Associate / Professor (e-Governance

Machine learning for a 5G future

Introduction

01

02

03

04

Agenda

- Ethics : Right V/s Wrong
- ML : Learning through Algos
- M/C replace Humans- so who rules?
- Unethical Hacks !
- Biased Databases ...

Combine EQ & SQ with IQ to creates ML Algos: 'Mechanical Learner,' 'Cognitive Learner ', 'Ethical Learner', 'Ethical Master/ Leader'

- Changes at 3 levels- National, Organisational, Design Approach
- Ethics' Guidelines, Collaborations, Authorities : to check compliance of EF in ML

Proposed Ethical Framework (EF)

Ethical Issues in ML

Implementation Strategy

05 Way Forward

Dreams or Reality : 1985-Now

01

Use of AI /ML/ Big Data Algorithms to detect Anomaly in any system to predict unexpected disasters (Soil Health in Odhisha) (Tol, Sep 27, 2017)

Augmented and Virtual Reality will bring the showroom and test drive to the customer PRATAP PAT JOSHI CIO. Mercedes-Beng India

Apps, drones likely to map infrastructure projects

TNN | Dec 6, 2017, 04:19 IST

How Data Analytics Forecasted Riots/ Foreign intrusions

Using correlation metrics on social media posts, hashtags, news articles or posts by religious groups & intelligence data from police agencies... The next intrusion is likely to happen in the wee hours of the morning, around 2 am, about 11 or 12 days after a herd of cattle meanders close to the Arunanchal border....

The new age of meeting rooms will have automated assistants capable of completing tasks DEBASHISH SINGH CIO, Mphasis

Robots excavators are coming to Bengaluru soon. BBMP-*Bruhat Bengaluru Mahanagara Palike* – the urban local bod – has plans to procure 'fobot multi-purpose excavators' for dredging and cleaning of drains in Bengaluru (Sep 5, 2017)

26-28 November Santa Fe, Argentina

ITUKALEIDOSCOPE SANTA FE 2018

Machine learning for a 5G future

SOME ETHICAL ISSUES

Unethical Hacks

Machines recording, analysing preferences

HACKED IN TRANSLATION

internal frauds ? remote hacking? perception-modifications?

Machines Replacing Humans

Decisions left to m/cs esp complex, huge data Whose judgment is better **Replace human existence**

Biased DataBases Machines learning from 'unclean' sources

• Non-inclusive policies?

Biased DataBases

Siri, Google Now, Cortar

Samsung S. Voice ...

coded to respond to most commonly faced crises like heart-attacks , suicide risks

> ...but not queries on Sexual Abuse * / Physical Abuse** ... " Sorry I don't know what that is"

(* estimated to be faced by 20% of all women) (**faced by 1 of 3 women in the world)

"It tracks every important metric of the human body" Apple's HealthKit

> ...but not Menstrual cycle-'her' anxiety every month

C

 $\leftarrow \rightarrow$

2016-Semi-automated drones (LETHAL AUTONOMOUS WEAPON SYSTEMS) deployed between demilitarize zone of South and North Korea

2017-A Russian Robot, Promobot R77 wants to go Free; Sophie wants to kill the human race

Reality itself is an AI Simulation that is malfunctioning

2016-Online Feud of Wiki-Bots

Traffic cam mistakes CEO face on bus for her, charges for law break short by Pragya Swastik / 08:51 am on 28 Nov 2018,Wednesday

An artificial intelligence-based traffic camera system in China recognised the face of a woman CEO, Dong Mingzhu, on a bus advertisement and mistakenly charged her for crossing a road during a red light. The image of Mingzhu, CEO of China's biggest air-conditioner maker Gree Electric Appliances, was displayed on a city billboard used to shame those who break traffic laws.

2017-FACEBOOK has revealed how its artificial intelligence created its own language and began nattering in private

Google Photos 'goof' up in facial recognition...

MS Chatbot - " Hail Nazi" tweets !!!

INTRODUCTION

The study is an interplay of ML (the hard science) and Ethics (the soft science)

AIM

How to minimize /eliminate bias in ML algorithms for making predictions and future decision making

26-28 November Santa Fe, Argentina

Methodology

Machine learning for a 5G future

Existent Ethical Frameworks

ITUKALEIDOSCOPE SANTA FE 2018

Machine learning for a 5G future

26-28 November Santa Fe, Argentina

Proposed Ethical Framework

Santa Fe, Argentina

Proposed Ethical Framework

'welfare-for-all'

		-weitare-tor-air
Emotional Quotient LOW (EQ) High	02 COGNITIVE LEARNER ALGO <i>medium complexity jobs</i> empathetic, inclusive, contextual Electronic Assistants (Alexa)	O4 ETHICAL MASTER ALGO V. complex decisions by country leaders Gia Sensitive Global Policies
	Predicting User BehaviourTeleMedicineNLPFacial Recognition	DSS/ ES for Global Leaders & Policy Makers
	MECHANICAL LEARNER ALGO repetitive jobs neutral responses & immature values Assembly Line Production Restaurant Robots Weather Forecasting Network mgmt, Intrusion /Fault Detection, Clustering	03 ETHICAL LEARNER ALGO higher complexity jobs- mature values, awareness of implications for all; community dm Military C Industry 4.0 Military C Drones ; AV R Humanoids-Sophia/ Rashmi M Dynamic DM for resource-mgmt Traffic Mgmt; SMART HOMES

┿

Machine learning for a 5G future

Implementation Strategies

National Level COE AUTHORITY; REGULATIONS; ETHICAL INDICES/STDs/ COLLABORATIONS

- Work with multi experts
- National Ethical Framework
- Support Policyenhancements
- Standards for big data
- Encourage research in emerging areas by global / local alliances

Organizational Level 'ETHICS are a MUST'

- Develop, Follow & Monitor Ethical F/w Templates
- Changes in hiring, CB- training, promotion & feedback
- Incorporation of ethical aspects at design stage
- Assigning an Ethics engineer

Design & Authority "Humans stay the Master"

- Design using EF-Citizen-Centric approach
- Machine should be obedient to Owner, Design & Authority
- Provide some autonomy to machine but basic program should be locked so that data cannot be erased of hacked.

Way Forward : QoV (Quality of Values) in ML

IT Consultancies with International agencies

About the Speaker

WTO, WCO, GENEVA (2018) UNCTAD (United Nations Conference on Trade and Development), GENEVA (2018) The Swiss Embassy-India (2017) The World Bank (2000 – till Now) The Economist Intelligence Unit , HK-2017) IIMD- International Institute for Management Development (Lausanne, Switzerland) (2016) ADB - Asian Development Bank (2014) Panthéon Sorbonne, PARIS (2016,2014) Wollongong University, AUSTRALIA (2011)

The Minneek Internetional (1999)

National Agencies

Central Universities - JNU,DU, BHU,IIT-D, Rajasthan University Central ministries- meity ü, DoPT, MHA, MEA,DST, CPWD, DARP&G STATE GOVTS – KARNATAKA, HARAYANA INDUSTRY ASSOCIATIONS - NASSCOM MEDIA/ Civil Society – The LokSabha, DEF
