Develop and establish systems to gather gender statistics.

ITU-D Sector Member Gender Focal Points
Building the Bridge

Among the goals of the Task Force on Gender Issues in the development of a strong working relationship with ITU Members, including Sector Members. In this relationship lies the mutually beneficial potential for individuals and institutions to voice their concerns, share their experiences and request assistance as pertains to gender issues in the telecommunication industry.

To facilitate this working relationship, TFGI proposes that institutions appoint a Gender Focal Point to TFGI. These focal points will be kept aware of the ongoing activities of TFGI such as annual meetings, workshops and publications. In addition to expanding their knowledge on these matters, they will be in a position to communicate this information, as well as other items of interest, to others in their organization.

For more information on how to designate a Gender Focal Point for your organization, please contact: patricia.faccin@itu.int

TFGI and its impact

In the four short years that TFGI has been in existence, it has managed to make a substantial and valuable impact on ITU and associated organizations.

TFGI impact:
TFGI activities have served as a catalyst to bring awareness of gender equality issues and to link them to sustainable development. A gender perspective has been integrated into activities of ITU, allowing for an equal focus on gender issues.

ITU impact:
TFGI activities have been integrated into activities of ITU, including in-service gender training in ITU.

TFGI membership:
Inclusion of TFGI in the UN inter-agency work on women and gender equality.

UM System:
Inclusion of ITU in the UN inter-agency work on women and gender equality.

TFGI Chairpersons:
Ms Iris Strake-Wijdenbosch (1998-1999)
The fourth meeting of TFGI which took place in September 2002, was attended by delegates from over 40 countries. Issues such as telemedicine, telecentres and the upcoming Gender Issues: A Catalyst for Women and ICTs, were discussed.

Mainstreaming gender in ITU-D programmes

Among the many results of the fourth meeting of the Task Force on Gender Issues was the adoption of a draft resolution on mainstreaming gender in ITU-D programmes. This resolution, which contains many important initiatives related to gender, is to be submitted to WTDA at its upcoming meeting in March 2003 in Istanbul. The key components of the resolution are as follows:

1. That ITU-D should convert the Task Force on Gender Issues to a permanent structure of ITU-D open to all Member States, Sector Members and other partners concerned;
2. That mainstreaming of gender in ITU as a whole must be institutionalized through the establishment of an ITU Gender Unit with full-time professional gender expertise;
3. That the above gender unit will provide the following:
   - A comprehensive gender management structure to ensure that efforts are made to mainstream gender into ITU’s strategic, operational and budgetary plans;
   - Gender analysis, statistics and advice on policy and regulatory issues within ITU Member States and Sector Members;
   - Monitoring and evaluation of projects and programmes to assess gender implications;
   - Advice to ITU management on the role that ITU should take as a leader in gender and ICTs.

What are the numbers?

Survey Questionnaire 2002 - 4 - 007
Seventy-seven organizations responded to the second ITU gender questionnaire disseminated in the year 2002. Responses were well distributed geographically, with 19 responses from the Africa Region, 13 from the Americas, 16 from Asia-Pacific, 4 from Arab States and 29 from Europe.

Of the total number of 13,974 managerial posts indicated by respondents, 3758 were women managers, 49 presented requests for assistance.

The following guidelines should be used to ensure that gender analysis becomes an integral part of licensing and regulatory activities:

1. Facilitate and promote the establishment of a Gender Unit within the regulatory agency. The Ministry and/or an inter-agency effort.
2. Review, revise or develop new regulatory, circulars, issues and procedures to remove any gender bias.
3. Promote gender analysis as part of policy process.
4. Develop and establish systems to gather gender statistics.

Gender-Aware Guidelines for Policy-Making and Regulatory Agencies

Gender-Aware Guidelines for Policy-Making and Regulatory Agencies is a document intended to assist decision-makers to conduct their work in such a way that both women and men are taken into consideration in the process – both as part of the processes themselves as well as in considering the impact of decisions made.

The following guidelines should be used to ensure that gender analysis becomes an integral part of licensing and regulatory activities:

1. Facilitate and promote the establishment of a Gender Unit within the regulatory agency. The Ministry and/or an inter-agency effort.
2. Review, revise or develop new regulatory, circulars, issues and procedures to remove any gender bias.
3. Promote gender analysis as part of policy process.
4. Develop and establish systems to gather gender statistics.
5. Enter into dialogue with other national entities.

The average Internet user is a college-educated high-income English-speaking male under 35 years old.

This profile only fits one person in ten in the English-speaking world.

TFGI: an information resource

In addition to its many other activities, TFGI strives to stay a step ahead on issues related to research and policy. Among its publications and educational initiatives are the following:

- TFGI Brochure “Promoting Gender Equality in and through Telecommunications”;
- ‘Gender Perspectives in Telecom Policy-Making and Regulatory Agencies’;
- ‘Gender-Binding for ITU Delegates’ brochure;
- TFGI website http://www.itu.int/ITU-D/gender/

Promoting gender awareness and mainstreaming of gender into ITU-D programmes, TFGI strives to stay a step ahead on issues related to research and policy. Among its publications and educational initiatives are the following:

7. Gender Assessment for ITU Delegates’ bookmark;

8. TFGI website http://www.itu.int/ITU-D/gender/

What are the numbers?

