

5G Automotive Association

Maxime Flament, CTO

07 Sept 2018

5GAA brings together automotive, technology and telecommunications companies to work closely together to develop end-to-end solutions for future mobility and transportation services

AUTOMOTIVE INDUSTRY

Vehicle Platform, Hardware
and Software Solutions

TELECOMMUNICATIONS

Connectivity and Networking
Systems, Devices and
Technologies

End-to end-solutions for intelligent
transportation, mobility systems
and smart cities

5GAA: A Global Cross Industry Association

September 2016

- "Audi, BMW Group, Daimler AG are teaming with Ericsson, Huawei, Intel, Nokia, and Qualcomm to create the 5G Automotive Association (5GAA), which will help develop, test, and promote 5G standards"
- "Scope of the alliance is focused on bringing connectivity solutions to market addressing technical, business, and regulatory challenges"

Q3 2018

- › 5GAA unites 90+ members working together to:
 - Deliver innovation for road safety, connectivity and sustainability
 - Accelerate cooperative, connected, automated mobility
 - Develop 360° solutions for SMART mobility services
 - Pave the way towards 5G mobility

Semiconductor suppliers

Wireless Radio Suppliers

Automotive Tiers Telematics

Vehicle Manufacturers

Mobile network operators

Mobile network suppliers

Others (research, etc)

