ITU-T Standards Related Experience

ITU-TSAG

2012 – now   Weiling XU has been attending TSAG meetings as the vice chairman and the rapporteur of Rapporteur Group on Working Method

2002 – 2012, Weiling XU had attended TSAG meetings as a delegate, alternative HoD, or HoD of the Chinese delegation. She had been actively taking part in the discussion of the important issues in TSAG, such as programs, working methods, financial matters and strategies for ITU-T activities. Supported by the Chinese Administration and together with other member delegates, she has tried her best effort to contribute to foster the development and keep the preeminent position of ITU-T in the fast changing ICT environment. She had also participated in the discussion and revision of A series recommendation.

Assembly, Conference and Plenipotentiary

As the delegate of the Chinese delegation, she also attended the Plenipotentiary in 2006 and 2010 and 2014, WTDC in 2006 and RA in 2007 respectively. She was responsible for the internal and external coordination of the Chinese delegation. She took the position of Chinese vice chairman in the editorial committee several times.

WTSA-04, WTSA-08 and WTSA-12

Since 2003, she has been the key member of the preparatory group in China for the preparation of WTSA. Under the leadership of the China MIIT, she has taken part in the internal selection of the Chinese experts to be the candidates for ITU-T study groups, formulating the restructuring strategy, establishing and rectifying the Questions and study items for the future study period. She was appointed as the Vice Chairman of the SCV in WTSA-08. She has been also very actively engaged in the regional preparatory activities. She was nominated by the MIIT as the Vice Chairman of TSAG

and appointed in WTSA-12. During the WTSA-12, she had chaired an adhoc on the revision of the Resolution 76. Currently she is the vice chair of the preparatory group for WTSA-16 of Asia-Pacific Telecommunity.

ITU-T standardization

She has participated in the activities of many standardization programs, such as harmonizing the common position of China and submitting the contributions on L.1000, PTN, DTMB, IoT, etc. She has been working in the ITU management team in China since 2003. She has organized many ITU study group and working group meetings and helped invited a lot of foreign ITU experts to China for technical cooperation, training and international seminars.
