Please don't change the structure of this table, just insert the necessary information.

SCV and CCV thank ITU-T SG2 for its liaison statement COM 2 – LS 098 which describes the current SG2 activity on terms and definitions. The document was considered at the joint SCV-CCV meeting that took place on 2 June 2015.

After careful examination of the document, the committees decided:

- To ensure that all those terms contained in the listed approved Recommendations, and for which there is no active work item in the ITU-T work programme, are included in the terminology database. This activity will be coordinated by the TSB Engineer-Editor, who agreed to it during the meeting.
- To forward to C&P those Recommendations in the list for which the relevant translations exist, so that their terms and definitions be added to the Termite multilingual database.

It was also mentioned that the [ITU-R/ITU-T terminology database](#) already contains definitions that could be used in the work of SG2, and that Annex B of the [Author's Guide](#) for drafting ITU-T Recommendations and [Resolution ITU-R 34-3](#) provide useful guidance for the drafting of definitions.

Please send replies to this liaison statement to the secretariat at [tsbscv@itu.int](mailto:tsbscv@itu.int).
