

**Radiocommunication Bureau***(Direct Fax N°. +41 22 730 57 85)*Circular Letter  
**CR/322**

25 January 2011

**To Administrations of Member States of ITU**

**Subject:** Application of No. **9.42** of the Radio Regulations relating to comments by administrations in respect of a coordination request under Nos. **9.7** to **9.7B** and use of the **SpaceCom** software for submitting comments under No. **9.41**

**Reference:** Provision Nos. **9.41** and **9.42** and related Rules of Procedure

**To the Director-General**

Dear Sir/Madam,

1. Article **9** of the Radio Regulations "Procedure for effecting coordination with or obtaining agreement of other administrations" contains provision Nos. **9.41** and **9.42** relating to requests for inclusion or exclusion by administrations relating to coordination requests under No. **9.7** to **9.7B**, and its treatment by the Radiocommunication Bureau.
2. The purpose of this circular letter is to provide information and guidance to administrations on the arrangements for submission to the Radiocommunication Bureau of requests for inclusion or exclusion of administration under No. **9.41** relating to coordination requests under Nos. **9.7** (GSO/GSO cases limited to the bands for which Coordination Arc Criteria is applicable (See items 1) to 8) of the frequency band column of Table 5-1 of Appendix **5**), **9.7A** and **9.7B** and their subsequent treatment by the Bureau under No. **9.42**. **Annex 1** details these coordination request provisions.
3. In order to assist administrations in applying provisions No. **9.41**, the Radiocommunication Bureau has enhanced the **SpaceCom** software package that will make it possible to submit comments electronically to the Bureau and to facilitate their further treatment. The first version of the enhanced software (named **SpaceCom**) is available to administrations and other users at the ITU website (<http://www.itu.int/ITU-R/software/space/spacecom/index.html>), as well as on the BR IFIC (Space services) CD-ROM (BR IFIC 2687 of 08.02.2011 and subsequent BR IFICs). Administrations are requested to use this latest version of software for preparation and submission to the Radiocommunication Bureau (e-mail: [brmail@itu.int](mailto:brmail@itu.int)) in electronic format their comments and disagreement including requests under No. **9.41** relating to Special Sections, relating to requests for coordination published in BR IFIC 2685 (11 January 2011) and onwards. **Annex 2** to this circular letter briefly describes **9.41 Module of the SpaceCom** software package.

4. A new Special Section (CR/E/--) has been developed by the Bureau for the publication of the status of requests for inclusion in the coordination procedure, submitted under Nos. **9.41**. The new CR/E Special Section will be used for indicating administrations that have sent comments in respect of coordination requests published in BR IFIC 2685 (11 January 2011) and onwards. The CR/E Special Section will also contain information on the list of satellite networks which served as basis for inclusion under No.**9.41**, summary of coordination requirement for applicable provisions and a list of coordination requirements at group level related to No.**9.41** requests. The layout of the CR/E Special Section is as shown in **Annex 2** to this Circular Letter. Request for exclusion of administration under No.**9.41** will be published as a CR/C/---- MOD Special Section.

5. Administrations are reminded that the validity of a request for inclusion or exclusion under No. **9.41** is subject to providing calculation ( $\Delta T/T > 6\%$  criteria for provision No.**9.7**) for one pair of assignments for each satellite network requested for provision No.**9.7** and other appropriate technical justification for provisions No.**9.7A** and **9.7B**. The Bureau would like to draw the attention of administration to the Rules of Procedure under Nos. **9.41 - 9.42** for detailed background on the method of application of the provisions Nos.**9.41/9.42** by the Bureau and administrations.

6. The Bureau wishes to remind administrations that, based on Resolution **55 (Rev.WRC-07)** and the Rule of Procedure on Receivability, the use of the **SpaceCom** software package is mandatory from 1 July 2009 for comments under No. **9.3**, Article 2A (partially) and Article 4 of Appendices **30** and **30A** and disagreements under No. **9.52** in respect of coordination requests under Nos. **9.11** to **9.14**, No **9.21** or § 2.1 of Section A of Resolution **33 (Rev.WRC-03)**. On the same grounds the Bureau would like to request administrations to submit comments under No.**9.41** using **SpaceCom** software for efficient processing of such requests, starting from the Special Sections published in the BR IFIC 2685 onwards.

6.1 The Bureau takes this opportunity to reiterate that the use of the **SpaceCom** software package to communicate to the Bureau your request under Nos.**9.41** or comments under No.**9.3** or disagreements under No. **9.52** does not replace your obligation to communicate these requests, comments or disagreements, by telefax, letter or any other means, to the responsible administration, together with reasons therefore.

7. The Bureau would like to inform administrations that the request for inclusion or exclusion of administrations under No.**9.41** is currently taken into account by the Bureau at the time of examination of the notices for recording of the frequency assignments of the satellite networks in the MIFR .

8. Finally, please note that the **9.41 Module of SpaceCom** software package cannot be used to generate and communicate to the Bureau your disagreements or comments under provisions other than request under No.**9.41**.

