

City Snapshot **Kyebi, Ghana**

December 2022

Foreword

This publication has been developed by ITU within the framework of the United for Smart Sustainable Cities (U4SSC) initiative. It provides a visual overview on a city's performance to benchmark in the Key Performance Indicators for Smart Sustainable Cities and also includes city specific indicators . The U4SSC KPIs are based on Recommendation ITU-T Y.4903. The visual representation highlights a city's performance in each dimension and subdimension of the KPIs for SSC based on the inherited benchmark value of each indicator. This set of KPIs for SSC was developed to establish the criteria to evaluate ICTs' contributions in making cities smarter and more sustainable, and to provide cities with the means for self-assessments.

In addition to the U4SSC KPIs, there were twenty-six KPIs that were developed at the local level that have been included in the visualization to provide additional local context. For each local KPI, a benchmark value was developed and then these local KPIs were integrated into the relevant dimension, sub-dimension and category.
