The NetZero transition
“ *...is the largest commercial
opportunity of our age.* ”

- Mark Carney, Former Governor, Bank of England;
UN Special Envoy, Climate Action & Finance

" It is our choice. The actions we take this decade, will determine all of our future. "

- António Guterres, Secretary-General of the United Nations

Cities are the major contributor to climate change.

According to UN Habitat, cities consume 78% of the world's energy and produce more than 60% of greenhouse gas emissions.

Cities and Governments know they have a problem but do not know how to solve it.

"Climate more than Oil and Oil production"

Erna Solberg, Aftenposten

Et skjermdekket rundt rom viser frem scenarior for hvordan Stavanger by kan se ut i fremtiden da statsminister Erna Solberg besøkte Augmentcity i Ålshund.

Solberg: Klima mer enn olje og oljeproduksjon

FAKTA

CO₂-avgift

Et klimapolitisk virkemiddel for å redusere utslipp av drivhusgassen CO₂.

Imotsetning til klimavoter, hvor prisen bestemmes av markedet, er CO₂-avgifter mer

direkté lavtrent. Denne ordningen deler ut inntektene fra de ulike avgiftene som et direktebeløp på konto. Solberg mener dette ikke feil.

Vi har tenkt å komponere malottret for dem som faktisk får store utgifter. Utgiftene til folk avhenger jo av hvilken region deres, ikke av hvilken inntekt de tar. Så har vi mindre tilbak for å sette folk med lave inntekter.

- Men hvis det ikke skal bli dyrere for bilister, er ikke poenget med en økning i CO₂-avgiften borte?