Public bodies & Testbeds

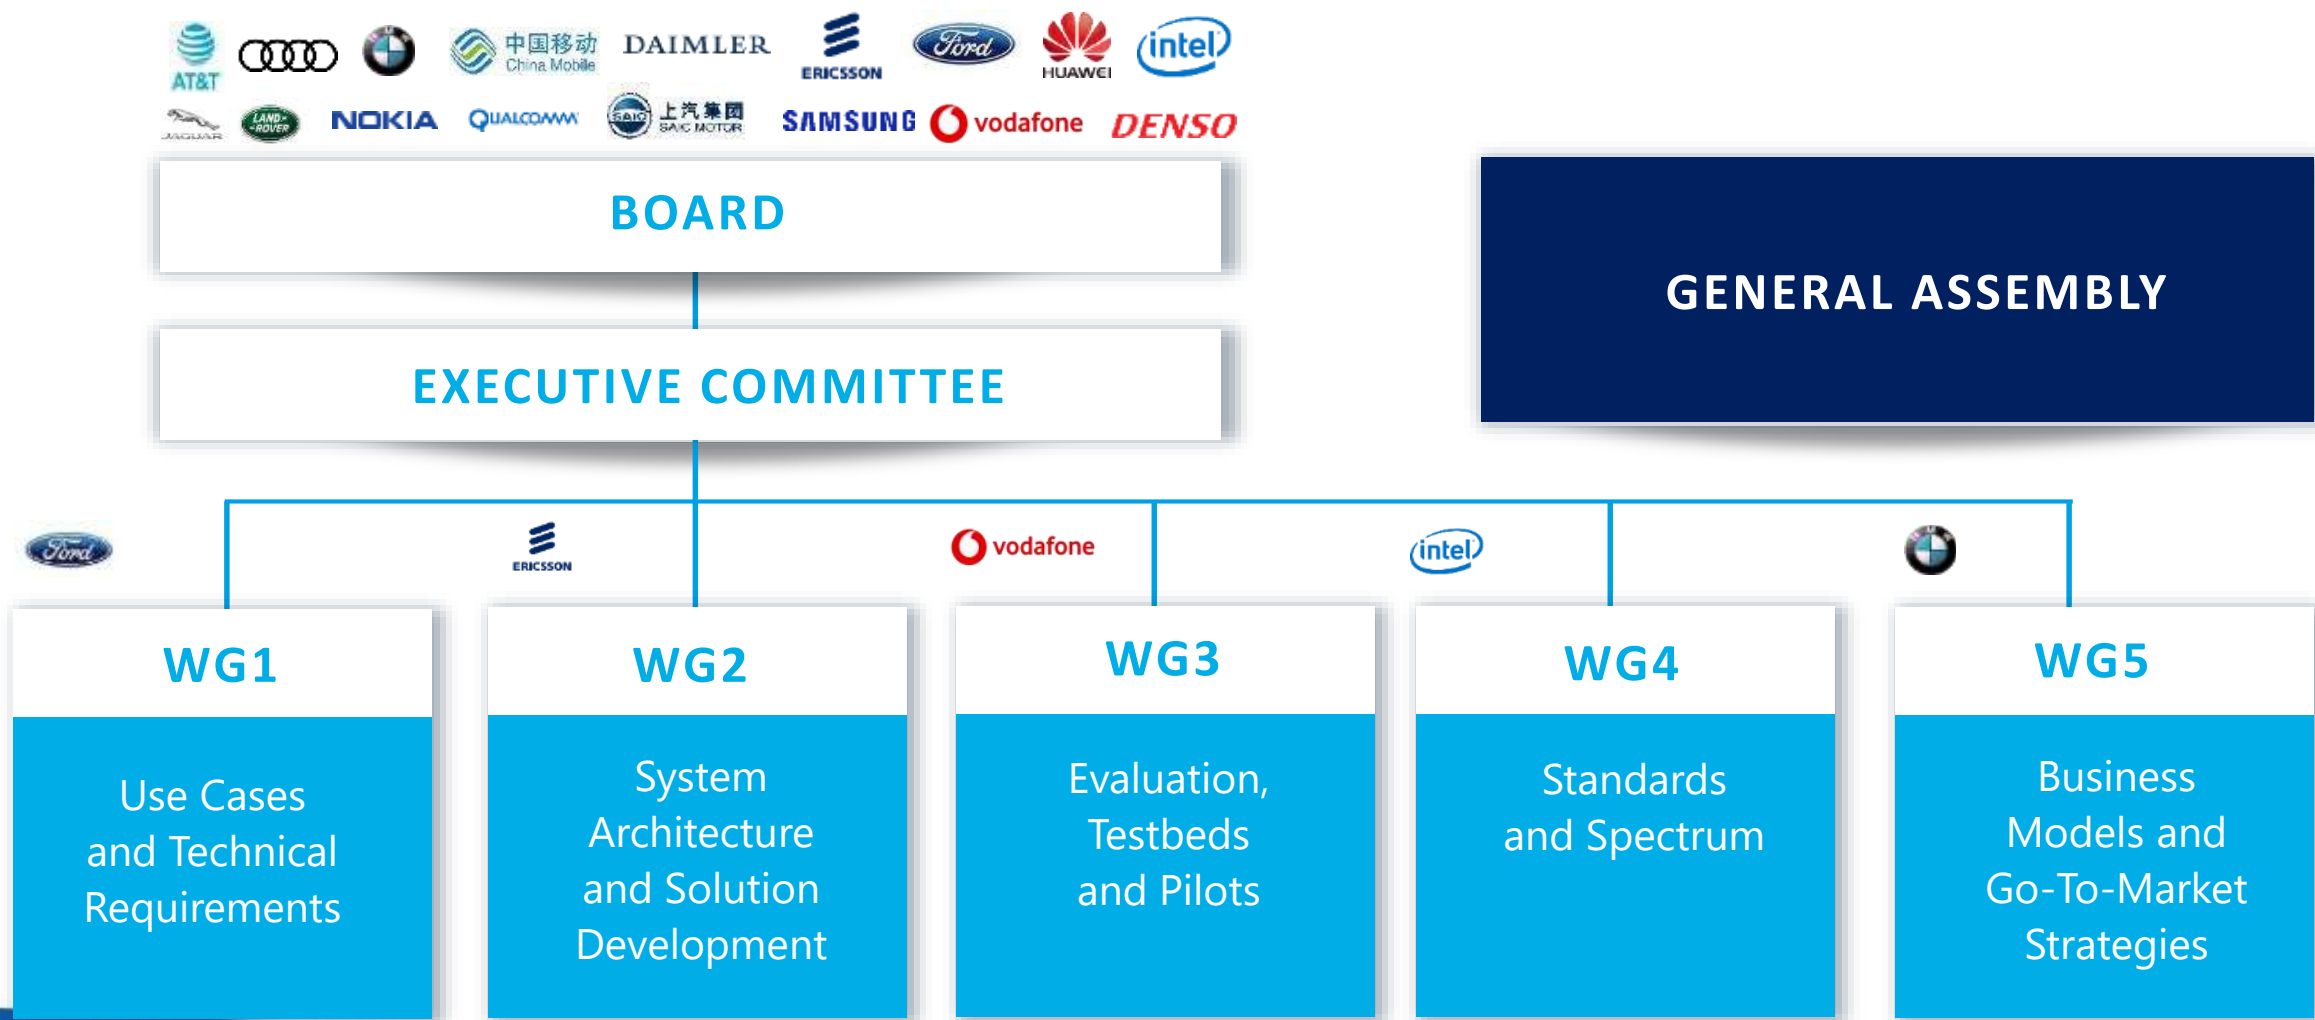

Mobile Device manufacturers

Test and verification

Set up 5GAA - Our Organisational Structure

Recent 5GAA WI reports and other documents

WG1

- T-170215 Use Case and KPI requirements: Prioritization and Timeline; Interims Status – V1.0
- [R1-1809720](#) LS on Prioritised Use Cases and Requirements for consideration in Rel-16 NR-V2X

