Worldwide commitment and ownership

The World Summit on the Information Society provided a unique opportunity for all key stakeholders to develop a common vision and understanding and to address the wide range of issues related to the Information Society. It succeeded in bringing the global spotlight on the power of ICT in achieving the development goals for all. WSIS also highlighted the complexities of the Information Society: it’s not just about technology; it’s about people – and their potential.

Printed in Switzerland
Geneva, 2006
The World Summit on the Information Society, held in two phases in Geneva, December 2003, and Tunis, November 2005, brought global commitment towards “building a people-centred, inclusive and development-oriented Information Society, where everyone can create, access, utilize and share information and knowledge, enabling individuals, communities and peoples to achieve their full potential in promoting sustainable development and improving their quality of life.”

**The Geneva Plan of Action:**

**Critical targets for global connectivity to be reached by 2015**

- a) Connect all villages with ICTs
- b) Connect all educational institutions
- c) Connect all scientific and research centres
- d) Connect all public libraries, museums and archives
- e) Connect all health centres and hospitals
- f) Connect local and central government departments
- g) Adapt all primary and secondary school curricula to meet the challenges of the Information Society
- h) Ensure that all have access to television and radio services
- i) Encourage the development of content on the internet
- j) Ensure that more than half the world’s inhabitants have access to ICTs within reach

The Summit established 11 key action lines to achieve the objectives, goals and targets of the Information Society

**Interagency coordination**

WSIS Tunis requested the UN Secretary-General to establish a UN Group on the Information Society (UNGIS) within the Chief Executive Board (CEB). UNGIS is an interagency coordinating mechanism established in April 2006 to facilitate the implementation of the WSIS outcomes by UN agencies, funds and programmes. This coordination is critical given the cross-cutting nature of many of the WSIS issues and the need to be efficient.

UNGIS will highlight the importance of ICTs in meeting the Millennium Development Goals (MDGs). It will interface with other development efforts within the UN system, including activities at the regional and country level. ITU, UNESCO and UNDP will serve as the rotating Chairs of UNGIS, with ITU chairing the Group in its first year.

**FOLLOW-UP**

WSIS requested ECOSOC to oversee the system-wide follow-up of the Geneva and Tunis outcomes and to review the mandate, agenda and composition of the Commission on Science and Technology for Development (CSTD), including strengthening it while taking into account the multi-stakeholder approach.

A report on the modalities for interagency coordination of the implementation of WSIS outcomes, including recommendations on the follow-up process, will be made by the UN Secretary-General to the UN General Assembly.

In 2015, the UN General Assembly will review the implementation of the WSIS Plan of Action.

**WSIS STOCKTAKING**

ITU’s stocktaking exercise, launched during the Tunis phase, will serve as a valuable tool in the implementation of the WSIS Plan of Action.

An ongoing process, the stocktaking database has registered more than 3,000 projects.

**WSIS Golden Book**

The WSIS Golden Book, intended to promote new commitments and initiatives announced during the Tunis Phase of WSIS, highlights some of the valuable work being done around the world to promote ICTs for development: build infrastructure, promote ICTs in education, health and governance, ensure fair access and enhance online security.

More than 375 submissions announced to promote WSIS goals represent a total value of nearly USD 4 billion.

**Connect the World**

ITU launched the Connect the World initiative to encourage new projects and partnerships to bridge the digital divide and create a critical mass that will generate the momentum needed to reach remote and underserved communities by 2015.

Connect the World has identified three key areas of activity – an enabling environment, infrastructure, applications and services – which constitute the primary building blocks needed to “connect the unconnected by 2015”.

**ENABLING ENVIRONMENT  INFRASTRUCTURE & READINESS  APPLICATIONS & SERVICES**
WSIS attaches great importance to multi-stakeholder implementation at the international level, which should be organized taking into account the themes and action lines in the Geneva Plan of Action and, when appropriate, moderated or facilitated by UN agencies.

The coordination of multi-stakeholder implementation activities will help avoid duplication of activities and should include exchange of information, creation of knowledge, sharing of best practices, and assistance in developing multi-stakeholder and public-private partnerships.

ITU, UNESCO and UNDP have been designated to play leading facilitating roles in the implementation of the WSIS Plan of Action. They will also ensure overall coordination among the different multi-stakeholder teams.

