ITU-D Study Group 2

ICT applications,
cybersecurity, emergency
telecommunications and
climate change adaptation

ITU-D Study Groups are responsible for developing Reports, Guidelines, and Recommendations based on input received from the Membership and facilitate the implementation of telecommunication/ICT policies, strategies, projects and initiatives for all Members.

Together with the other ITU Sectors, ITU-D Study Group 2 also considers the implementation of telecommunications/ICTs, taking into account the results of the studies carried out by ITU-T and ITU-R.

Global Scope

- ITU-D Study Groups are responsible for developing Reports, Guidelines, and Recommendations based on input received from the Membership and facilitate the implementation of telecommunication/ICT policies, strategies, projects and initiatives for all Members.
- ITU-D Study Groups focus specifically on those issues which are of priority to developing countries to support them in achieving their development goals.
- Specifically, **ITU-D Study Group 2** focuses on matters related to the provision of services and applications supported by telecommunications/ICTs, building confidence and security in the use of ICTs, the use of telecommunications/ICTs in mitigating the impact of climate change on developing countries, human exposure to electromagnetic fields, and safe disposal of electronic waste.
- Together with the other ITU Sectors, ITU-D Study Group 2 also considers the implementation of telecommunications/ICTs, taking into account the results of the studies carried out by ITU-T and ITU-R.

Connect With Your Peers

- ITU-D Study Groups provide an opportunity for the Membership to share experiences, present ideas, exchange views, and achieve consensus on **appropriate strategies to address telecommunication/ICT priorities**.
- Sharing on topics of common interest is carried out through face-to-face meetings, online collaborative sites, case studies, and remote participation in an atmosphere that encourages **open debate** and **exchange of information** and for receiving **input from experts** on the topics under study.
- The information gathered and analysed serves to strengthen the shared knowledge base of the Membership. The Study Groups receive inputs through surveys, contributions and case studies which are then made available for easy access by the Membership using content management and web publication tools.
