

Overview of ITU Standardization Sector (ITU-T) Activities

Frederic Werner
Head, Strategic Engagement
Telecommunication Standardization Bureau

Standardization

- Developing **technical standards** for the interconnection and interoperability of digital technologies
- Bridging the **standardization gap** between developed and developing countries
- Fostering cooperation among national, regional and international **standards bodies**

ITU standardization: Digital transformation

Welcoming new communities

ITU-T family has been growing over the recent years.
Now it includes a variety of industries:

Automotive

Space

Fintech

IoT/M2M

Quantum

UAVs

OTTs

MVNOs/MVNEs

Smart cities

Utilities

Videogaming/
esports

LiFi

Blockchain

Metaverse

Examples of ITU-T members

Aside from its 194 Member States, ITU-T has a diverse global industry membership ranging from multinationals to start-ups

ITU-T Study Groups

SG2 - Operational aspects

SG3 - Economic & policy issues

SG5 - Environment, EMF & circular economy

SG11 - Protocols, testing & combating counterfeiting

SG12 - Performance, QoS & QoE

SG13 - Future networks

SG15 - Transport, access & home

SG17 - Security

SG20 - IoT, digital twins & smart cities

SG21 - Multimedia, content delivery & cable TV

Digital Currency Global Initiative

Quantum information technologies (QIT)

United 4 Smart Sustainable Cities

Digital Health

Metaverse

Collaborative initiatives

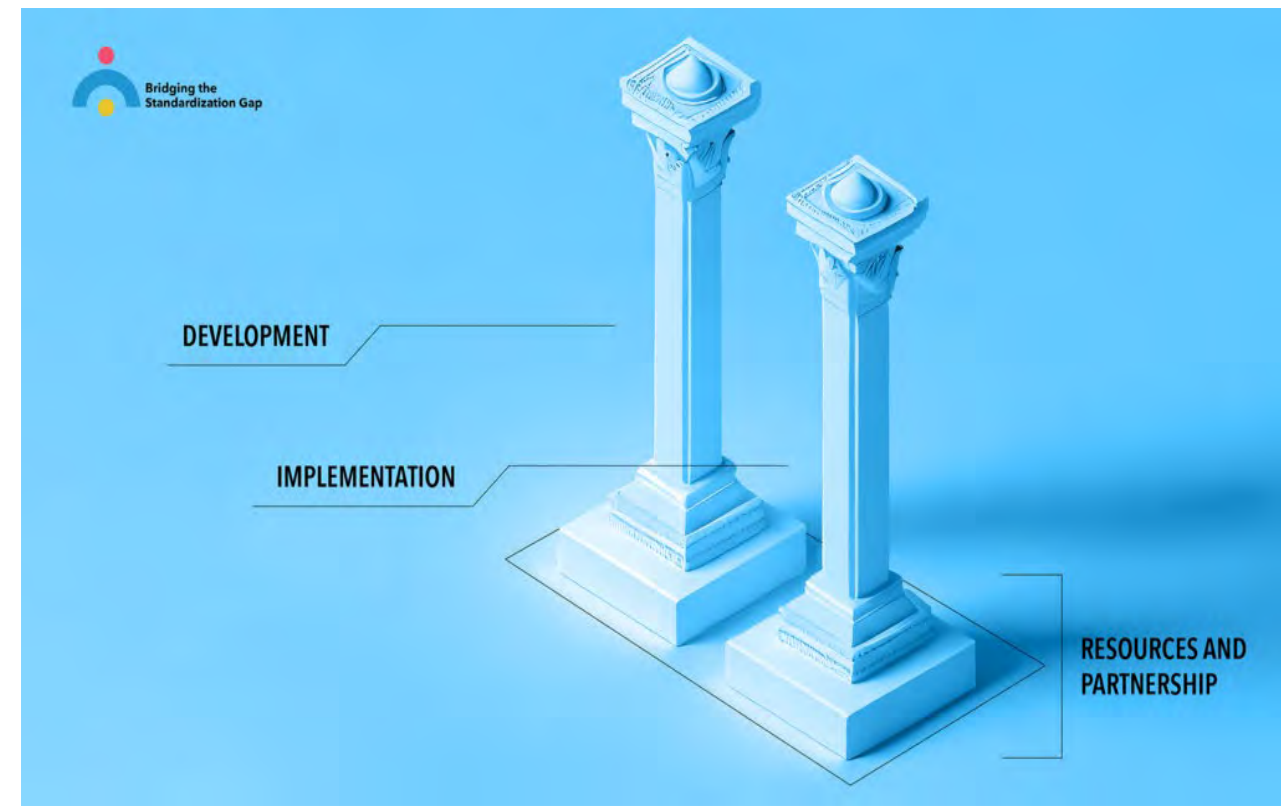

Bridging the Standardization Gap (BSG) stands as a pivotal element within the ITU's overarching mission to unite the global community through dynamically evolving technology. Among the five strategic objectives outlined by the ITU's standardization sector (ITU-T), BSG takes a central role.

The primary objective of the BSG program is to address the imbalances between member states, and developing countries inter alia, concerning their ability to access, participate, develop, and implement international standards set by ITU.

"ITU fosters collaboration to support innovation on a global scale. Our work to bridge the standardization gap is central to our mission and values."

Seizo Onoe – Director, TSB

NEW RESOLUTIONS

Responsible, safe, and inclusive AI,
including collaboration via the
AI for Good platform

Trusted, inclusive and interoperable
metaverse applications

Sustainable digital transformation across
multiple industries and technologies

Technical requirements for
digital public infrastructure

8

New resolutions

Continual improvement and evolution
to meet new policy objectives and
market demand

Preparing students and young professionals
as the next generation of
ITU standards experts

Communication technologies for vehicle-to-
everything, intelligent transport systems, and
automated driving

Caller-location information from mobile
phones to support emergency
communications
