## 3. Encouragement of discussion on the direction of Study Group 11 for the next study period

In order to prepare for WTSA 2012, it was agreed to review the current activities of SG11 and to determine the future structure and work items. This review will be coordinated by Q1/11. The first preparatory meeting is scheduled during the Interim Rapporteurs meeting in May 2011 followed by another session during the SG11 meeting in October 2011.

The objective of the review is to:

- For each question determine what has been completed and what still needs to be done based on the current question scope.
- Identify new work for SG11 (e.g. taking into consideration current Focus Group Activities such as Smart Grid, Cloud Computing etc also, SG13 proposal for the evolution of NGN towards SUN (Smart Ubiquitous Networks))
- Review current question structure and recommend any new questions plus which of the existing questions should (a) continue into the next study period or (b) merge or (c) close.

Contributions are requested.