WG2

- A-170209 Regional upper-layer specification alignment with 3GPP ITS-Cellular lower layers
- A-170222 Evaluation of available architectures
- A-170272 Sensor data sharing technical report for V2X applications
- A-170277 ETSI-ITS V2X application specification alignment with C-V2X access layer (RASAC-ETSI); Part 1: Upper layers specifications; Part 2a: C-V2X Access layer ; Part 2b: C-V2X Congestion Control
- A-180174 E2E evaluation of V2X Use Cases

WG3

- P-170125 High Level Plan for C-V2X Trials in North America
- P-170155 Simulated Radio Link and System Level Performance Comparison between C-V2X and DSRC
- P-170165 Survey on ITS Testbeds, Trials, Simulation Frameworks
- P-170166 Survey Report on ITS Activities
- P-180038 V2X Functional and Performance Test Procedures – Selected Assessment of Device to Device Communication Aspects
- P-180065 General Aspects and Strategy to Assess System Performance, Interoperability, and Conformance

WG4

- S-170116 A Standardisation Roadmap to 3GPP and other SDOs
- S-180167 ITS spectrum utilization in the Asia Pacific Region

WG5

- B-170109 Roadmap of monetiseable features and business models for LTE V2X – timeline for introduction of LTE V2X (V2V)
- B-180030 Timeline for deployment of LTE-V2X

Recent 5GAA White papers and Studies

White Papers

- [ITS spectrum utilization in the Asia Pacific Region](#)
- [NGMN white paper on V2X](#)
- [Deployment of LTE-V2X](#)
- [Edge computing for advanced automotive communications](#)

Studies

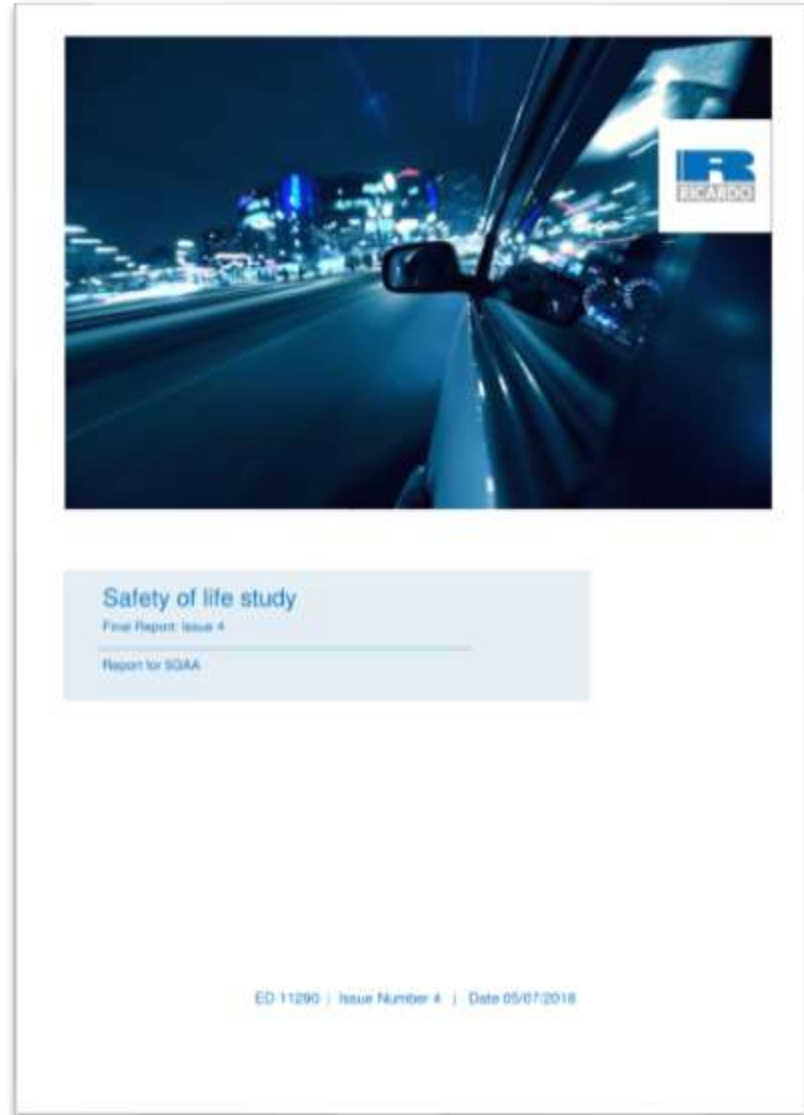

- [The cost-benefit analysis on cellular vehicle-to-everything \(C-V2X\) technology and its evolution to 5G-V2X](#)
- [An assessment of LTE-V2X \(PC5\) and 802.11p direct communications technologies for improved road safety in the EU](#)
- [The Case for Cellular V2X for Safety and Cooperative Driving](#)

