

# Global Initiative - Working Groups

Groups of experts collaborating on the development of specified deliverables, including, but not limited to technical documents, reports, guidelines, and tools that contribute to the mission and principles of the initiative.

The deliverables guide the projects and inform the work of interested parties, including researchers, policy and standards makers.

Proposed Working Groups:

- **WG on Repositories** (for problem statements, experts, datasets, models, tools, projects, events, standards)
- **WG on Marketplaces** (requirements and methods to discover and access data and AI models)
- **WG on Infrastructure** (requirements and methods for access to compute)
- **WG on Benchmarks** (assessment framework for datasets, models, tools)
