

## Telecommunications for Disaster Relief

# Telecommunications for Disaster Relief

- Why Have a Workshop?
- What is TDR?
- Who are the players?

# Telecommunications for Disaster Relief

- Why Have a Workshop?
  - To Improve understanding of telecommunication requirements
  - Understand the differing National Regulatory and Policy Framework
  - Provide an opportunity for the users to discuss their requirements

# Telecommunications for Disaster Relief

- What is TDR?
  - a telecommunication capability that will facilitate the use of public telecommunication services and systems by authorities for communications during emergency, disaster relief and mitigation operations.
  - This capability, would enable authorized users organizing and coordinating disaster relief operations to have preferential treatment for their communications via the Public Telecommunications Networks.

# Telecommunications for Disaster Relief