Position papers

- [CEO letter to the European Commission on Connected Car Legislation](#) (24 CEO/CTO signatures)
- [Coexistence of C-V2X and 802.11p at 5.9 GHz](#)
- [C-V2X to advance towards the next generation of North America's transportation network](#)

NEW: Safety of Life Study

- Aim: explore the impact of different technical solutions for Cooperative Intelligent Transport Systems (C-ITS) communication solutions on EU road safety over time.
- Compare impact of LTE-PC5, LTE-Uu, and 802.11p
- Two major potentially live saving services:
 - Red signal violation/intersection safety,
 - Vulnerable Road User (VRU) protection.
- Highest impact are on LTE-Uu with 114,066 avoided fatalities and serious injuries by 2040
- Combined deployment of PC5 and Uu is very likely
- 802.11p shows lower impact as VRU protection is most likely not supported through smartphones

Approaches in the various regions in the world

Worldwide C-V2X Trials

Status LTE-V2X and 5G

And careful spectrum planning to support this evolution

Evolution to 5G,
while maintaining backward compatibility

Basic safety 802.11p or C-V2X R14

Established foundation
for V2X

Enhanced safety C-V2X R14/15

Enhanced range and reliability

Advanced safety C-V2X R16 (building upon R14)

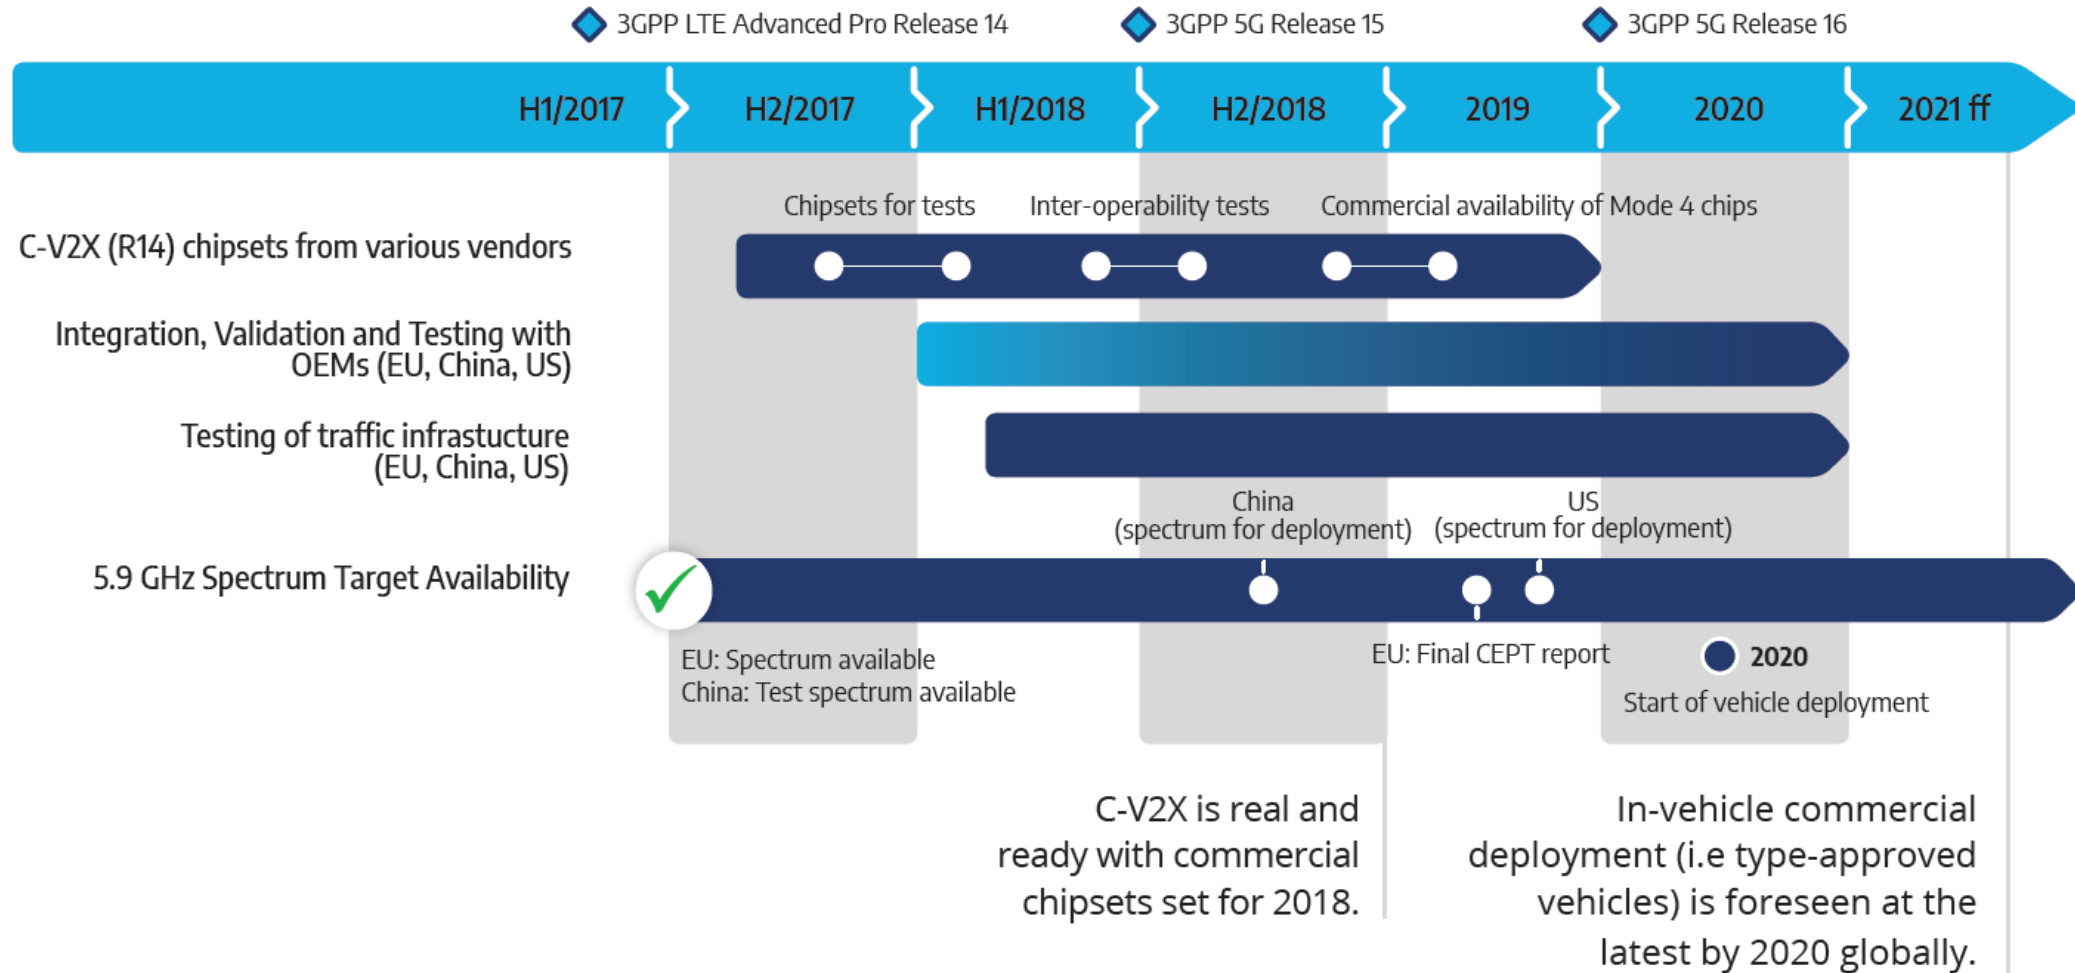

