## ITU-T Recommendations on DVD-ROM

*(formerly on CD-ROM)*

**(on CD-ROM: March 2004 Edition)**

**(on DVD-ROM: June, September and December 2004 Editions)**

ITU-T Recommendations developed by the ITU Telecommunication Standardization Sector (formerly CCITT) constitute the basis for international telecommunication standards. They are based on studies on technical, operating and tariff questions and serve to standardize telecommunications on a world-wide basis.

The ITU-T Recommendations on DVD-ROM make it possible to keep in touch with the fast-moving and complex world of telecommunication standards. They are an essential reference for public and private telecommunication operating agencies, manufacturers, government agencies, scientific or industrial organizations, international organizations, consultants, technical colleges and universities, etc.

This DVD-ROM contains the current ITU-T Recommendations in Adobe Acrobat™ Portable Document Format (PDF) and in MS Word format.

It also includes pre-published Recommendations, subject to their availability at the time the DVD-ROM is produced.

This DVD-ROM does not include certain software programmes associated with the Recommendations, which must be ordered and paid for separately. Please consult our List of Recommendations at:
