

**João Zanon (Brazil)**  
**Candidate for ITU-T Study Group 11 Vice-Chairman**

Mr. João Zanon has been participating on ITU-T Study Group 11 activities, where on the last study period was named Associated Rapporteur of Q8/11 (Guidelines for Implementations of Signalling, Protocols and for Addressing Counterfeit ICT Device) and Liaison Officer from ITU-T SG11 to Inter-American Telecommunication Commission (CITEL). Based on this positions, he actively contributed on the development of Q8/11 work, including the “Technical Report on Counterfeit ICT Devices” (Dec. 2015), the organization of two ITU workshops (2014 and 2016) on the combat of counterfeit, and helped on the exchange of information between SG11 and CITEL. He proposed and is the editor of two key work items under study on Q8/11 (Draft new Recommendation “Framework for Solutions to Combat Counterfeit ICT Devices”, and Guidelines on “Best Practice and Solutions for Combating Counterfeit ICT Devices”). Besides, he also participates on SG13, where he was editor and actively contributed in the development of ITU-T Recommendation Y.3035.

*Professional Experience:*

João Zanon received his B.Eng. degree in Telecommunication Engineering from the Federal University of Brasília (UNB) in 2006 and a Specialist degree in System Engineering from Brasil Superior Open School (ESAB) in 2010. He worked at Bank of Brazil from 2004-2012, developing projects related to Mainframes computing where he achieved the position of Senior System Programmer. In 2012, he joined the Brazilian telecommunication regulatory body - ANATEL and since that date works at the Regulatory Division, which is responsible for the development of regulatory policies in regards to telecommunications services in Brazil. Currently, he is one of the coordinators of the Regulatory team and lead key project at ANATEL, such as the national initiative on the combat of counterfeit and stolen ICT devices, transition to IPv6, Geolocation on emergency calls, lawful interception and other security related initiatives. He also focuses his work on other telecommunication regulation subjects, like quality of service measurement, MVNO, Mobile Payment, IoT, among others.

*Other activities related to International Standardization:*

Mr. Zanon also contributes on other international forums, such as REGULATE and CITEL Permanent Consultative Committee I – PCC.I (telecommunication/ICT policy, regulatory aspects, standardization, cybersecurity, international public policy issues relating to the Internet), acting as Brazil’s Head of Delegation at various meetings. At CITEL PCC.I, he is Co-Rapporteur of the Rapporteurship on fraud control, regulatory non-compliance practices in telecommunications and regional measures against the theft of mobile terminal devices, and Rapporteur of the Correspondence on the Combat of Counterfeit ICT, where he’s leading the discussion on the combat against counterfeit devices.

Mr. Zanon is fluent in Portuguese (mother tongue), English and Spanish.