Higher throughput
Higher reliability

Wideband ranging
and positioning
Lower latency

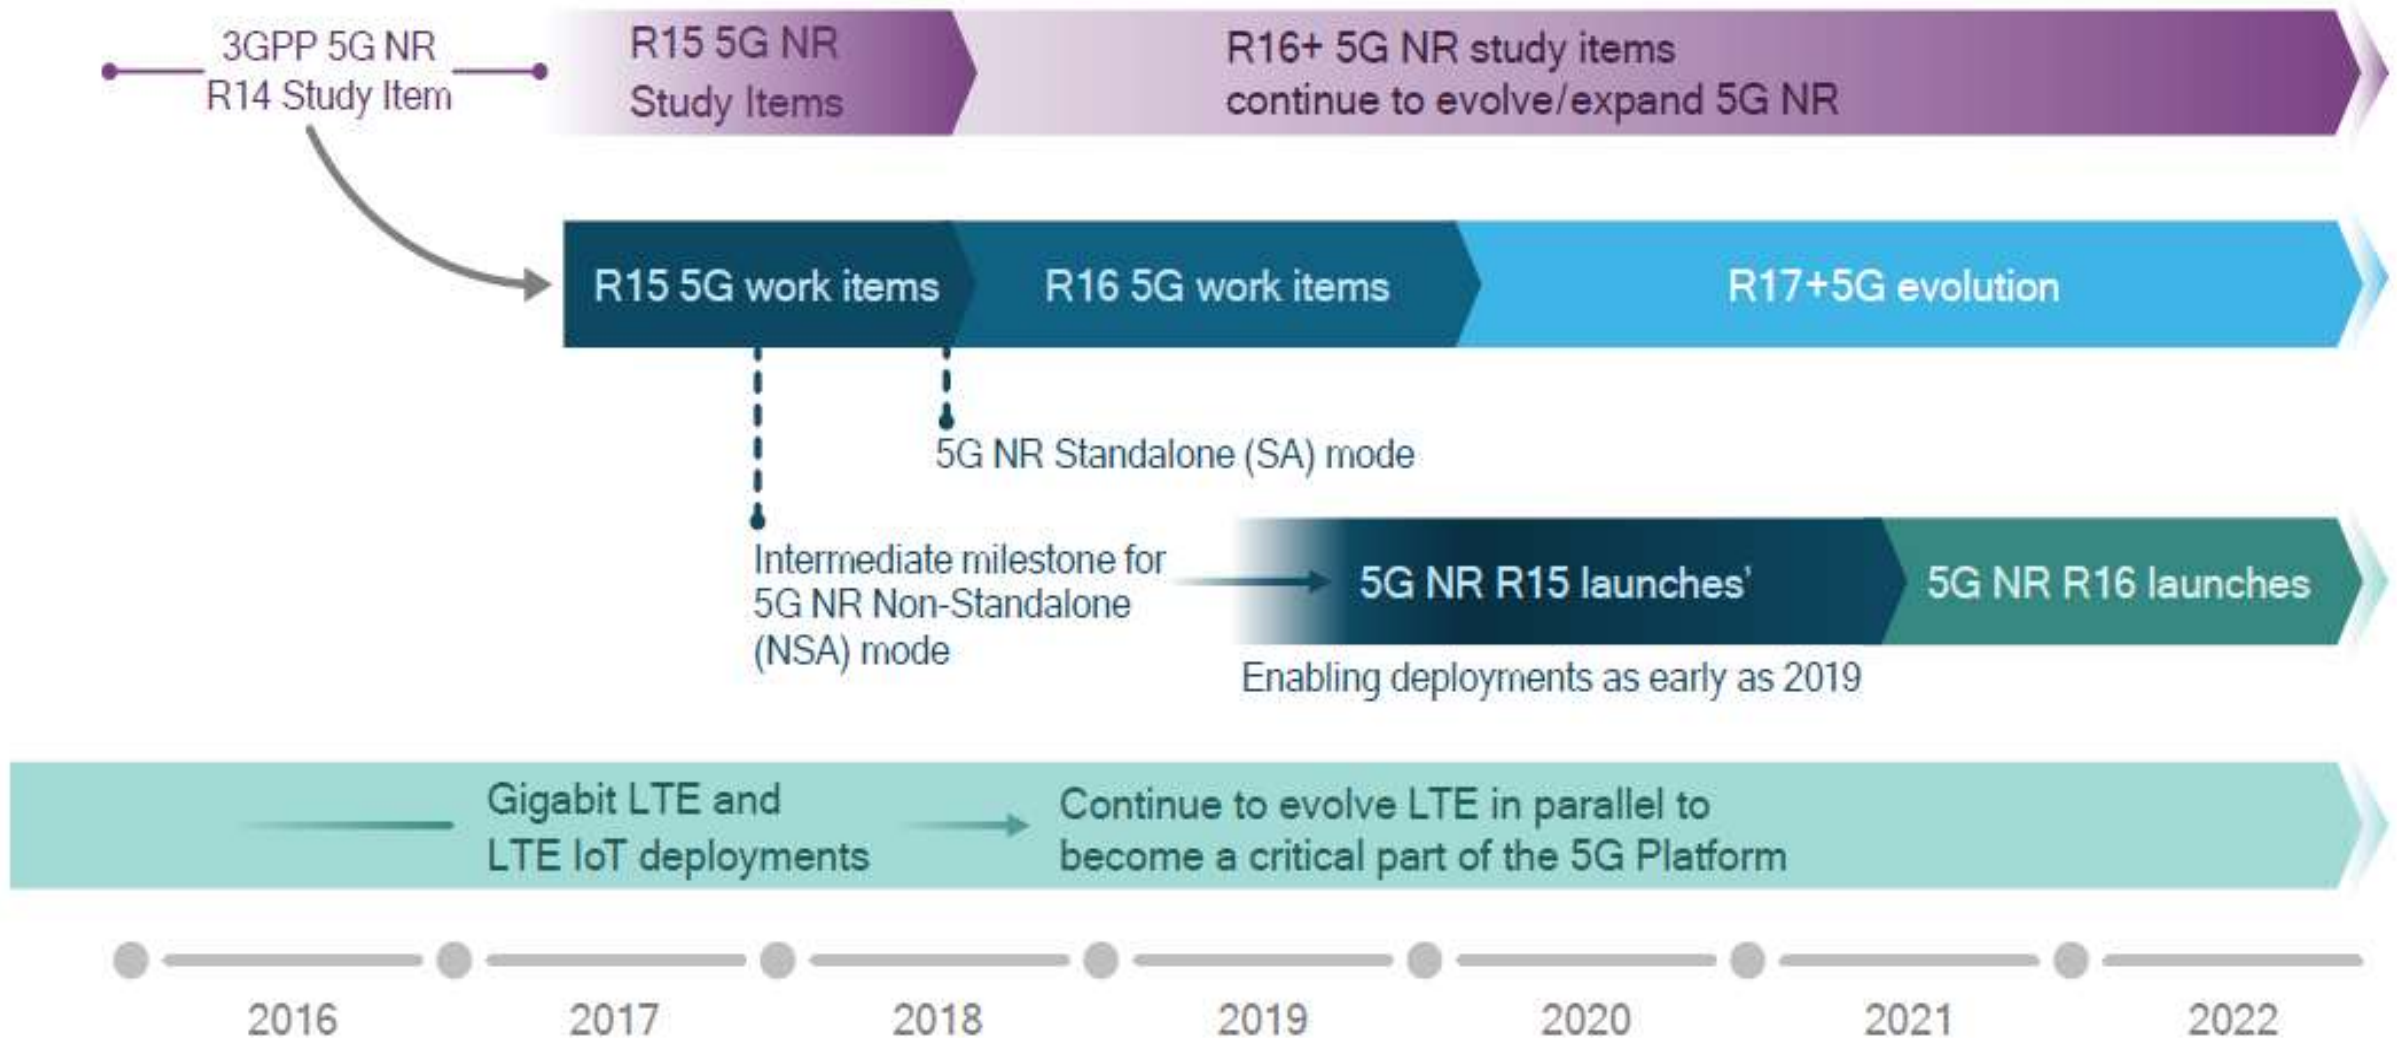

Source:Qualcomm

Timeline for deployment of C-V2X (V2V/V2I)

Accelerating 5G NR, the global standard for 5G

NR-V2X requirement as defined by 3GPP SA1 (TS22.186)

General requirements

Including lateral positioning, density, relaying, security, unicast

Platooning

enables the vehicles to dynamically form a platoon travelling together

Advanced Driving

enables semi-automated or full-automated driving

Extended sensors

enables the exchange of raw or processed data gathered through local sensors or live video images

