OUR *communities*
CAN TRUST US.

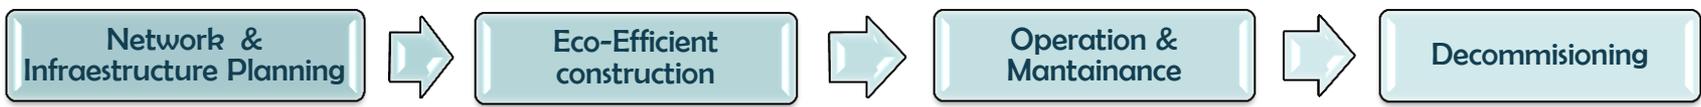

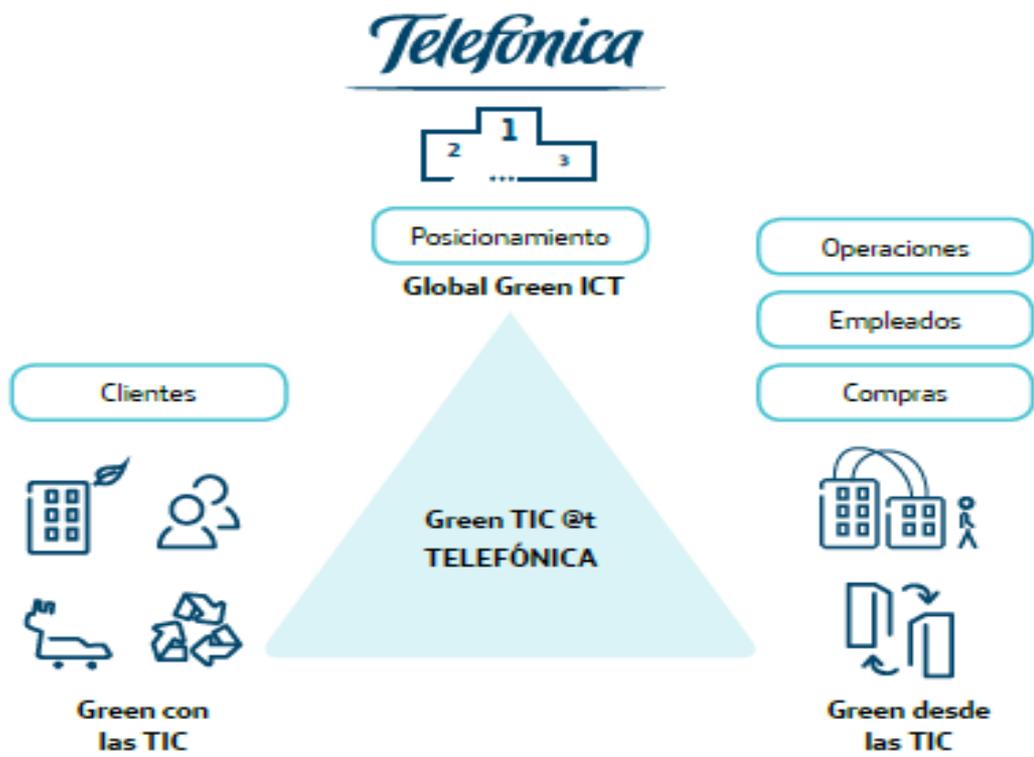

Development of Society

We contribute to the social, technological and economic development of the countries where we operate, investing in telecommunications infrastructure, creating jobs and developing products and service that contribute to the development of society.

We collaborate in civic, community and not for profit organizations and with public initiatives aimed at eradicating social problems in those local communities in which we operate by providing our capabilities and our technology.

Environment

We are committed to sustainable development, protecting the environment and reducing any negative impact we might have on our surroundings.

Responsible Network Deployment for Fixed and Mobile Networks

Scope

Environment

Eco-efficiency & Environmental risk mangamente

To prevent pollution by the use of ICTs

Energy & Climate Change

To reduce energy consumption and GHG emissions

To reduce energy consumption & Co2 emissions by ICTs use

ICT SECTOR

NON- ICT SECTOR

Green ICTs are:

- ✓ Internal Eco-efficiency for energy, CO2, water and waste
- ✓ Effective management of local and global environmental risks.
- ✓ Deliver Green ICT services for efficient management of water, waste, energy, etc.

02 E-WASTE Management in Telefónica

E-waste management Policy of Telefónica

- ✓ To promote E-Waste management models according to local environmental legislation and principles of shared responsibility.
- ✓ To manage E-waste in Telefónica operations under principles of eco-efficiency
- ✓ To promote standards that reduce the generation of E-Waste and improve the eco-design of EEE for telecommunications services
- ✓ To develop procurement policies for EEE for telecommunications services that facilitate their re-use and recycling at the end of its useful life.
- ✓ To provide our customers environmentally responsible options when disposing their devices and provide information on responsible management of E-Waste
- ✓ To control the reuse and recycling processes of e-waste management from service providers, ensuring compliance with environmental legislation and our Business Principles

(European Directive 2012/19/EU*)

Electric & electronic equipment (EEE): equipment which is dependent on electric currents or electromagnetic fields in order to work properly and equipment for the generation, transfer and measurement of such currents and fields.

Electric and Electronic Waste (E-WASTE or WEEE): electrical or electronic equipment which is waste, including all components, sub-assemblies and consumables which are part of the product at the time of discarding;

* Last version . July, 2012
