

# Verification Report **Karmøy, Norway** September 2020

with the support of:

Oiganization for International Economic Relations et.1947

# **Verification Report**

Karmøy, Norway

#### Foreword

This publication has been developed by ITU within the framework of the United for Smart Sustainable Cities (U4SSC) initiative. It provides an overview of the reporting and implementation of key performance indicators (KPIs) for smart sustainable cities (SSC) in the City of Karmøy, Norway. This set of KPIs for SSC was developed to establish the criteria to evaluate ICTs' contributions in making cities smarter and more sustainable, and to provide cities with the means for self-assessments.

Sustainable

#### Disclaimer

This report has been written by John Smiciklas.

The views expressed in this publication are those of the authors and do not necessarily reflect the views of the contributing organizations.

Any references made to specific countries, companies, products, initiatives, policies, framework or guidelines do not in any way imply that they are endorsed or recommended by ITU, the authors, or any other organization that the authors are affiliated with, in preference to others of similar nature that are not mentioned.

This publication is intended for informational purposes only. The results and interim findings presented are a work in progress, as the KPIs (Recommendation ITU-T Y.4903/L.1603) implemented in Karmøy during the first phase of the project are being refined to improve the applicability of these KPIs to all cities. The revision of the KPIs may alter their scope and definition as well as the required data-collection process.

Smart Sustainable Cities

United

# 1. Introduction and Verification Background

This report contains the verification results for the KPI submission by the city of Karmøy to the requirements of the United for Smart Sustainable Cities (U4SSC) Key Performance Indicators (KPIs) as described within the 'Collection Methodology for Key Performance Indicators for Smart Sustainable Cities'.

Sustainable

John Smiciklas, who is certified as a U4SSC Key Performance Indicators for Smart Sustainable Cities Verifier, completed the verification in March 2020.

The verification assessment activities included:

- collecting and reviewing KPI data;
- interviewing city stakeholders;
- verifying that the data submitted are in conformance with the requirements of the Collection Methodology for Key Performance Indicators for Smart Sustainable Cities; and
- preparing the Verification Report.

The verification was conducted using the information made available by the city and the information presented during follow-up activities. It was planned and performed in order to obtain limited assurance with respect to the information examined.

There were no limitations that impacted the completion of this verification.

# 2. KPI Reporting and Verification Summary

United

Smart Sustainable Cities

	Total	Reported	Verified	% KPIs Verified		
Economy						
Core KPIs	23	23	23	100 %		
Advanced KPIs	22	20	20	91 %		
Environment	1	I	I	1		
Core KPIs	12	11	11	92 %		
Advanced KPIs	5	5	5	100 %		
Society & Culture	1	I	I	1		
Core KPIs	19	19	19	100 %		
Advanced KPIs	10	9	9	90 %		
Overall	1	I	I	1		
Core KPIs	54	53	53	98 %		
Advanced KPIs	37	34	34	92 %		
Total	91	87	87	96 %		

# 3. KPI Data Points Reporting and Verification Summary

Certain KPIs are composed of more than one data point.

Below is a summary of the verification results of those data points.

	Total	Reported	Verified	% Data Points Verified	
Economy					
Core Data Points	24	24	24	100 %	
Advanced Data Points	31	29	29	94 %	
Environment					
Core Data Points	23	18	18	78 %	
Advanced Data Points	5	5	5	100 %	
Society & Culture					
Core Data Points	19	19	19	100 %	
Advanced Data Points	10	9	9	90 %	
Overall	Overall				
Core Data Points	66	61	61	92 %	
Advanced Data Points	46	43	43	93 %	
Total	112	104	104	93 %	

United

Smart Sustainable Cities

Data Reported - No Targets Yet Available

Note: Performance Benchmark Targets apply to all sections of the graphic. Starting from the centre: Dimensions, Categories and KPIs

# 5. Benchmarks and Scoring Methodology

As part of the U4SSC KPIs project, benchmarks were developed for most KPIs in order to develop a reporting framework with which to demonstrate to cities how their performance could be reported.

Sustainable Cities

The benchmarks were set based on several factors:

- fully meeting the aligned SDG(s);
- performance compared with other international and transnational targets (e.g. OECD, European Commission);
- performance against a UN agency's goals (e.g. International Telecommunication Union);
- evaluation of city performance using UN and other international statistical data; and
- performance measured versus leading city performance globally.

Performance to benchmarks were then scored in four ranges for every KPI and data point reported:

- 0-33 % of target 1 pt;
- 33 66 % of target 2 pts;
- 66 95 % of target 3 pts; and
- 95+ % of target 4 pts.

