Trust and Identity for Humans and Agentic AI

ITU Focus Group

**Sponsorship brochure for inaugural meeting
Paris, France, 30 November – 1 December 2026**

ITU launches global standards initiative to build trust in AI behaviour and identity

ITU's new **Focus Group on Trust and Identity for Humans and Agentic AI (FG-TIDA)** is bringing stakeholders together to develop frameworks that enable people and autonomous AI agents to interact safely, securely and with confidence across digital systems.

As AI rapidly evolves from assistive tools into increasingly autonomous agents capable of acting on behalf of people and organizations, trusted digital identity, accountability and trustworthy behaviour throughout the AI agent lifecycle are becoming increasingly important.

The Focus Group provides an open platform to explore these challenges and help shape approaches that can support a trusted agentic AI ecosystem.

We invite stakeholders from industry, government, academia, standards organizations and civil society to join the inaugural meeting of the Focus Group, share their expertise and contribute to this important work.

FG-TIDA objectives

As AI agents begin to negotiate, transact, and act autonomously on our behalf, the world lacks **common international foundations** to establish who these agents are, when they can be trusted, and how humans remain in control: FG-TIDA was created to build that foundation before agentic AI becomes ubiquitous

Our objective is to define architectural models and interoperability frameworks that establish trust in agentic AI.

As part of the United Nations, we bring together an inclusive, global community of Member States, academia, and industry to build this foundation together.

Objectives for inaugural meeting

Paris, France, 30 Nov – 1 December 2026

- 1. Formally announce the Focus Group's structure and leadership**
- 2. Publish an initial definition of deliverables on GitHub**
- 3. Advance the technical work during the in-person meeting**

Sponsorship options
Inaugural meeting of FG-TIDA
Paris, France
30 November – 1 December 2026
