2013-2016.02	Project Leader, IEC TC 47
2016.3-present	Convenor, JAG Group on 3D Printing and Scanning in JTC 1

SUMMARY

Dr. Byoung Nam Lee is an expert in telecommunications standardization strategy and now acting as a special fellow and principal researcher of ETRI.

For the international standardization, he has participated in the ITU-T activity since Feb 2003 and has submitted several contributions including the proposal of restructuring ITU-T SG, Technology Watch and SMS issues. During the past study period(2004-2007), he led the first Technology Watch activity in ITU-T as a Convenor of RFID Correspondence Group (later Network Aspect of Identification

Correspondence Group) in TSAG and served as a Vice-Chairman of TAS Group (Tariff Group for Asia and Oceania) in ITU-T.

During the last study period(2008-2012), he has served as a Chairman of the SG3 RG-AO (Regional Group for Asia and Oceania) and a rapporteur of SG3 on SMS.

During the current study period, he has served as a Chairman of the SG3 RG-AO and a Vice-Chairman of SG 3.

For the regional standardization, he has participated in ASTAP (APT Standardization Program) forum since July 2003. He has served as an Advisory Board Member, a Chairman of Policy, Regulatory and Strategies Working Group, a Rapporteur of Regulatory Liaison Group in ASTAP and a co-Rapporteur of Correspondence Group 2 for WTSA-04, WTSA-08 and WTSA-12 preparations in APT.

Also he participated in China-Japan-Korea Ministers' meeting as a facilitator in 2003 and 2004. He taught an economic analysis related courses in Asian Institute of Technology as a visiting faculty from 1995 to 1997.

Considering his experience and leadership in the standardization activity and international activity, he fully deserves to be the Vice-Chairman of Study Group 3 in the next study period.
