

Digital Product Passport (DPP)

Ilias IAKOVIDIS

Advisor, Digital aspect of Green Transition,

DG CONNECT, European Commission

Digital Product Passport

Ecodesign Regulation - general

The Ecodesign for Sustainable Products Regulation (ESPR)

- in force since 18 July 2024
- enables the setting of 'eco design requirements' – for almost all categories of physical goods (with some exceptions, such as food and feed)
- sustainability and eco-design aspects
- Strong focus on product information: DPP and information requirements

Digital Product Passport

Ecodesign Regulation- DPP

- DPP: digital identity card for products, components and materials.
- stores information such as products' technical performance, repairing information, recycling capabilities and lifecycle environmental impacts.
- Main aspects
 - be user friendly: access should be free and easy
 - the data shall be accurate, complete and up to date
 - differentiated access to the data, depending on the type of data and the type of stakeholder
 - Any kind of information can be stored in the DPP, not only the obligatory data
 - DPP should be available for the lifetime of the product
- First product category for which the DPP becomes mandatory in February 2027: certain big batteries in February 2027.

Digital Product Passport

How? And What?

(the “**HOW**”. To be developed horizontally for all product groups and legislations)

Digital Product Passport

(the “**WHAT**”. To be developed through product-group specific dedicated legislation)

- The DPP registry
- The DPP web portal
- All standards and protocols related to IT architecture:
 1. Unique identifiers
 2. Data carriers and links between physical product and digital representation
 3. Access rights management, information security, and business confidentiality
 4. Interoperability (technical, semantic, organisation)
 5. Data processing , data exchange protocols, and data formats
 6. Data storage, archiving, and data persistence
 7. Data authentication, reliability, integrity
 8. APIs for the DPP lifecycle management and searchability

Information to be included in the DPP will be **product-group specific** and identified in delegated act process.

It may include information/data on one or more of the following areas:

- Technical performance
- Environmental sustainability performance
- Circularity aspects (durability, repairability, etc)
- Legal compliance
- Product-related information (e.g., manuals, other labels)
