## **The Application of Information and Communication Technologies in Least Developed Countries for Sustained Economic Growth Edition 2004**

via ITU Website

A lot has been said about the digital divide that exists between the developed and the least developed countries (LDCs). Yet so little is being said about the opportunities that exist in the ICT Sector in the LDCs. This report takes a very close look at this group of countries and advances the argument that ICTs can play a catalytic role in getting these countries out of their current poverty trap. In that respect, a win-win outcome for both the investor and the countries is not in question.
