

United **Smart Sustainable Cities**

Brief Overview Guiding Principles for AI in Cities

Dr. Okan Geray
U4SSC Leader

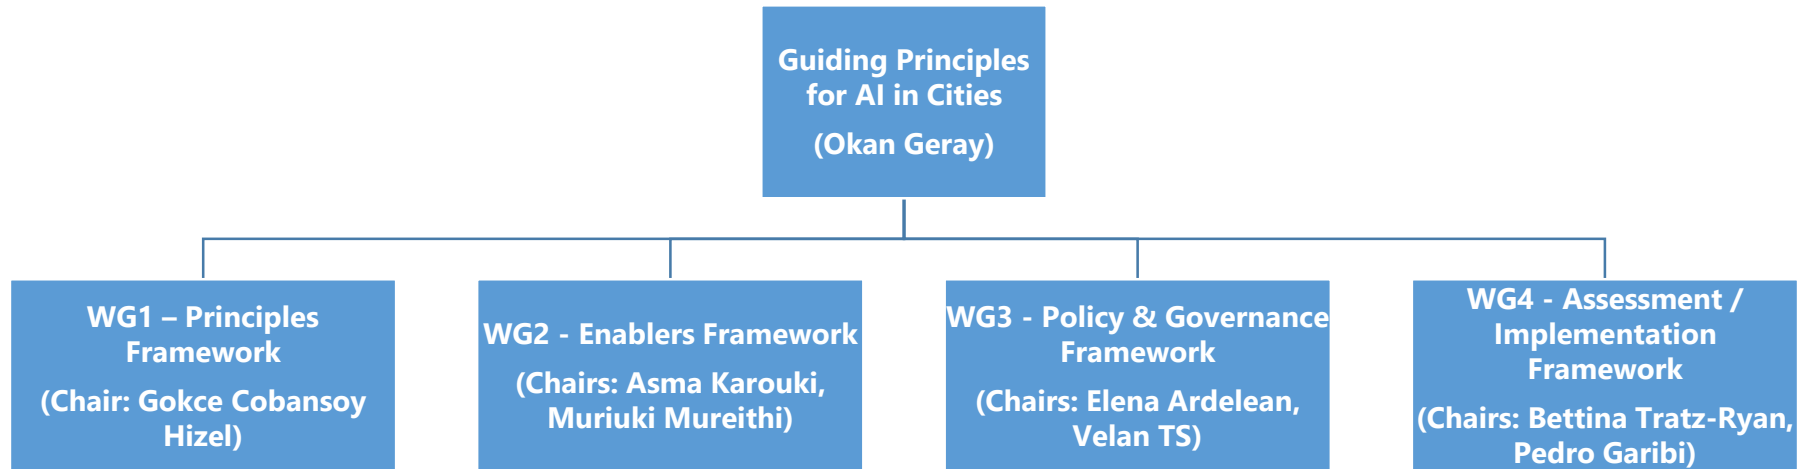

Scope & Work

- This thematic group intends to Formulate a Principles-based Framework for implementing AI in Cities
 - This thematic group is NOT ABOUT IDENTIFYING A COMPREHENSIVE LIST OF AI SOLUTIONS in SSCs (Smart Sustainable Cities); It is rather ABOUT PROVIDING GUIDANCE IN IMPLEMENTING AI FOR SSCs.
 - The Framework intends to produce principles, enablers, governance and a simple implementation methodology for AI principles in SSCs
 - The thematic group also aims to develop case studies across the globe regarding AI principles implementation
-

Working Group (WG) Approach

- A total of 23 E-Meetings have been held since the kick-off in April 2020

Next Steps

- **Create a single unified draft document from WG deliverables (planned for Mid-November)**
- **Consult on the unified draft document with:**
 - **Group members**
 - **Potentially a short list of cities**
- **Develop case studies on AI principles implementation in cities (planned for Q1'2021)**
- **Finalize the unified guidance document and the case studies (planned for mid-Q2'2021)**

Note: The deliverables will also be reviewed by U4SSC prior to publication

THANK YOU
