

ITU Kaleidoscope 2014 Living in a converged world - impossible without standards?

Global standards, the key enablers for deploying next generation emergency communications networks

Fidel Liberal University of the Basque Country (UPV/EHU) fidel.liberal@ehu.es

Outline

- Context
- Market and standardization trends
- Challenges
- Interoperability
- Requirements and design principles
- The over the top proposal

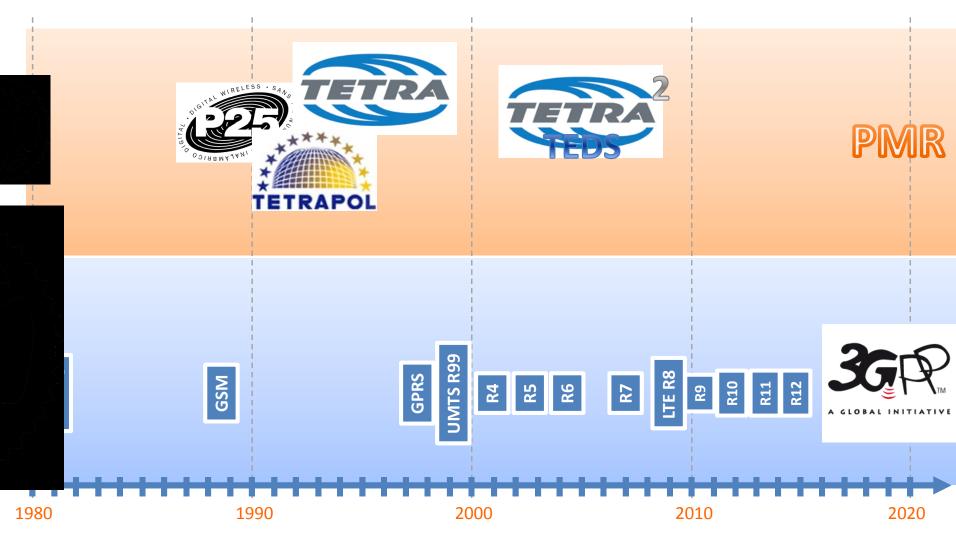

Context: Current public safety networks

Mass market Security concern... Cheap Broadband Rich multimedia capabilities

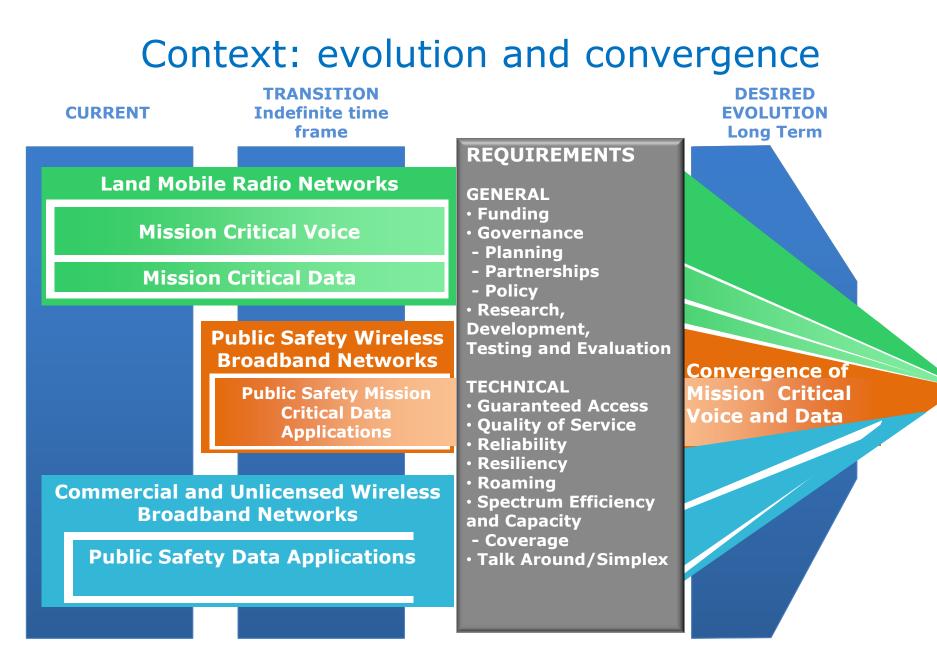

Secure Reliable Expensive Interoperability problems Limited data capabilities No broadband

Context: PMR vs. commercial cellular technologies

Saint Petersburg, Russian Federation, 3-5 June 2014 ITU Kaleidoscope 2014 - *Living in a converged world - impossible without standards?*

