

# **Governments, Open Data, & IoT**

**12 March 2017**

# GovEx

We build  
government capacity  
for  
evidence-based  
decision making.

---

**Government  
Open Data  
≠  
Big Data**

**v4**

# Why?

- Disconnected leaders of innovation, tech, data, and business lines
- Policy (laws and regulations) slow to change
- Heavy reliance upon Public-Private Partnership (P3) models for implementing
- Navigating an ecosystem of partners is challenging
- Noisy data isn't authoritative
- Open Data consumers aren't ready

- Improve access to the data
- Train leaders and staff
- Evaluate P3s
- Connect innovators with civil servants

# Moving forward

---

# Thank you
