

INATBA

International Association for
Trusted Blockchain Applications

Episode #2 INTEROPERABILITY

ITU-T 2nd September 2020

About INATBA

Officially launched on 3rd April 2019, by commissioner Mariya Gabriel, the International Association for Trusted Blockchain Applications (INATBA) is a multi-stakeholder organisation based in Brussels. We bring together suppliers and users of Distributed Ledger Technologies with representatives of governmental organisations and standard setting bodies from all over the world.

INATBA is uniquely independent. We are not for profit, protocol agnostic and free from undue commercial influence. INATBA is 'the' interlocutor for Governments providing a truly independent platform to engage in outcome based public private discussions on DLT and blockchain technologies.

INATBA Objectives

- Develop transparent and inclusive governance and cooperation models for blockchain and DLT
- Inform policy and regulatory development through close dialogues with policy-makers and regulators
- Promote convergence of standards & policies through cooperation, accelerating deployment for benefit of society and economies

General Assembly

comprising of about 170 members, in 5 membership categories

Large Enterprise

Medium Enterprise

Small Enterprise

Micro Enterprise

Non-Profit

Each membership Category elected its two board members:

Board of Directors

Carlos Kuchkovsky
Nadia Filali

Paco Garcia
Henry Rõigas

Jacob Bangsgaard
Kai Wagner

Maike Gericke
Sven Hildebrandt

Julie Maupin
Nina Siedler

in 2021

Governance

Working Group

Mission & Activities

Governance Working Group

Why? Support INATBA at *promoting a transparent and inclusive model of governance for blockchain and other distributed ledger technology infrastructures and applications that reflects the shared interests of stakeholders from industry, start-ups and SMEs, civil society organisations and public authorities.*

What are we governing?

- Of the blockchain (off-chain)
- By the blockchain (on-chain)
- + each layer, application on a blockchain, ...

- Corporate Governance
- IT / Data Governance
- Open Source Governance

Why Standards? Role in not only supporting compliance, but also the creation, of laws and regulations is important, and is a pre-requisite for scaling sustainable DLT infrastructure by providing frameworks for interoperability and security, and quality assurance which support the road to maturity

Governance Working Group

How? 3 **SMART objectives** around which it will carry out its annual and post-annual work.

1. Identifying and establishing **best practices, guidance** and **toolkits**
2. Defining a **taxonomy** for governance structures of blockchains
3. Disseminating, **educating** and **sharing** blockchain governance research and thought pieces

KPIs and Targeted Outputs (both public and private) are established to assess the achievement of the Objectives.

Who? 2 elected chairs **Monique Bachner** and **Marianna Belotti** supported by INATBA organizational team.

Working Group members dividing themselves in 5 subgroups focusing on different aspects of governance:

- sub-group 1: A Code of conduct for blockchain ecosystems.
- sub-group 2: Best Practices, Guidance & Toolkit.
- sub-group 3: Taxonomy.
- sub-group 4: Governance Research (in liaison with the INATBA AAB).
- sub-group 5: Governance Standards for global codes and best practices (in liaison with the INATBA Standards Committee).

Interoperability

Working Group

Mission & Activities

Interoperability Working Group

WE ARE 87 MEMBERS

MULTIDISCIPLINARY ENVIRONMENT

NEUTRAL AND INDEPENDENT

PUBLIC
PRIVATE
PARTNERSHIP

- BEST PRACTICES, GUIDANCE and TOOLKITS
- TAXONOMY and PRINCIPLES for INTEROPERABILITY
- EDUCATING AND SHARING
- OFF-CHAIN CONVERGENCE POINT

MOTIVATE THE POLICY MAKERS TO CONTRIBUTE
INVOLVEMENT GAB and AAB
ENTER INTO DIALOGUE FOR STANDARDS

TRANSACTIONING BEYOND BORDERS- BUILDING
GLOBAL BLOCKCHAIN INFRASTRUCTURE

TRANSCENDING BORDERS- ENABLING AND SUPPORTING
LARGE SCALE DLT INFRASTRUCTURE

INATBA's events on Governance and Interoperability

Joint roundtables on Governance, Interoperability and Standards

- **28 June:** *"Transacting Beyond Borders – Building a Global Blockchain Infrastructure"*
- **15 July 2020:** *"Transcending Borders – Enabling and Supporting Large Scale DLT infrastructure"*
- International Organisations
- Global speakers from all over the world:
 - EU (Spain, Denmark Belgium, Italy), USA
 - China, Australia, India, Latina America and Caribbean, Kenya, South Korea ...

⇒ joint position paper on governance and interoperability

- Trade-offs between blockchain features and current business
- Taxonomy
- Token-less

Standards Committee

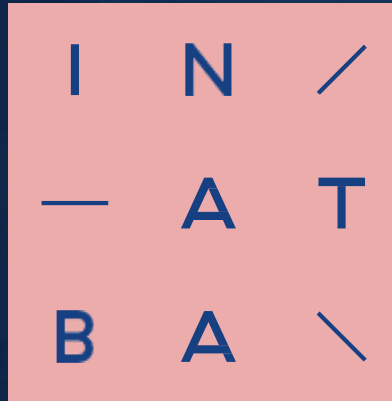

Mission & Activities

INATBA Objectives

NOT REINVENTING THE WHEEL

- PUSH AND PULL ON THE VARIOUS WGs ACROSS INATBA
- ACT AS AN INTERDISCIPLINARY VEHICLE WITH STANDARDS DEVELOPING BODIES.
- HELP CENTER FOR MEMBERS ON STANDARDS

Thanks for the attention
