### **3. Approval of revised Question 1/9 and proposal for deletion Question 13/9**

The meeting approved the merge Q1/9 and Q13/9 into Q1/9. This merger was motivated by the recent increase of technology relationship between advanced video application (Q1/9) and large screen display imagery (Q13/9). This firm relationship of these study areas were identified at the previous SG 9 meeting.

The SG 9 meeting approved the revised Q1/9 with support of more than four Member States and/or Sector Members. (China, Japan, ZTE, KDDI, Cisco). The revised Q1/9 can be found in TD542R1.

Consequently, the meeting proposed Q13/9 for deletion.

### **4. Other**

At the management team meeting, the team started a discussion about the restructuring of SG 9 for the next study period. The team continues the discussion by correspondence and planned to provide its view at the next SG 9 November meeting.
