

QUESTIONNAIRE - PART I

(To be completed by both Administrations and, where relevant, by Sector members)

Information on national radio frequency spectrum allocations: 2 900 MHz-30 GHz

Up dating for the frequency range 29.7-3 000 MHz

1. Introduction

A national table of frequency allocations is a basic tool for an effective spectrum management process. It provides a general plan for spectrum use and the basic structure to ensure efficient use of the spectrum and the prevention of radio frequency interference between services. Through use of the table, manufacturers will have a guide to where in the spectrum to design and build equipment, and users will know where to operate. As described in the National Spectrum Management Handbook (2005), the International Table of Frequency Allocations, Article 5 of the Radio Regulations, forms the basis for national tables and, in some countries, this may be used as the national table. However, other countries have included additional information on national use, varying in detail from showing which service is allocated—when the Radio Regulations offer a choice—to showing how spectrum is made available for different use, and, for specific sub-bands, channel arrangements and equipment specifications. An extract of a national allocation table is attached as an example.

The scope of the information requested from administrations by this circular letter is in no way intended to include proprietary frequency usage by Member States. It is intended simply to provide information on national frequency allocations and their usage for the benefit of other administrations. It is intended also to facilitate the possible coordination of spectrum usage, either at a national, regional or international level. Moreover, this questionnaire is in no way intended to duplicate the more general “Telecommunication Regulatory Survey” issued by BDT Programme 1 (<http://www.itu.int/ITU-D/treg/Events/Survey/survey.html>).

2. Information on national radio frequency spectrum allocations: 2 900 MHz to 30 GHz

2.1 – National table of radio frequency spectrum allocations

- a) If you have a publicly-available national table of radio frequency spectrum allocations in force, please submit a complete copy (preferably in electronic form, if available and authorized), specifying its effective date.
- b) If you do not have a national frequency allocations table available in electronic form, the attached extract from Article 5 of the Radio Regulations—edition of 2004 for the frequency range 2 900 MHz to 30 GHz—may be used to indicate general information on how this range of frequencies is used by your administration within your national borders. Three columns have been added to this table for information on national spectrum use. If you are using an electronic version of the table, the information may be entered into the spaces provided, otherwise, please type or write the information on a printed copy.

2.2 – Required information

Pour disposer de plus d'espace pour répondre, vous pouvez supprimer, le cas échéant, la ou les colonnes de la Région UIT qui ne concerneraient pas votre pays.

a) Les administrations sont priées de fournir les informations suivantes:

Si votre administration est concernée par un tableau d'attributions infra régional (exemple : Table des attributions européennes communes – ECA) nous vous prions de mentionner les attributions de ce tableau dans une colonne destinée à cet effet (voir l'exemple de tableau ci-après).

In the column designated "National allocations," please enter the radiocommunication service or services allocated to each frequency band. Please use the ITU terminology given in Article 1 of the Radio Regulations to describe services, such as FIXED, MOBILE, Space Research, Radio Astronomy, etc., using the ITU format to indicate PRIMARY and/or Secondary allocations (see Nos. **5.23** to **5.31**);

In the column designated "Application and comment," please enter further technical requirements or characteristics, if any, that have been established nationally for a given band, such as channel spacing or limitations on radiated signal power, etc...;

If appropriate, please specify your future plans related to the band in the column designated "Strategy."

b) Sector Members that operate in, or manufacture equipment for, this frequency range are invited to enter information about applications available for operation in the different frequency sub-bands, e.g., purpose, operating parameters, such as channel spacing, radiated signal power capabilities, etc.

c) Example extract from a national frequency allocation table: This example extract from a national allocation table shows the typical information administrations are invited to provide.

3 Up dating information about the band 29.7-3 000 MHz

Administrations are invited to provide, if needed, all changes in their national allocation table since 2002 for the frequency range 29.7-3 000 MHz. Administrations providing a complete table of frequency allocations in electronic form need not provide this update.

Example extracted from a national allocation table

International allocations 2 900 MHz – 30 GHz		National uses		
Regional allocations (Radio Regulations Article 5)	Sub-Regional allocations (if applicable)	National allocations	Application and comments	Strategy
2 900-3 100 RADIOLOCATION 5.424A RADIONAVIGATION 5.426 5.425 5.427	2 900-3 100 RADIOLOCATION RADIONAVIGATION	2 900-3 100 RADIOLOCATION RADIONAVIGATION	2 900-3 100 Radiolocation (military) Maritime navigation (2 920-3 100)	
3 100-3 300 RADIOLOCATION Earth exploration-satellite (active) Space research (active) 5.149 5.428	3 100-3 300 RADIOLOCATION Earth exploration-satellite (active) Space research (active)	3 100-3 300 RADIOLOCATION Earth exploration-satellite (active) Space research (active)	3 100-3 300 Earth exploration-satellite Radiolocation (military) Space research Radio astronomy (3 260-3 267)	
3 300-3 400 RADIOLOCATION 5.149 5.429 5.430	3 300-3 400 RADIOLOCATION	3 300-3 400 RADIOLOCATION	3 300-3 400 Radiolocation (military) Radio astronomy (3 332-3 339) Radio astronomy (3 345,8-3 352,5)
