Transaction Accounts for All & the Payment Aspects of Financial Inclusion

Thomas Lammer
Senior Payment Systems Specialist
Payment Systems Development Group

ITU Workshop
4 December 2014, Geneva
25 Countries Account for 76% of the World’s Unbanked

- 77% of adults living on $2 a day or less do not have a bank account
- 1.3 billion women worldwide remain unbanked
- 85% of adults in fragile and conflict affected states do not have a bank account
Defining the Vision

• “Universal access to financial services is within reach – thanks to new technologies, transformative business models and ambitious reforms.”

• “As early as 2020, such instruments as e-money accounts, along with debit cards and low-cost regular bank accounts, can significantly increase financial access for those who are now excluded.”

The Global Goal: By 2020, adults globally have access to transaction accounts to store money, send and receive payments as the basic building block to manage their financial lives

- Access to a transaction account is a stepping stone to financial inclusion, which includes a full range of formal financial services.
- Universal financial access is ambitious, yet achievable for the majority of the world’s population by 2020, full financial inclusion will take longer.
- Even with financial access, usage will not be universal, and not all countries will reach it.
- Achieving access is a collective effort; the WBG will contribute to delivering accounts to reach at least 40% of the excluded, or 1 billion clients.
Strong link to Twin Goals: poverty reduction and income effect

• 38-56% increase in productive investment and 37% higher personal expenditures as a result of access to a basic savings account in Kenya, for women informal business owners

• Increase in average income by 7% and employment by 1.4% as a result of bank access points opened in retail stores in Mexico

• Branch expansion into rural unbanked locations in India significantly reduced rural poverty, linked to increased savings and credit (1977-1990 Harvard study)
Why it matters

• Helps manage income shocks: Remittances help to avoid or at least mitigate reductions in household consumption, compared to those household not receiving remittances.

• Improves food security: Higher diet diversity and daily food expenditures for women/households with mobile money/basic savings accounts (Niger data)

• More efficient and better targeted social transfers to the poor: 47% less bribe payments (India), 82% lower cost in the administration (Brazil)

• Improves access to services: ‘pay as you go’ solutions (e.g. for solar energy), or by households being able to tap remittances or savings to meet expenditures.
Digital Financial Inclusion:
Objective is to explore how the digital agenda related to payments services and transaction accounts can be leveraged to offer a wider array of appropriate, responsible financial products and services to the unbanked and underbanked. The project will aim to (1) formulate hypotheses on the main obstacles and drivers for products and services beyond payments, (2) identify models of evolution and innovative approaches, and (3) develop policy tools and guidance.

World Bank’s Good Practices for Financial Consumer Protection:
The Good Practices for Financial Consumer Protection are currently being revised to incorporate emerging consumer protection concerns with respect to digital finance. Recent innovations in financial products, delivery systems and providers of financial services are raising new consumer protection issues. The revised Good Practices will identify the consumer risks with these new business models and the measures that might be taken to mitigate and monitor those risks.
Task Force on Payment Aspects of Financial Inclusion (PAFI)

Co-Chairs
Objectives of the PAFI Task Force 1/2

- Examining the gap in guidance for authorities on the payment aspects of financial inclusion
- Capture the perspective of payment system experts, standard setting bodies and regulatory authorities
- Support the efforts of authorities to foster the expansion of access to transaction accounts and the use of electronic payment services
Objectives of the PAFI Task Force 2/2

- Contribute to the recognition that **safe and efficient payment services are important** for well-being of individuals, households, and businesses, as well as, a gateway to a broader range of financial services.
- Advance market efficiency, flexibility, integrity, and competitiveness to **support financial stability and inclusion**
- Facilitate the establishment of a **balanced and proportional regulatory environment** to facilitate effective, reliable, safe, and cost-efficient access to payment services
PAFI’s Guiding Principles

▪ “Address the Gap”: Focus on those aspects and links which have not yet been (fully) examined in a comprehensive manner

▪ “Remain neutral”: no preference for specific technological solutions, business-models and/or regulatory approaches

▪ “Focus on elements of global relevance”: rather than country-specific issues

▪ “Do not re-invent the wheel”: Built upon the work already carried out and be consistent with all standards, recommendations and guidelines of the CPMI and other relevant Standard-Setting Bodies
Broad Spectrum of Members: CPMI & Non-CPMI
Central Banks, International & Regional
Development Banks, IMF, BIS, and World Bank
Ambitious PAFI Workplan with planned publication of a Consultative Report in second half of 2015

- Inaugural PAFI Meeting April 2014
- 3rd PAFI Meeting Nov. 2014
- Publication of a consultative Report

Workstreams on Focus Areas

- Report Drafting

2014

- 2nd PAFI Meeting August 2014
- 4th PAFI Meeting Jan. 2015

2015

- Reach-out to Key Stakeholders
- 5th PAFI Meeting April 2015
Initial Focus Areas of PAFI Work-Streams

- Risk Management and Security
- Consumer Protection and Transparency
- Payment product design
- Regulatory Frameworks
- Basic Bank Accounts
- Government Payments
- Payment System Infrastructure, Interoperability, Standardization
- Competition, Level Playing Field
Transaction Accounts for All: That’s definitely not a “TALL order”
By 2020 all adults should have access to transaction accounts, payment instruments!

The World Bank objective & the PAFI Task Force are important building blocks – so is the ITU Focus Group!
