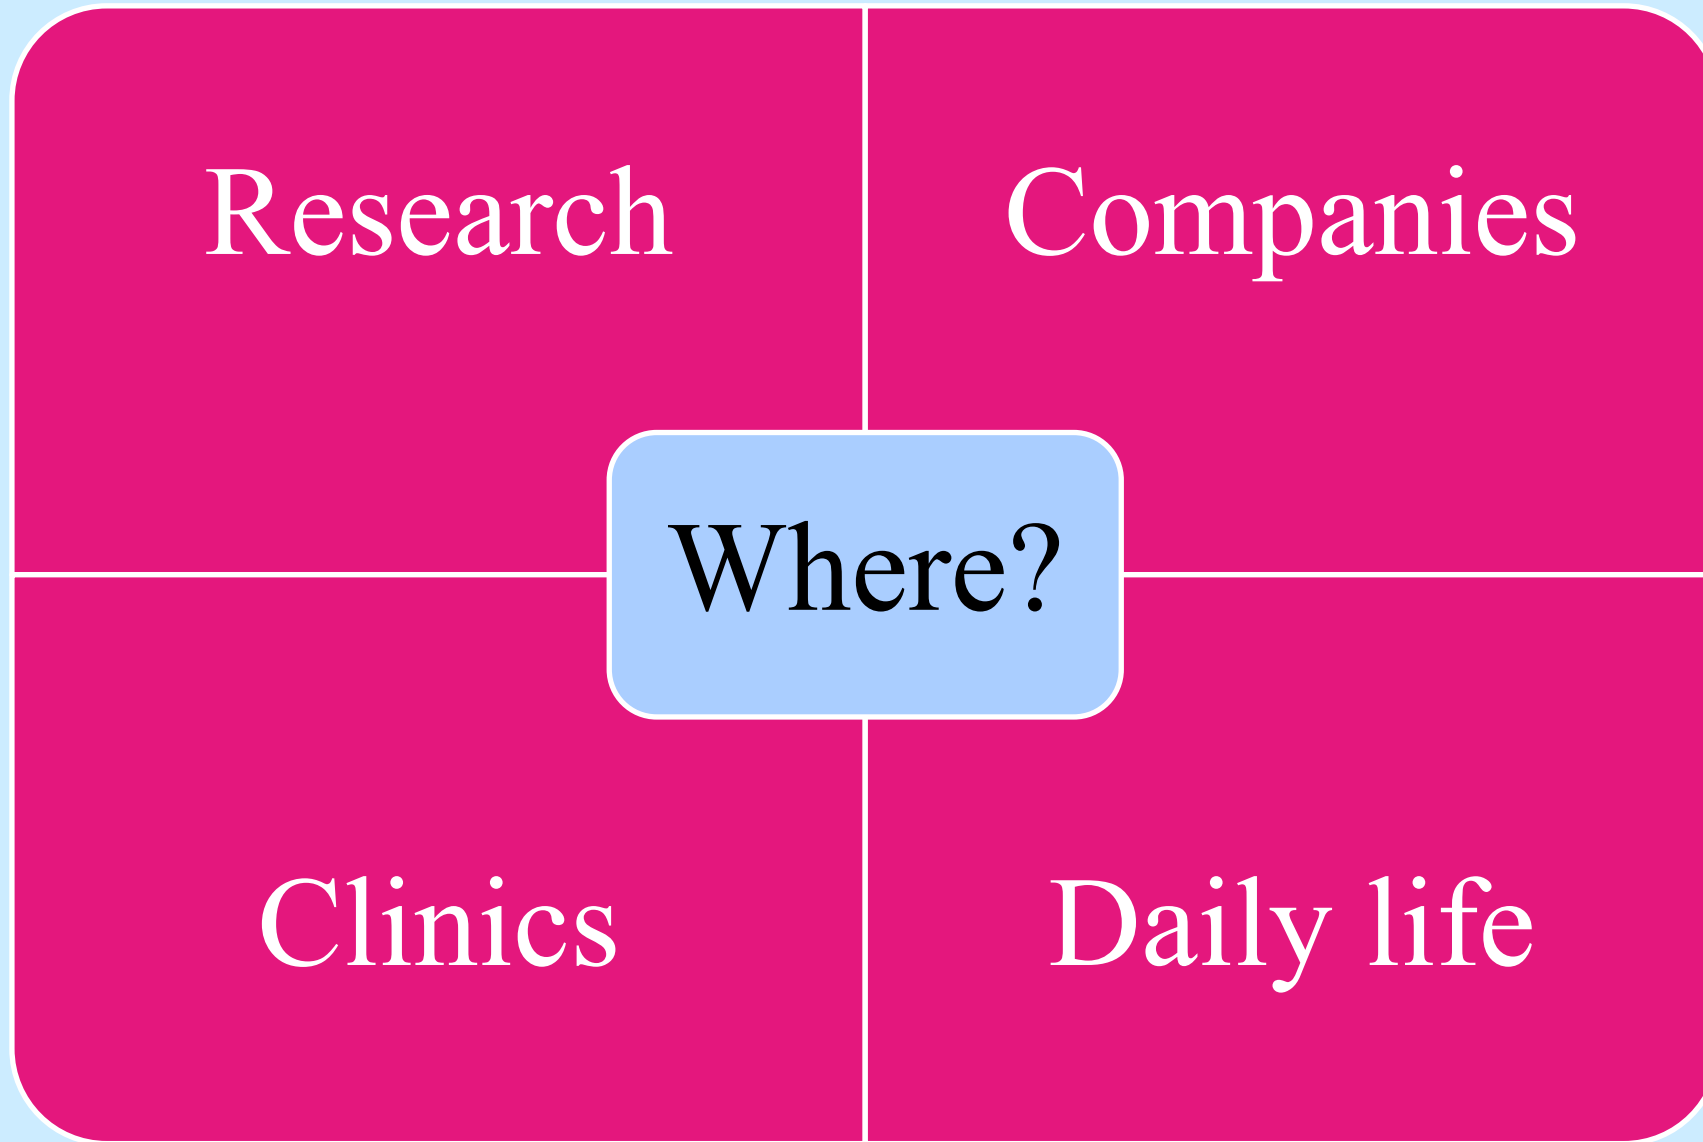

Patients

AI should be used in the interest of patients;
The use of AI should not treat any groups of patients unfairly;
Dignity needs to be preserved so the patient should have autonomy of thought, intention, and action when making decisions regarding health care.

**Will appreciate your ideas:
