TITLE: Provide short title for a written contribution. Please indicate the topic that you cover in your written contribution - select one of the topics below. Please submit a separate contribution for each topic.

Setting up of ITU Students Chapter at International Universities

Topics:

Creation of a new:

- 1) ITU Journal/Magazine;
- 2) an Advisory Board of Academia to the Secretary-General; and,
- 3) a platform/consultation mechanism to strengthen cooperation between ITU and Academia.

Summary and key messages:

3. Creating a platform to strengthen cooperation between ITU and Academia.

Proposal for setting up of a Student Chapter At amity University, India in collaboration of Amity International Telecom Forum (AITF) for awareness building and raising the profile of ITU among the budding engineers and "Catching them Young"

Contribution:

This contribution is an idea to create a student chapter at various international academic institutions, like Amity University in India on the lines of IEEE, IET and IETE other international standardisation bodies. Such platforms will be run electronically by a designated focal point amongst the faculty members who are well versed and actively associated with ITU activities at national and international level. The initial cost of such Chapters will need to be borne by the hosting institution and membership amongst the willing students will be honorary type ie. payment-free.
