Circular Letter
CR/240

15 July 2005

To Administrations of Member States of the ITU¹

Subject: Publication of the results of the first planning exercise

References: Resolution COM5/1 of the first session of the Regional Radiocommunication Conference for the planning of digital terrestrial broadcasting service in parts of Regions 1 and 3, in the frequency bands 174-230 MHz and 470-862 MHz – (RRC-04), Geneva, 2004

BR Circular letter CR/229 and its Addendum 1 (dated 7 December 2004 and 24 May 2005, respectively)

To the Director General

Dear Sir/Madam,

1 In accordance with the schedule of the intersessional activities, indicated in Annex 2 to Resolution COM5/1, the Planning Exercise Team (PXT) conducted the first planning exercise, using the inventory of digital requirements and administrative declarations submitted by the Member States in response to the BR Circular Letter CR/229² and the other input data compiled by the Bureau from the relevant databases (the updated versions of the ST61 and GE89 Plans, the MIFR and the RCC List). In summary, 98 Member States from the planning area and one observer (the Palestinian Authority) submitted requirements for the first planning exercise and 35 Member States submitted administrative declarations. The other input data (notably on the existing and planned analogue broadcasting assignments and on the existing and planned assignments of other primary services) have been retrieved by the Bureau, using the general indications in § 1.7 of the Report, as well as the specific indications from the administrations concerning the exclusion of some categories of assignments from the eligible assignments. In addition, valid administrative

¹ This Circular Letter is primarily addressed to the Member States of Region 1 (except Mongolia) and to the Islamic Republic of Iran. It is for information only for other Member States.

² As advised by the African Group of countries, the PXT included all those digital requirements received by the Bureau by 29 May 2005 that have been declared complete and correct by 3 June 2005.

declarations, submitted by administrations by 17 June 2005, and coordination information forming part of the notified requirements have been included in the planning process. Detailed statistics on the input data used for the first planning exercise (i.e., the inventory of digital requirements, data for existing and planned analogue broadcasting assignments, data for existing and planned assignments of other primary services, as well as data on administrative declarations) are provided in [Document IPG-1/19](#) and its Addendum 1. These data are also available for consultations at the URL <http://www.itu.int/ITU-R/conferences/rrc/rrc-04/intersession/index.asp>.

2 In accordance with the indications in Annex 2 to Resolution COM5/1, the results of the first planning exercise are to be published by 15 July 2005 and this Circular Letter contains these results. General information on the conduct of the first planning exercise is contained in Annex 1 to this Circular Letter and detailed statistics are indicated in Annexes 2 and 3. The attached CD-ROMs include all details regarding the results of the first planning exercise together with the relevant application to view the data (the first CD-ROM contains information on case studies 1 and 4, while the second CD-ROM contains information on case studies 2 and 3). The information is essentially the same as presented to the IPG meeting (4–8 July 2005), with the following differences:

- some missing results, detected during the IPG meeting, are now included and the synthesis process has been repeated for these cases; this course of action resulted in some changes in the relevant statistics for some administrations;
- the administrative declarations are now visible.

3 As indicated in Annex 2 to Resolution COM5/1, administrations are expected to analyse these results with a view to taking them into consideration when preparing their input data for the production of the draft plan. You may wish to note that the IPG, after reviewing these results and noting the substantive number of incompatibilities, invited the PXT to repeat some stages of the planning process (notably the synthesis process), based on additional administrative declarations. To this end, all administrations are invited to consider submitting additional administrative declarations, where appropriate, using the concept and the format described in Addendum 1 to CR/229. The attention of the administrations is drawn to the fact that IPG concluded that the administrative declarations shall be restricted only to declaring compatible two digital requirements. The deadline for submission of these additional declarations is 22 August 2005 and the results of these additional calculations, together with other calculation results as suggested by IPG, will be presented to the meeting of the Working Party of the IPG scheduled for 28-29 September 2005.

4 The Bureau remains at the disposal of your Administration for any clarification you may require with respect to the subjects covered in this Circular Letter.

Yours faithfully,

V. Timofeev
Director, Radiocommunication Bureau

ANNEX 1

Conduct of the first planning exercise: general description and detailed statistics

1 Introduction

The PXT conducted the first planning exercise using the indications in the Report from the RRC-04. The results of this exercise are referred to as “basic version”. The PXT also conducted three additional case studies, based on the advice received from the Steering Group of the IPG, from its second meeting, about the possible planning options and variants, bearing in mind the time limitations.

1.1 The basic version (case study 1)

For this version, the PXT included all analogue television assignments in the “equivalent” reference situation and all assignments to primary services other than broadcasting in the “equivalent” reference situation, as indicated in the Report from the RRC-04, complemented with the indications from the concerned administrations.

1.2 Case study 2

In this case study all analogue television assignments in the “equivalent” reference situation were taken into account during the planning process and all assignments to primary services other than broadcasting in the “equivalent” reference situation were excluded from the planning process.

1.3 Case study 3

In this case study all analogue television assignments in the “equivalent” reference situation were excluded from the planning process and all assignments to primary services other than broadcasting in the “equivalent” reference situation were taken into account during the planning process.

1.4 Case study 4

In this case study all analogue television assignments in the “equivalent” reference situation and all assignments to primary services other than broadcasting in the “equivalent” reference situation were excluded from the planning process.

2 Summary of the results

2.1 Results for Band III

	Case study 1			Case study 2			Case study 3			Case study 4		
	T-DAB	DVB-T	Total									
Yes	765	1 362	2 127	759	1 373	2 132	1 591	2 433	4 024	1 605	2 469	4 074
No	5 140	4 813	9 953	5 146	4 802	9 948	4 314	3 742	8 056	4 300	3 706	8 006
Total	5 905	6 175	12 080	5 905	6 175	12 080	5 905	6 175	12 080	5 905	6 175	12 080

Key: Yes = number of requirements with a channel or frequency block assigned

No = number of requirements without a channel or frequency block assigned

Detailed results for Band III, concerning each administration on the different options, are given in Annex 2.

2.2 Results for Band IV and V

	Case study 1	Case study 2	Case study 3	Case study 4
Yes	16 243	17 025	25 233	26 274
No	26 483	25 701	17 493	16 452
Total:	42 726	42 726	42 726	42 726

Key: Yes = number of requirements with a channel or frequency block assigned

No = number of requirements without a channel or frequency block assigned

Detailed results for Bands IV and V, concerning each administration on the different options, are given in Annex 3.
