

ITU EMF Guide and mobile app Information Sheet

A new mobile application in 6 languages that provides a guide to electromagnetic fields (EMF) has been launched by the International Telecommunications Union (ITU), a United Nations specialized agency for information and communication technologies (ICTs).

The EMF Guide and mobile app is available online at <http://emfguide.itu.int> or via the iOS, Blackberry World and Google Play app stores. The Mobile app is designed for smart phones, tablets or desktops.

The purpose of the EMF Guide is to provide information and education resources on electromagnetic fields suitable for all communities, stakeholders and governments.

It offers an introduction to EMF and the relationship with health, as well as the various internationally agreed guidelines and standards designed to ensure safety in the use of mobile phones and other wireless technologies.

The primary reference on EMF and health is the World Health Organization (WHO).

Features

- Simple and intuitive design, providing easy to access EMF information.
- Intuitive illustrations and graphics - to help understanding
- Important tool for communication on EMF.
- Available in 6 Languages - AE, CN, EN, FR, ES, RU
- Compatible with all mobile operating systems - iOS, Android, Windows and Blackberry.
- Designed to work on PCs and laptops via a special desktop viewer.
- Includes the ITU EMF recommendations and links to main international EMF Standards.

Accessing the EMF Guide

- The EMF Guide is available at <http://emfguide.itu.int>
- or via the iOS, Blackberry World and Google Play app stores

Future Updates

- This application will be regularly updated based on new information or research made available by ITU and WHO.
