19 June 2015

Dear Mr Houlin ZHAO,

Inmarsat has previously written to the ITU as the Depository of the GMPCS-MoU Arrangements ("the Arrangements" hereinafter) to notify its new BGAN system as well as several new terminals. At that occasion it was mentioned that further terminals were under development for which relevant information compliant with the procedure of item 8 of the GMPCS-MoU Arrangements would be notified as soon as Inmarsat had authorised these terminals to be connected to the system.

In that context, I respectfully notify that Inmarsat has authorised the following terminal for connection to our BGAN network:

EXPLORER 510, TT-3711A

The terminal is manufactured by **Thrane & Thrane A/S trading as Cobham SATCOM (T&T), Lundtoftegaardsvej 93D, DK-2800 Kgs. Lyngby, Denmark.**

The manufacturer will notify you of their implementation of their GMPCS-MoU Arrangements in order to demonstrate that the terminal meets the relevant essential requirements in the Arrangements and that the necessary measures have been taken to avoid harmful interference. The terminal manufacturer will also ensure that a relevant Competent Authority sends the information needed to satisfy the marking conditions of the Arrangement.

Inmarsat respectfully requests that the information contained in this letter be made available on the ITU website. Inmarsat would like to thank you again for your support.

Should you have any questions or need further information, please do not hesitate to contact me,

Yours Sincerely,

p.p.

Francesco Toschi
Head of Market Access
Inmarsat Global Ltd.
