Rationale

NEC is one of the major telecom vendors in Asia and provides various types of ICT solutions to network operators, service providers and enterprise customers. In recent years, NEC has promoted Carrier Cloud, Bigdata/M2M/IoT and SDN/NFV solutions for ICT industries. NEC is an active member of standardization bodies such as ITU-T, ETSI, 3GPP and Forums etc. NEC adopts ITU-T Recommendations and global standards in its product and solutions and has contributed to the development of standards, drawing upon NEC's understanding of advanced technologies.

Mr Kenyoshi is a senior standard expert of NEC Corporation and since April 2011 has been the Representative of the standardization of Telecom Carrier Business Unit of NEC Corporation in Europe. He has long experiences of developing software and system of telecom equipment. And he took a role of the project manager of the developing projects of the large scale commercial service and application of telecom system. He has rich expertise and knowledge of technologies and operation of telecom/ICT system and management skill as the project manager as well.

As a chairman of ITU-T SG11 Mr Kenyoshi would: conduct the discussion and decision making for the future strategy of ITU-T SG11; support the deployment of ITU-T SG11 and relevant Study Group Recommendations; promote the harmonization among ITU-T Study Groups and relevant SDOs; taking account of the needs of ITU-T member states; create values and attractiveness of ITU-T SG11.

Personal experience in NEC
