WSIS Forum beyond 2015

Mr Ban Ki-moon, UN SG
UNGA HLM, 15 Dec 2015

We will strengthen the WSIS Forum as a key platform for discussing the role of ICTs as a means of implementation of the SDGs and targets.

Beyond 2015, following the multistakeholder approach, the WSIS Forum, will build upon the outcomes of the WSIS+10 Review and the 2030 Agenda for Sustainable Development. In this regard the WSIS-SDG Matrix developed by UN WSIS Action line Facilitators will serve as the mechanism to map, analyse and coordinate the implementation of ICTs as enablers and accelerators of the SDGs.

Mr Houlin Zhao, ITU
Secretary-General

UNITED NATIONS SYSTEM
Chief Executives Board for Coordination

Chief Executives Board Joint Statement to the United Nations General Assembly on the Overall Review of the Implementation of World Summit on the Information Society Outcomes

We, the Chief Executives of organizations of the United Nations system, witnessing the momentum events taking place, with the adoption of the Sustainable Development Goals and the ongoing United Nations General Assembly Overall Review of the World Summit on the Information Society (WSIS), held in two phases in Geneva (2003) and Tunis (2005), reaffirm the important role of information and communications technologies (ICTs) as a critical enabler for advancing the globally agreed development goal, in particular in the context of the new development framework in resolution 70/1, entitled "Transforming our world: the 2030 Agenda for Sustainable Development", which acknowledges that "the spread of information and communications technology and global interconnectedness has great potential to accelerate human progress... and to develop knowledge societies" and contains targets on use of ICTs for the empowerment of women, for education and on access to ICTs for least developed countries (LDCs).

Though access to advanced technologies has grown at a fast pace since the celebration of WSIS, the impressive gains observed during the era of the Millennium Development Goals are still hampered by existing gaps in ICT access – between and within countries, between urban and rural settings, among men and women, and boys and girls. A major digital divide is still in place, with more people offline than online and particularly poor access in vulnerable developing nations, which include LDCs, landlocked developing countries (LLDCs) and small island developing states (SIDS). The WSIS vision remains valid and we therefore commit ourselves collectively to reinvigorate collaborative action to harness the power of new technologies in promoting sustainable development and making the goal of universal and affordable access to ICTs and knowledge a reality. This should include also a new focus on relevant content, skills, capacity building, and an enabling environment, including multilingualism, to empower the implementation of the sustainable development goals, as well as to further freedom of expression and to promote cultural diversity on the basis of human rights.

In the national development process, use of ICTs need to be systematically integrated into development plans. Renewed efforts should be made to ensure that the enabling ICT dimension is adequately reflected in United Nations Development Assistance Frameworks and equivalent documents as well as in poverty reduction strategies.

Cohesion across the United Nations system in the implementation of multiple goals and commitments is essential. In this regard, we reaffirm the role of United Nations Group on the Information Society (UNGIS)¹ as the inter-agency coordination mechanism for issues related to the implementation of the outcomes of the WSIS and call on UNCTAD to include in its strategic priority the alignment between WSIS implementation and the implementation of the Sustainable Development Goals.

We also recognize the WSIS Forum has evolved as an efficient mechanism for multi-stakeholder implementation of WSIS action lines and cross-cutting commitments on gender equality, information exchange, knowledge creation and the sharing of best practices. Beyond 2015, it can serve as a key forum for discussing the role of ICTs as a means of implementation of the Sustainable Development Goals and targets, with due regard to the global mechanism for follow-up and review of the implementation of the 2030 Agenda for Sustainable Development, as set out in General Assembly resolution A/70/L.

As Chief Executives of the United Nations system, we look forward to the successful outcomes of United Nations General Assembly's Overall Review of the Implementation of WSIS Outcomes and we pledge our collective support for their implementation.

- More than **135 Submissions** received from 4th of November till date
- The **Agenda and Program of the WSIS Forum 2016 are being designed** in collaboration with the multi-stakeholders on the official submissions received
- Highest number of submissions received from **civil society organizations** (30%) followed by **governments** (24%) and **private sector** (23%)
- Good distribution of submissions across the world.

FORMAT

Suggestions on the Format

- Inclusive and interactive **round table discussions**
- More “**reporting out**” of main points
- The **plenary/workshop combination** works well.
- **Audio/visual** and interactive formats,.
- **World cafe, hackathons**, lightning talks ,flashes, wiki etc.
- **Grassroots Comics**: a teaching learning tool.
- Sharing experience by **open debates**
- The **TED talks** are a good idea
- Consider a “**match-making market**” in which parties can discuss cooperation / partnerships in concrete projects
- Include innovative communication means during workshops such as **lightning talks**
- More time for **audience participation**
- Workshops in the form of **coding session/s** for WSIS delegates
- **Rooms structure** to allow break-up sessions for group work,
- **Less PPT** presentations and more dialogue
- **Shorter sessions** with fewer participants
- Ensuring sessions on **similar subjects are not run simultaneously**
- **Better connectivity** for remote speakers

Forum OUTCOMES

Suggestions on strengthening the Outcomes

- Each Annual Forum should continue producing a **consolidated document containing the outcomes**, as well as the meetings' agendas, workshops, ministerial roundtables, dialogue tables, etc. to provide a summary of the findings.
- **Result-focused approach** for each session and workshop should be applied: Each session should generate a concrete outcome for future reference.
- **WSIS Action Lines** should present a concise **annual progress report** consisting of emerging trends, statistics and supplemented by case studies if necessary, to be presented during the WSIS Action Line Facilitation Meetings and WSIS Action Line Facilitators Meeting, and forwarded to the UN follow ups of WSIS and SDG processes.
- **Annual progress review of WSIS process and its contribution to 2030 Agenda for Sustainable Development** should be prepared as an outcome of the WSIS Forum.
- Annual **report and sharing of examples of global best practices through the WSIS Stocktaking**
- Annual review by **Partnership on Measuring ICT for Development** might enrich monitoring of implementation of the WSIS outcomes
- Further collaboration and implementation of the **WSIS Action lines and SDGs Matrix**