The scores for each reported KPI and data point were added to give a percentage score for categories, sub-dimensions and dimensions and were reported based on the above target scores. KPIs or data points that are not reported or have no benchmarks yet defined were excluded.

Example: Education 4 KPIs

• If all 4 are reported and the scores are 1 pt, 3 pts, 4 pts and 1 pt;

Total score 9 pts out of 16 = 56.25 % reported as 33 – 66 % of target.

• If only 3 are reported and the scores are 3 pts, 4 pts and 2 pts;

Total score 9 pts out of 12 = 75 % reported as 66 - 95 % of target.

Targets and scoring are meant to provide additional context to KPI data and should be used in context with city goals and comparisons with other similar cities to determine future actions.

# 6. Verification Results

This section contains the data and results of the verification for Karmøy's reporting for each of the U4SSC KPIs within the three dimensions:

- Economy
- Environment
- Society and Culture

and the twenty-two categories of the dimensions:

- ICT Infrastructure
- Water and Sanitation
- Drainage
- Electricity Supply
- Transport
- Public Sector
- Innovation
- Employment
- Waste
- Buildings
- Urban Planning

- Air Quality
- Environmental Quality
- Public Space and Nature
- Energy
- Education
- Health
- Culture
- Housing
- Social Inclusion
- Safety
- Food Security

#### Note: The following categories are reported under the Economy and the Environment dimensions.

- Water and Sanitation
- Waste

#### Note: For the results on following pages.

- Core KPIs are highlighted in bold.
- Advanced KPIs are in italics.

#### **Dimension: Economy**

CATEGORY	KPI / Data Point	Results	Benchmark
	Household Internet Access	97.00 %

WASTE	Solid Waste: Recycled	24.51 %	
	Solid Waste: Other	0.00 %	
	EMF Exposure	100.00 %	$\bigcirc \bigcirc $
ENVIRONMENTAL QUALITY	Noise Exposure	14.47 %	
	Green Areas	44 591 ha / 100 000 inhabitants	99 99 99 99
BB	Green Area Accessibility	97.27 %	99 99 99 99
	Protected Natural Areas	0.73 %	99 99 99 99
PUBLIC SPACE AND NATURE	Recreational Facilities	136 012 m² / 100 000 inhabitants	<b>69 69 69 69</b>

United

#### **Dimension: Environment (continued)**

CATEGORY	KPI / Data Point	Results	Benchmark
	Renewable Energy Consumption	100.00 %	
	Electricity Consumption <sup>2</sup>	98 157 kWh / yr. / capita	
	Residential Thermal Energy Consumption	0.29 GJ / yr. / capita	
ENERGY	Public Building Energy Consumption	155.71 ekWh / m² / yr.	

Smart Sustainable Cities

United

<sup>&</sup>lt;sup>2</sup> Electricity consumption is high due to the presence of an aluminum smelter in the municipality.

#### **Dimension: Society and Culture**

CATEGORY	KPI / Data Point	Results	Benchmark
	Student ICT Access	100.00 %	9999
	School Enrolment	99.23 %	9999
	Higher Education Degrees	18 550.32 / 100 000 inhabitants	
EDUCATION	Adult Literacy	90.12 %	3333
	Electronic Health Records	99.90 %	
	Life Expectancy	81.75 Years	
	Maternal Mortality Rate	0.00 / 100 000 live births	S & B & B
	Physicians	163.42 / 100 000 inhabitants	
HEALTH	In-Patient Hospital Beds	1 105.29 / 100 000 inhabitants	
	Health Insurance / Public Health Coverage	100.00 %	
	Cultural Expenditure <sup>3</sup>	0.31 %	
CULTURE	Cultural Infrastructure	78.27 / 100 000 inhabitants	N/A
	Informal Settlements	0.08 %	
HOUSING	Housing Expenditure	13.58 %	
HOUSING			

United

<sup>&</sup>lt;sup>3</sup> In Norway, cultural expenditure is mainly a function of higher levels of government, so that the municipal contribution does not capture the full expenditure.

