

Anthony Ikemefuna is an Assistant Director at the Nigerian Communications Commission (NCC) where he heads the Fixed Network and Converged Services Unit. The Unit is responsible for Numbering Management (including short codes and USSD codes), Fixed Networks (operation of Fibre Networks and Site builds) and Converged Services. Earlier on, Anthony was the President and co-founder of Cellynk Communication Corporation based in Silicon Valley, California, USA. Before founding Cellynk Communications, Anthony had extensive experience and demonstrable success as an international Technical, Marketing and Sales Executive when he worked as a Senior Marketing Manager, End-to-end System Marketing Manager and 3G Technical Solutions Manager at Ericsson Radio Systems (EAB), Stockholm, Sweden.

Anthony Ikemefuna was listed in the WHO's WHO of Information Technology in 2002 by the WHO's WHO Historical Society based in Boston, USA. Anthony was a recipient of the prestigious Marcus Wallenberg Award for Scientific Research and Education in 2002. Anthony has a Master's Degree (MSc.) in Digital Communications Engineering from Chalmers University of Technology, Sweden; and an MBA from Long Island University, New York. In addition, Anthony holds the PMP and PRINCE 2 Practitioner Certification in Project Management. Presently Anthony is running a part-time PhD program at the VU University in Amsterdam, Netherlands.

Anthony has spoken/taught in wireless conferences/workshops in Singapore, Nigeria, Sweden, Finland, France, Denmark, Czech Republic, Yugoslavia, New York, Australia, Malaysia and San Jose (Silicon Valley, California). Anthony is the Current Vice Chairman of the ITU-T SG2 Regional Group for Africa (SG2RG-AFR).