TFGI gender survey questionnaire

During the second meeting of TFGI, it was recommended that TFGI include in its work programmes the need to identify barriers and problems in achieving an increase of women’s participation as well as proactive strategies and policies on gender equality and equity in the telecommunication and ICT areas. As a response to this recommendation, a gender questionnaire was developed and disseminated with the annual survey to the ITU Member Regulations. Through the use of analysis of the questionnaire, TFGI endeavoured to:

- bring awareness to Member States of the importance of creating gender equality and equity policies;
- provide up-to-date information on planning and preparation of strategies on gender equality and equity within the organizations involved in telecommunications;
- promote wide dissemination of the purpose and mandate of TFGI;
- create a database for the basic indicators related to gender equality as a basis for evaluation of progress;
- identify possible areas where the expertise of the Task Force and ITU could be shared with other UN agencies.

77 responses, 3758 women managers, 49 requests for assistance

Survey Questionnaire

Seventy-seven organizations responded to the second ITU gender questionnaire disseminated in the year 2001. Responses were well distributed geographically, with 19 responses from the Africa region, 13 from the Americas, 18 from Asia-Pacific, 4 from Arab States and 26 from Europe.

The total number of 13,974 managerial posts indicated by respondents, 3758 or 27% were held by women, indicating an increase of 2.5% from the year before.

Fourteen organizations indicated that policies and practices are in place to ensure that recruitment, employment, training and advancement of men and women are taken on a fair and equitable basis.

Some 48 of the 77 respondents indicated that the difficulty in increasing the number of women within the telecommunication sector seemed to be due to the limited number of qualified women. Only 8 respondents indicated that the difficulty in increasing the number of women within the sector was due to a lack of commitment of senior management. Thirteen respondents indicated that limited access to information technologies was the reason for employing few women in their organizations.

Gender-Aware Guidelines for Policy-Making and Regulatory Agencies

Gender-Aware Guidelines for Policy-Making and Regulatory Agencies is a document intended to assist decision-makers to conduct their work in such a way that both women and men are considered as part of the process. The guidelines are intended as a basis for evaluation of progress.

1. Facilitate and promote the establishment of a Gender Unit within the regulatory agency; the ministry; the ministry and/or an inter-agency effort.
2. Review, revise or develop new regulatory, circulars, issuance and procedures to remove any gender bias.
3. Develop and establish systems to gather gender statistics.
4. Develop and establish systems to gather gender statistics.
5. Enter into dialogue with other national entities.

Human resources

1. Ensure equal hiring opportunities for all women and men, regardless of race, ethnicity, class and age.
2. Ensure that a certain percentage of positions are occupied by women.
3. Develop campaigns to attract women professionals particularly in managerial or leadership roles.

We’re on the Web! http://www.itu.int/ITU-D/gender/

1998 – WTDC and the beginning of TFGI

MANDATE
The World Telecommunication Development Conference held in Valletta, Malta, in March 1998 adopted Resolution 7 that established the Task Force on Gender Issues within the Telecommunication Development Bureau (BDT). This resolution was unanimously supported and reaffirmed at the 1998 Plenipotentiary Conference in Taipei. Its aim is to serve as a main organ to increase the awareness of the developmental impact of telecommunications on women, to promote mainstreaming of gender issues into telecommunication policy and programmes, and to ensure that the benefits of telecommunications applications are made available to all women and men in developing countries.

OBJECTIVES
• Access to and benefits of telecommunications for women and men equally
• Integration of the gender perspective in government, commercial and community activities
• Gender balance in human resource development
• Sensitivity to women and men as distinct and overlapping consumers in developing countries
• Balanced treatment of women and men in all aspects of regulatory policy and telecommunications services
• Full participation of women in decision-making
• Gender balance in ITU

ACTIVITIES
• Rural Access projects include training women in the operation of telecommunications, as well as proposing to establish women-run and owned telecentres
• Gender Workshops teach ITU Telecommunication Development Bureau Centre of Excellence the importance of a gender perspective and how to integrate it into their training modules
• Online Conference disseminates the latest information on gender issues and ICTs to over 100 Task Force members
• Gender Training Curriculum offers specialized training to assist regulators and policy-makers to effectively integrate gender perspectives in telecommunication policy
• Research enables TFGI to remain current on the most timely and pressing issues related to gender and ICTs

ITU and its impact

In the four short years that TFGI has been in existence, it has managed to make a substantial and valuable impact on ITU and associated organizations.

ITU/BTD:  
TFGI activities have served as a catalyst to bring awareness of gender equality issues and to link them to sustainable development. A gender perspective has been integrated into activities of BTD programmes as well as in BTD meetings such as TDAG and Study Groups.

ITU:  
Plenipotentiary 1998 Resolution 70 and subsequent gender awareness activities, creation of ITU internal Group on Gender Issues, initiation of in-service gender training in ITU.

ITU membership:  
Increased awareness of gender issues in the telecommunication sector, gender focal points nominated by some Administrations. National Committees on Gender Issues established and ITC training for women initiated.

UN System:  
Inclusion of ITU in the UN inter-agency work on women and gender equality, Geneva group of gender focal points.