ITU is the focal point for action lines C2 (Information and communication infrastructure) and C5 (cybersecurity). In addition, ITU serves as co-facilitator for other action lines (C1, C3, C4, C5, C7 and C11).

**Implementation of WSIS Plan of Action**

Following the Tunis Summit, 16 - 18 November 2005, WSIS enters the implementation phase to meet its goals by 2015. The sustainable implementation and follow-up of the WSIS outcomes will require unremitting multi-stakeholder effort among governments, the private sector, civil society, the United Nations and other international organizations.

The Tunis Agenda describes the nuts and bolts of the implementation mechanism at the national, regional and international levels:

**National Level**

Governments and stakeholders are encouraged to create enabling environment and implementation mechanism

a) E-strategies integrated in national development plans
   - with Poverty Reduction Strategies
   - to achieve Millennium Development Goals (MDGs)

b) ICT fully mainstreamed with Official Development Assistance (ODA)
   - for effective information-sharing and coordination among development partners
   - using analysis and sharing of best practices
   - promoting ICT for development

c) Bilateral and multilateral technical assistance programmes to assist governments

d) Common Country Assessment reports to include ICT for development

**Regional level**

a) Regional intergovernmental organizations and stakeholders
   - Exchange information and best practices for ICT for development to attain MDGs

b) UN Regional Commissions organize post-Summit activities
   - Assist Member States with development and implementation of regional strategies

c) Multi-stakeholder approach considered essential

**International level**

a) Implementation and follow-up based on WSIS themes and action lines

b) Each UN agency should act according to its mandate and competencies, pursuant to decisions of respective governing bodies, and within existing approved resources

c) Implementation and follow-up to be intergovernmental, based on a multi-stakeholder process
IMPLEMENTING THE ACTION PLAN

WORLD SUMMIT ON THE INFORMATION SOCIETY

GENEVA PHASE

REGIONAL MEETINGS
- Africa: 25-30 May 2002, Bamako (Mali)
- Pan-Europe: 7-9 November 2002, Bucharest (Romania)
- Latin America and Caribbean: 29-31 January 2003, Bávaro (Dominican Republic)
- West Asia: 4-6 February 2003, Beirut (Lebanon)

THEMATIC MEETINGS
- Topical WSIS-related issues
  - September 2002 – December 2003

PREPCOM-1
- 1-5 July 2002, Geneva (Switzerland)

PREPCOM-2
- 17-28 February 2003, Geneva (Switzerland)
  - Inter-sessional Meeting
    - 15-18 July 2003, Paris (France)

PREPCOM-3
- 15-26 September 2003, Geneva (Switzerland)
- 10-14 November 2003, Geneva (Switzerland)
- 5-6 December 2003, Geneva (Switzerland)
- 9 December 2003, Geneva (Switzerland)

WORLD SUMMIT ON THE INFORMATION SOCIETY
- Geneva 10-12 December 2003
  - Geneva Declaration of Principles
  - Geneva Plan of Action

OUTCOME

IMPLEMENTATION
- National level
- International level
- Regional level
- Multi-stakeholder process
- Interagency coordination

FOLLOW-UP
- ECOSOC to oversee the system-wide follow-up of the Geneva and Tunis outcomes
- UN General Assembly to review in 2015 the achievement of WSIS goals and objectives

TUNIS PHASE

REGIONAL MEETINGS
- West Asia: 22-23 November 2004, Damascus (Syria)
- Africa: 2-4 February 2005, Accra (Ghana)
- Asia-Pacific: 31 May - 2 June 2005, Tehran (The Islamic Republic of Iran)
- Latin America and Caribbean: 8-10 June 2005, Rio de Janeiro (Brazil)

THEMATIC MEETINGS
- Topical WSIS-related issues
  - February 2004 – July 2005

PREPCOM-1
- 24-26 June 2004, Hammamet (Tunisia)

PREPCOM-2
- 17-28 February 2003, Geneva (Switzerland)

PREPCOM-3
- 19-30 September 2005, Geneva (Switzerland)
- 13-15 November 2005, Tunis (Tunisia)

WORLD SUMMIT ON THE INFORMATION SOCIETY
- Tunis 16-18 November 2005
