via ITU Website

The second edition of this Handbook has been developed by experts of Working Party 7D of Radiocommunication Study Group 7 (Science services) responsible for radio astronomy, the search for extra-terrestrial intelligence (SETI), and radar astronomy. It is not intended as a source on radio astronomy, but rather deals with those aspects of radio astronomy that are relevant to frequency coordination, i.e., the management of radio spectrum usage in order to minimize interference between radiocommunication services.

If one of these alternative methods is chosen, the dispatch cost will be added to the quote. As from 1 February 2003, the costs of shipping via registered mail have been added to the economy-class costs. In the case of electronic publications (CD-ROM, DVD-ROM and online), these general conditions shall apply, subject to the specific derogation provisions contained in the Licence Agreements. The placing of an order implies full acceptance of these general conditions of sale.

None of the provisions of these general conditions of sale shall be interpreted as constituting a derogation or renunciation of the privileges, immunities and facilities enjoyed by ITU in accordance with the international agreement applicable to it, in particular the Headquarters Agreement concluded with the Swiss Federal Council on 22 July 1971, as well as the Swiss law or any other relevant national legislation.
