Considering the importance of harmonizing the terms and definitions across study groups and across Sectors, ITU-T SG2 would like to inform the Standardization Committee for Vocabulary (SCV), Coordination Committee for Vocabulary (CCV) and all ITU-T SGs about current activity concerning terms and definitions in our Work Programme Recommendations (listed below).

SG2 encourages all interested parties to check possible overlapping and inform us (if so) to begin its alignment/adaptation.

Recommendation ITU-T E.101 - Definitions of terms used for identifiers (names, numbers, addresses and other identifiers) for public telecommunication services and networks in the E-series Recommendations.

Following definitions declared: addressing plan, closed dialling plan, dialling plan, E.164 numbering plan, identification plan, naming plan, numbering plan, open dialling plan, plan/ scheme, private numbering plan (PNP), address, code, domain name, E.164 number, emergency number, geographic number (GN), global number, identifier (ID), international E.164 number; international public telecommunication number; international number, international numbering resource, local number, MSISDN; mobile directory number, name, national E.164 number, national-only number, non-geographic number, number, routing address; routing number, service number; universal service number, short code, tel URI, telephone number; phone number; directory number (DN), area code, country code (CC), international prefix, mobile country code (MCC), national destination code (NDC), national (significant) number [N(S)N], national (trunk) prefix, prefix, subscriber number (SN), trunk code (TC), administrator, allocation, applicant, assignee, assignment, country, ITU assigned numbering resource, national numbering plan administrator, NPA assigned numbering resource, numbering area, operator, range; series, reclamation, resource.

Recommendation ITU-T E.212 - The international identification plan for public networks and subscriptions.

Following definitions declared: home network, international mobile subscription identity (IMSI), mobile country code (MCC), mobile network code (MNC), mobile subscription identification number (MSIN).

Recommendation ITU-T E.217 - Maritime communications – Ship station identity

Following definitions declared: ship station identity, Inmarsat mobile international number, Inmarsat mobile number, on-board identification digits.

Recommendation ITU-T E.157 - International calling party number delivery

Following definitions declared: calling party number, international calling party number delivery, pilot number.

Recommendation ITU-T F.Telecom Finance - Overview of Telecom Finance

Following definitions declared: G2P Finance, E-money, E-wallet, Finance, Financial Services, Digital Financial Services, Identification Network, Identification Terminal, Mobile Banking, Mobile Payment, P2P Finance, Telecom Finance.

Recommendation ITU-T E.108 (ex RDR-MMS) - Requirement for Disaster Relief Mobile Message Service

Following definitions declared: Disaster Relief, Disaster Relief System, Disaster Message board Service, Disaster Voice Message Delivery Service

Recommendation ITU-T E.rdr-scbm - Requirements for Safety Confirmation and Broadcast Message Service for Disaster Relief

Following definitions declared: Disaster Relief, Disaster Relief System, Safety Confirmation, Business Continuity Plan.

Recommendation ITU-T E.TD-DR - Terms and definitions for disaster relief systems, network resilience and recovery

Following definitions declared: Dedicated systems, Disaster preparedness, Disaster reconstruction phase, Disaster relief, Disaster relief phase, Disaster relief radiocommunication, Disaster restoration phase, Disaster relief for individual, Disaster relief for general public, Disaster relief system, Disaster response [Terminology of UNISDR], Early warning system [Terminology of UNISDR], Reconstruction, Shared systems, Network recovery, Network resilience, Delay tolerant networks (DTN), Local wireless mesh network, Movable and deployable ICT resource unit (MDRU), Business continuity plan, Disaster Message Board System, Disaster Relief Guidance System, Disaster Voice Delivery System, Emergency call, Safety confirmation, Safety confirmation and message broadcast system.

Recommendation ITU-T E.FAST - User Interface for Face-to-Face Speech Translation considering Human Factors

Following definitions declared: face-to-face

Recommendation ITU-T M.3160 - Generic, protocol-neutral management information model Amendment 1 (Adding top class definition and protection switch operation).

Following definitions declared: Top (abstract class)