Remote driving

enables a remote driver or a V2X application to operate a remote vehicle

RAN-related Summary

Based on SA1 KPIs

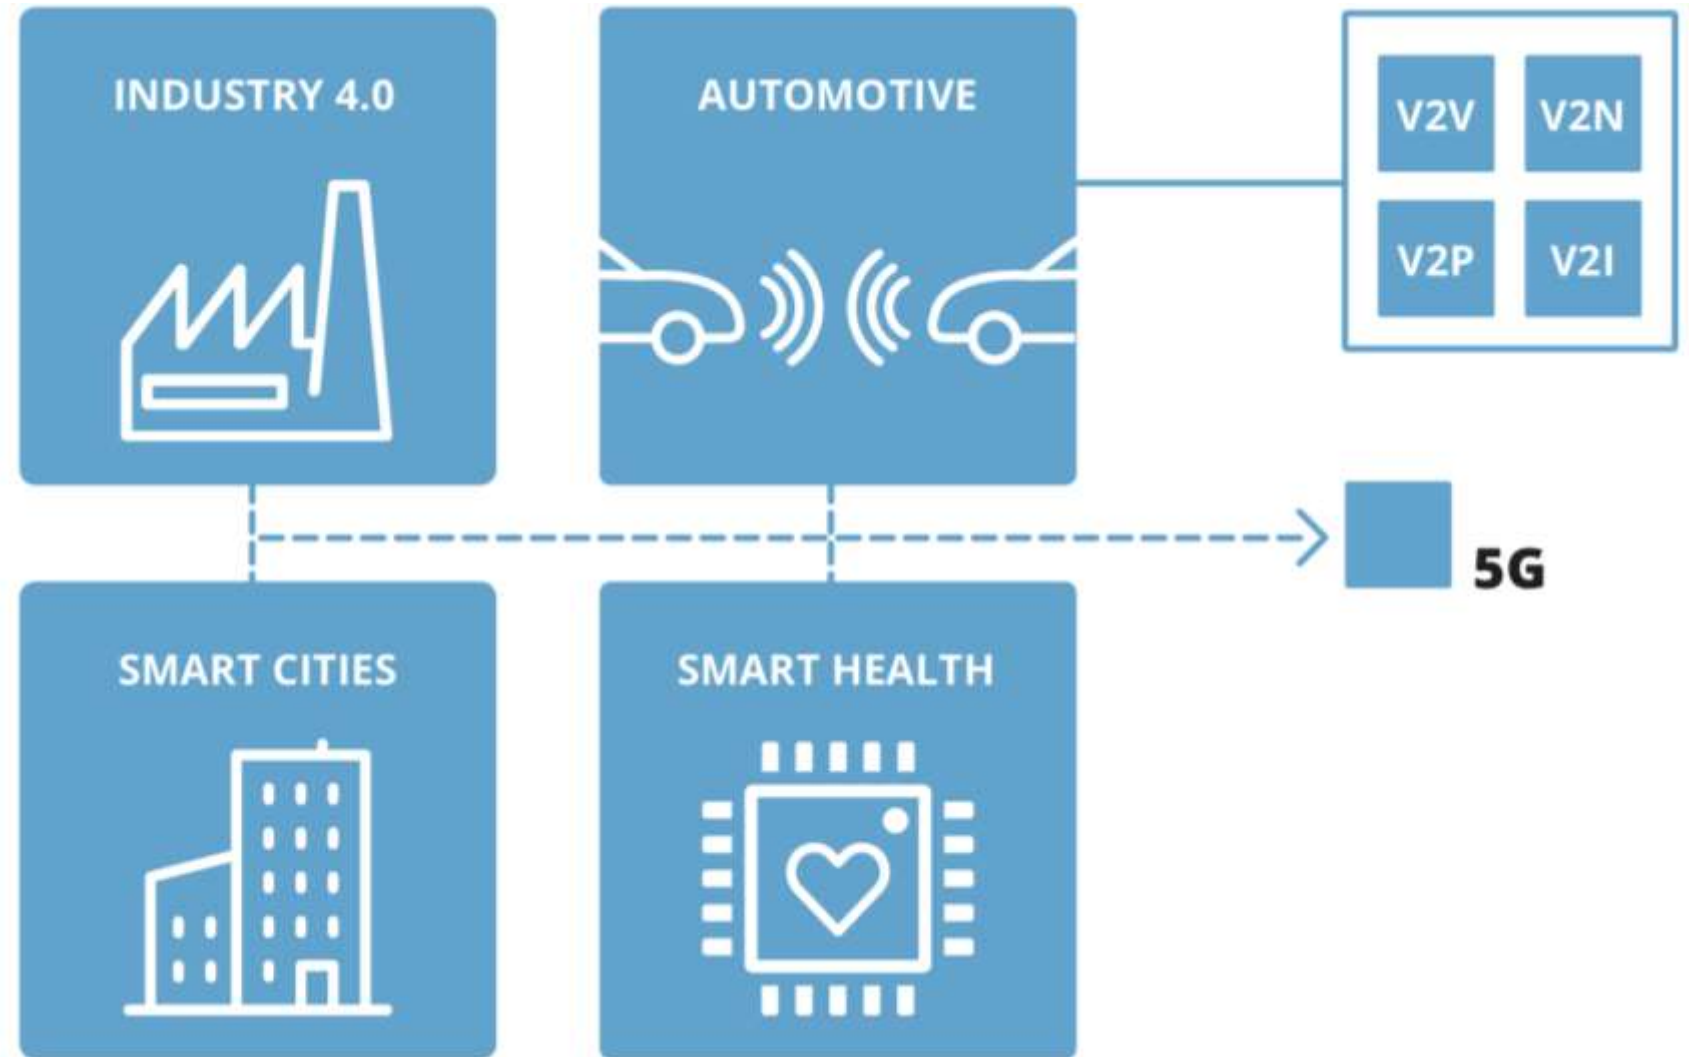

Higher Tx Rate	<ul style="list-style-type: none">• 50 messages per second
Lower Latency	<ul style="list-style-type: none">• 20ms for low degree of automation• 10 ms for high degree of automation• 5ms Uu for remote driving
Larger payload	<ul style="list-style-type: none">• Up to 6500bytes for platooning, advanced driving
Higher data rate	<ul style="list-style-type: none">• 10Mbps @ 1000m / 700Mbps @ 500m / 1Gbps @ 50m
Higher reliability	<ul style="list-style-type: none">• 90 – 95% for low degree of automation of safety applications• 99.99 – 99.999% for high degree of automation of safety applications
Longer range	<ul style="list-style-type: none">• Up to 1000m

Strategic views on 5G

5G for Major Industry Verticals

C-V2X and its evolution to 5G V2X will foster synergies between the automotive industry and other verticals which are moving to 5G

Expanding 5GAA's strategy

Thank you!
