Guidance Technology Code of Practice

Updated 27 March 2019

Contents

Using the Technology Code of Practice

Spend controls and the Technology Code of Practice

The Technology Code of Practice is a set of criteria to help government design, build and buy technology. It's used as a cross-government agreed standard in the [spend controls process](#).

The Technology Code of Practice is part of the [Transformation Strategy 2017-2020](#) and

Page contents:

- Who the community is for
- Get involved
- Community resources

The digital buying community exists to:

- make sure that procurement practices support agile ways of working
- create and support a peer group of buyers across government
- share knowledge and best practice for buying digital and technology services
- discuss common challenges and develop solutions
- build commercial awareness across central government and the wider

Local Digital > Local Digital Declaration

Local Digital Declaration

Introduction

This declaration affirms our collective ambition for local public services in the internet age, and our commitments to realising it. It commits us working on a new scale to:

- design services that best meet the needs of citizens
- challenge the technology market to offer the flexible tools and services we need
- protect citizens' privacy and security
- deliver better value for money

Procurement Guidelines for Smart Sustainable Cities

With the support of ITU and U4SSC, we're proposing to begin a **consultation to develop a set of procurement guidelines (and associated KPIs) for smart sustainable cities.**

This will be informed by the material presented yesterday and today, with a target completion date of April 2020.