## **Dimension: Society and Culture (continued)**

United

CATEGORY	KPI / Data Point	Results	Benchmark
SOCIAL INCLUSION	Gender Income Equity	0.60 Ratio Female : Male	
	Gini Coefficient	0.22	<u>82</u> 82 82 82
	Poverty Rate	4.20 %	
	Voter Participation	61.08 %	<b>12 13 13 13 13 13 13 13 13</b>
	Childcare Availability	72.64 %	<b>12 13 13 13 13 13 13 13 13</b>
SAFETY	Natural Disaster- Related Deaths	0.00 / 100 000 inhabitants	
	Disaster-Related Economic Losses	0.01 % / City GDP	
	Resilience Plans⁴	No	
	Population Living in Disaster-Prone Areas	2.22 %	
	Emergency Service Response Time	6.00 Minutes	
	Police Service	68.78 FTE / 100 000 inhabitants	
	Fire Service	26.09 FTE / 100 000 inhabitants	
	Violent Crime Rate	730.53 / 100 000 inhabitants	
	Traffic Fatalities	0.00 / 100 000 inhabitants	

<sup>&</sup>lt;sup>4</sup> Municipalities in Norway will have resilience planning in place; however, they do not yet use the Sendai framework.

## **Dimension: Society and Culture (continued)**

# 7. KPIs Not Reported

KPI Number	Description
EC: ICT: ES: 3A	Demand Response Penetration
	Partial - Following not reported:
EC: I: T: 4A	Para Transport:
	Karmøy is able to collect the number of people with access to a para transport card (TT Card). Reported: 2.05 %.
	The TT Card is usually used for discounted taxi fares as there is no dedicated para transport system. However, access is not the same as usage.
EN: EN: AQ: 1C	Partial - Following not reported:
	Air Pollution- PM 2.5
	Air Pollution- PM 10
	Air Pollution- NO <sub>2</sub>
	Air Pollution- SO <sub>2</sub>
	Air Pollution- O <sub>3</sub>

United

Smart Sustainable Cities

# 8. KPIs Not Verified

All reported KPIs were verified.

# 9. Next Steps

Karmøy is encouraged to focus on KPIs that have been reported as falling within the benchmarks of 0-33 % and 33-66 % of targets, determine which of these KPIs indicates critical issues for the city and develop plans for improvement.

Karmøy is encouraged to review the KPIs for which no data were reported, and determine plans for future data collection and reporting.

Karmøy is encouraged to continue ongoing data collection to determine trends in performance against benchmarks over time.

Karmøy is encouraged to stay engaged within the U4SSC process and continue to provide feedback on KPIs and benchmarks.

# **10. Using KPIs for SSC to Reach the SDGs**

The **United for Smart Sustainable Cities (U4SSC**) initiative has developed the Key Performance Indicators (KPIs) for Smart Sustainable Cities (SSC) to support cities worldwide in evaluating the role and contribution of ICTs in smart sustainable cities, and to provide cities with the tools for self-assessments in order to achieve the United Nations Sustainable Development Goals (SDGs).

Sustainable Cities

#### United for Smart Sustainable Cities (U4SSC)

**U4SSC** is a UN initiative coordinated by the International Telecommunication Union (ITU), UN-Habitat and UNECE, and supported by 14 other UN Agencies and Programmes, including CBD, ECLAC, FAO, UNESCO, UNDP, UNECA, UN-Women, UNEP, UNEP-FI, UNFCCC, UNIDO, UNU EGOV, UNOP and WMO.

U4SSC is the global platform to advocate for public policies to encourage the use of ICTs to facilitate and ease the transition to smart sustainable cities. Find out more...

These indicators are developed based on an international standard – Recommendation ITU-T Y.4903/L.1603 'Key performance indicators for smart sustainable cities to assess the achievement of sustainable development goals'.

These indicators have been developed to provide cities with a consistent and standardized method to collect the necessary data to measure performance and progress with regard to:

- achieving the Sustainable Development Goals (SDGs);
- becoming a smarter city; and
- becoming a more sustainable city.

The U4SSC KPIs consist of 91 indicators. Each indicator forms part of a holistic view of a city's performance in three dimensions: **Economy**, **Environment** and **Society and Culture**. Each of these dimensions provides a separate view of progress, and when reported together they provide a holistic view of a smart sustainable city.

By providing a common set of metrics to benchmark a city's performance, the indicators will also enable cities to compare their performance with those of other cities, allowing for the dissemination of best practices and setting the standards for progression in meeting the Sustainable Development Goals (SDGs) at the city level.

Smart Sustainable Cities

The list of all the U4SSC KPIs for SSC, along with its collection methodology, are contained in:

United

• the Flipbook on the 'Collection Methodology for Key Performance Indicators for Smart Sustainable Cities'.

Over 100 cities worldwide are already implementing these KPIs. All cities are invited to participate in this project and employ these KPIs.

To find out more, contact the U4SSC Secretariat at: u4ssc@itu.int.
