ITU-R Recommendations and Reports Online Service – Annual Subscription

Description of the service

The ITU-R Recommendations constitute a set of international technical standards developed by the Radiocommunication Sector (formerly CCIR) of ITU. They are the result of studies undertaken by Radiocommunication Study Groups on the use of a vast range of wireless services, including popular new mobile communication technologies; the management of the radio-frequency spectrum and satellite orbits; the efficient use of the radio-frequency spectrum by all radiocommunication services; terrestrial and satellite radiocommunication broadcasting; radiowave propagation; systems and networks for the fixed-satellite service, the fixed service and the mobile service; space operation, Earth exploration-satellite, meteorological-satellite and radio astronomy services.

The ITU-R Reports contain technical, operational or procedural statements prepared by a Radiocommunication Study Group on a given subject.

This annual subscription service contains all ITU-R Recommendations in force in two formats:

- Recommendations in their original Microsoft Word for Windows™ format, and
- Recommendations in Adobe Acrobat™ Portable Document Format (PDF),

available as soon as they are published.

The service also includes all ITU-R Reports in force, scanned and saved in Adobe PDF, and accessible immediately on publication.

The Online service now includes access to pre-published Recommendations, which have been approved by the Member States of ITU-R. However, these texts do not include any amendments and editorial changes which may have arisen during the approval process.

Price of the service

	Customer category	Annual Subscription Single user (Swiss francs)
<input type="checkbox"/>	General public	940.–
<input type="checkbox"/>	ITU Member States and Sector Members	– 15%

Licence Agreement

for use of the “ITU-R Recommendations and Reports” Online service

Annual Subscription Service

1. This Licence Agreement (hereinafter “Agreement”) relates to use of the *ITU-R Recommendations and Reports* Online service (hereinafter “Service”) by the Customer and/or Authorized Users.

2. For the purposes of this Agreement, the words “Authorized User” signify an employee designated by the Customer, authorized by the International Telecommunication Union (“ITU”) to use the Service in accordance with the terms and conditions of the Agreement.

3. The Customer receives from ITU a non-exclusive and non-transferable licence authorizing the Customer, as well as its Authorized Users, to use the service during the period of validity of the Agreement. The Customer shall ensure that the terms and conditions of the Agreement are adhered to by its Authorized Users, in particular by informing them of their rights and obligations thereunder.

4. ITU publications are protected by copyright. No provision of this Agreement may be interpreted as constituting a renunciation of ITU’s copyright. The Customer undertakes to respect, and ensure that its Authorized Users respect, the copyright notice appearing on ITU publications.

5. The Customer may not, without prior authorization from ITU (and subject to payment of any applicable fees), place any of the publications covered by this Agreement on an internal network or internal web. The Customer may not make the said publications available to third parties, in particular by placing them on an external network or external web.

6. ITU has elaborated the Service with care and there is no reason to believe that it may contain any inaccuracies or defects. Nevertheless, ITU does not guarantee that the Service will be available without interruption or error, and disclaims all warranties, express or implied, in that regard. In no event may ITU be held liable for any damages (direct or indirect) whatsoever arising out of the use of the Service, including loss of business or other pecuniary losses. If, for technical reasons, the Customer is unable to begin using the Service, it must submit to ITU, within 30 days of the date of receipt of the access key(s), a detailed description of the technical problems encountered. In the event that the technical problems cannot be resolved, ITU shall refund to the Customer the amount paid in respect of the Service.

7. The access keys constitute confidential information which must not be divulged to third parties. The Customer accepts full responsibility for the use that is made of the Service by means of its access key and/or those of its Authorized Users.

8. This Agreement automatically expires one year after its entry into force, unless ITU receives, before the expiry date, the payment due from the Customer for the following year. In that case, the Agreement is renewed for the following year under the same terms and conditions. The foregoing notwithstanding, ITU reserves the right to refuse to renew the Agreement, in which case it shall so inform the Customer. ITU also reserves the right to terminate the Agreement at any time if, in its judgement, the Customer is failing to respect the terms and conditions thereof. In such a case, the Customer shall not be entitled to any refund. The Customer may terminate the Agreement at any time; however, such termination by the Customer, whatever the reason therefor, shall not entitle it to any refund by ITU.

No. 210-05

9. Any dispute between the Parties arising out of or in relation to this Agreement that cannot be settled amicably between them through direct negotiation shall be settled, at the request of one of the Parties, by a sole arbitrator acting in accordance with the rules of arbitration of the International Chamber of Commerce in force at the date of signature of this Agreement. The place of arbitration shall be Geneva and the language of arbitration shall be English. The applicable law shall be Swiss law, with the exception of the provisions of Article 190 of the Swiss Federal Law on Private International Law of 18 December 1987. The arbitrator's ruling shall be final, and any recourse to any court or tribunal against the arbitrator's ruling shall be excluded.

10. No provision of the Agreement may be interpreted as constituting a derogation or renunciation of the privileges, immunities or facilities enjoyed by ITU, particularly under any international agreement, any national law or the Headquarters Agreement or implementing arrangement thereof concluded with the Swiss Federal Council on 22 July 1971.

11. The Agreement shall enter into force and be binding upon ITU only when the following three conditions have been met:

- a) receipt by ITU of the Agreement duly signed by the Customer;
- b) payment by the Customer of the annual charge for the Service;
- c) provision by ITU to the Customer of the access key(s).

IN WITNESS WHEREOF, the Customer acknowledges that it has read and understood this Agreement and agrees to be bound by its terms and conditions.