Current trends

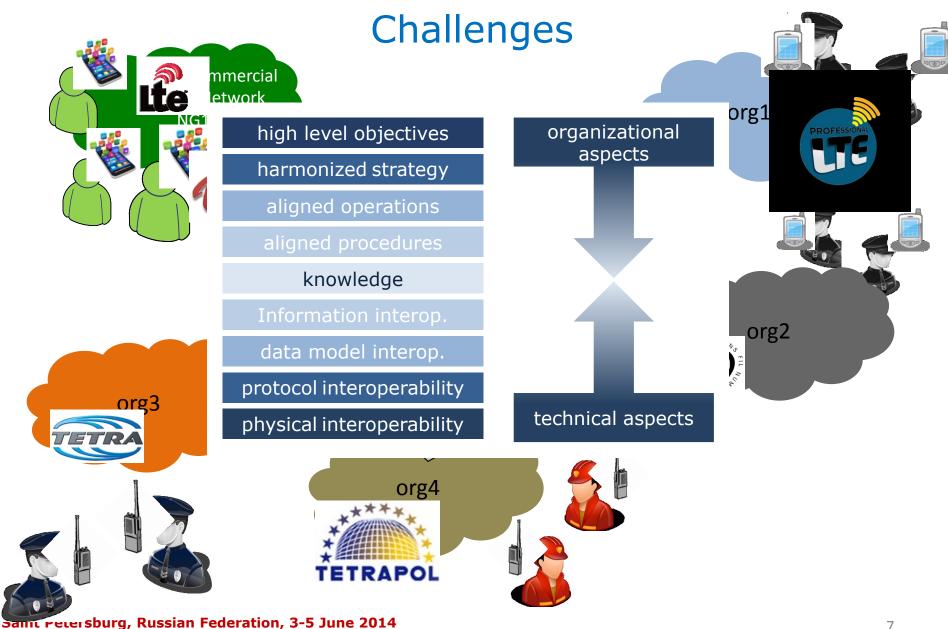

- LTE -U.S. NPSBN
 - -U.K. ESMCP
- SDOs

I WANT YOUR MONEY **AND SPECTRUM** FOR U.S. PUBLIC SAFETY NETWORK

KEEP CALM AND REPLACE U.K. TETRA

- -3GPP
 - ProSE, GCSE, UPC
- TTCA CCBG
- ITU-T SG11
- ETSI SC EMTEL

ITU Kaleidoscope 2014 - Living in a converged world - impossible without standards?

Interoperability

- Different needs
 - From citizens in commercial networks to FR private networks
- Interoperability levels
 - Organizational
 - Regional/national/cross-border
 - Main aspects to consider
 - Practices
 - Information Security
 - Legislation
 - OAM procedures
- Technical interoperability
 - Current incompatibilities (technologies, implementations)
 - Backwards compatibility
 - Convergence
- Information Exchange
 - User groups, identities, security constrains, location

Requirements and Design principles

- R1: Address different types of PMRs and citizens.
- R2: Basic and enhanced services.
- R3: Interoperability of both legacy and next generation emergency networks
- R4: Internal access to enhanced services with legacy equipment.
- R5: Ensure autonomous (perorganization) management.
- R6: Preserve Information ownership/access rights.
- R7: Easily allow trans-national/regional communications.
- R8: Enable the connection of significantly different organizations.
- R9: Allow different business models.
- R10: Integrate recording and location tracking capabilities.
- R11: Harmonize user priorities.
- R12: Not affect existing internal procedures.
- R13: Ensure efficient operation.
- R14: Permit the integration of an intermediary control room for emergency communications.

DP1: Multi-domain ecosystem DP2: Standardized IP based "core network" DP3: Optimized technology independent operations DP4: Enable IP-Level Mobile Virtual Network Operator (MVNO) DP5: Session Border Control-like DP6: Common technology independent naming and call routina. DP7: Avoid any assumption. **DP8:** Scalability **DP9:** Controlled access DP10: Orchestrate the use of resources DP11: Flexible multi-level dispatching . DP12: Rely on OAM for interagencies operations. DP13: Enable recording and location tracking mechanisms. DP14: Fase citizens' access to the interoperability services.

Saint Petersburg, Russian Federation, 3-5 June 2014 ITU Kaleidoscope 2014 - *Living in a converged world - impossible without standards?*

DP vs. Requirements

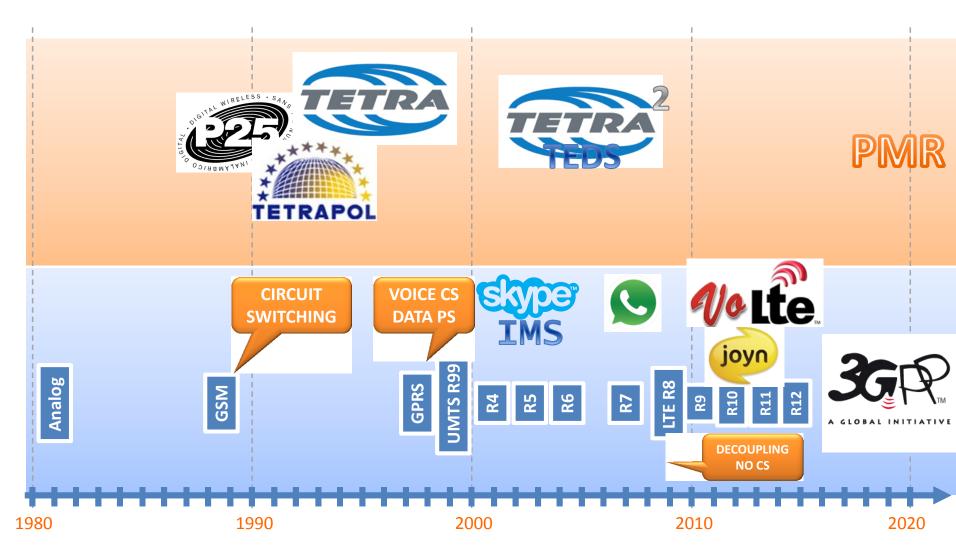

| | R1 | R2 | R3 | R4 | R5 | R6 | R7 | R8 | R9 | R10 | R11 | R12 | R13 | R14 |
|------|----|--------------|--------------|--------------|----|--------------|--------------|--------------|--------------|--------------|-----|--------------|--------------|--------------|
| DP1 | | \mathbf{V} | | | | | | \mathbf{V} | \mathbf{V} | | | | | |
| DP2 | | | \mathbf{V} | | | | \mathbf{V} | | | | | | | |
| DP3 | | | | \mathbf{V} | | | | | | | | | | |
| DP4 | | | | | | | | \mathbf{V} | | | | | | |
| DP5 | | | | | | | | | | | | | | |
| DP6 | | | | | | | | | | | V | | | |
| DP7 | | | | | | \mathbf{V} | | $\mathbf{>}$ | | | | \mathbf{V} | | |
| DP8 | | | | | | | | \mathbf{V} | | | | | | |
| DP9 | | | | | | | \mathbf{V} | | | | | | | |
| DP10 | | | | | | | | | | | | | \mathbf{V} | |
| DP11 | | | | | | | | | | | | \mathbf{V} | | \mathbf{V} |
| DP12 | | | | | | | | | | | | V | | |
| DP13 | | | | | | | | | | \mathbf{V} | | | | |
| DP14 | | | | | | | | | | | | | | |

The Over The Top proposal

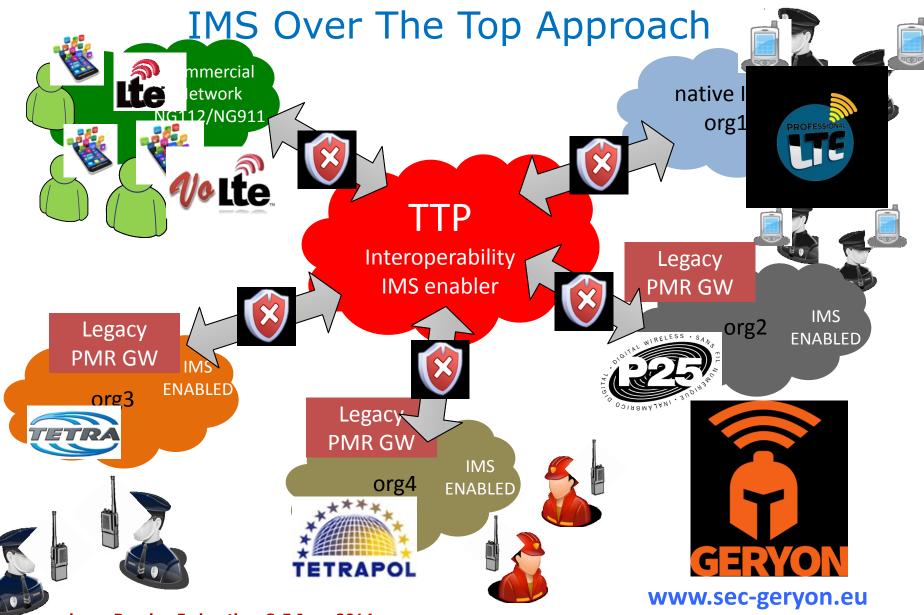

- Technology agnostic
 - Regardless underlying network
- IP based
- Software solution
- Cost effective and convergence enabler
- Need for harmonization!!!
 - Current initiatives focused on low level IoT but... emergency services?

Convergence towards over the top

Saint Petersburg, Russian Federation, 3-5 June 2014 ITU Kaleidoscope 2014 - *Living in a converged world - impossible without standards*?