9. The Radiocommunication Bureau trusts that the new arrangement outlined above will help administrations in the application of the provisions of Nos. **9.41** and **9.42** by the Bureau and administrations. Should you have any queries regarding the contents of this letter, the contact person in the Radiocommunication Bureau is Mr Yvon Henri (Tel: +41 22 7395536 / e-mail: [yvon.henri@itu.int](mailto:yvon.henri@itu.int)).

Yours faithfully,

François RANCY  
Director, Radiocommunication Bureau

**Distribution:**

- Administrations of Member States of ITU
- Members of the Radio Regulations Board

**Annex 1**

**Requests for inclusion or exclusion subject to No. 9.41**

<b>Reference of Article 9</b>	<b>Incoming network</b>	<b>Commenting network/station</b>	<b>Case</b>	<b>Conditions of Receivability</b>
<b>9.41/9.7</b>	GSO	GSO	<p>A station in a satellite network using the geostationary-satellite orbit (GSO), in any space radiocommunication service, in a frequency band and in a Region where this service is not subject to a Plan, in respect of any other satellite network using that orbit, in any space radiocommunication service in a frequency band and in a Region where this service is not subject to a Plan, with the exception of the coordination between earth stations operating in the opposite direction of transmission</p> <p><b>Applicable only to the cases listed in items 1) to 8) of the frequency band column of Table 5-1 of Appendix 5</b></p>	<p><math>\Delta T/T &gt; 6\%</math> calculations are to be provided for only one pair of assignments for each satellite network to be further considered in the coordination process (a pair consisting of one assignment of the published network and one assignment of the network of the requesting administration)</p>
<b>9.41/9.7A</b>	GSO earth station	Non-GSO system	A specific Earth station in a GSO satellite network in the FSS in respect of a non-GSO satellite system in the FSS	Appropriate calculation (epfd, frequency overlap)
<b>9.41/9.7B</b>	Non-GSO system	GSO earth station	A non-GSO satellite system in the FSS in respect of a specific Earth station in a GSO satellite network in the FSS	Appropriate calculation (epfd, frequency overlap)

## Annex 2

### Description of the 9.41 Module of SpaceCom software package

1. A new **9.41 Module** has been added to the existing **SpaceCom** software package, which is designed to assist administrations and the Radiocommunication Bureau (BR) in the management of the comments on CR/C Special Sections concerning requests for coordination under Nos. **9.11** to **9.14**, **9.21** and **RS33 §2.1** and the publication of Special Section CR/D/-- in the BR IFIC (Space Services). This new module would help administrations to submit comments on CR/C Special Sections concerning requests for inclusion or exclusion of administrations under No.**9.41** and the publication of Special Section CR/E/---- in the BR IFIC (Space Services).
2. **9.41 Module of SpaceCom** is designed for three groups of users: potentially affected administrations commenting on a CR/C under No.**9.41**, BR and the administration responsible for the satellite network published in a CR/C Special Section.
3. Using **SpaceCom**, any administration including those identified in a CR/C Special Section as potentially affected under Nos. **9.7** to **9.7B** may request inclusion or exclusion as appropriate, within the regulatory four-month period enclosing calculations ( $\Delta T/T > 6\%$  criteria for provision No.**9.7** and other appropriate calculation for provision Nos.**9.7A** and **9.7B**) for one pair of assignments for each of the satellite network to be considered in the coordination process with a copy to the administration responsible for the network subject to the CR/C Special Section. If an administration is identified by the BR for all the groups for which coordination Arc applies as affected for the satellite network subject to the CR/C Special Section, that administration cannot request under No.**9.41** to be included in the coordination procedure. SpaceCom will allow administrations to request for application of No.**9.41** only if that administration is not identified at least for one group of frequency assignments. The Bureau will reject the request under No.**9.41** as not valid if it is not received in the Bureau within 4 months or calculations ( $\Delta T/T > 6\%$  criteria for provision No.**9.7** and other appropriate calculation for provision Nos.**9.7A** and **9.7B**) are not attached.
4. Using **SpaceCom**, BR will collect all these comments received from potentially affected administrations, merge all comments relating to a particular CR/C Special Section, analyse them and will publish a Special Section CR/E/---- in its BR IFIC (Space Services) and update its SNS database accordingly. The BR software **SpacePub** has been amended to publish this new type of Special Section CR/E/----.
5. **SpaceCom** requires as its input the MS-Access file IFICnnnn.mdb provided on the BR IFIC (Space Services) CD-ROM. **SpaceCom** extracts, based on user input, the relevant information for each CR/C Special Section to be commented by the potentially affected or notifying administration. To facilitate the review of these comments, **SpaceCom** generates working report documents. All comments related to all CR/C Special Sections contained in a particular BR IFIC (Space Services) should be gathered together into one **CR/E-IFICnnnn\_adm.mdb** or **CRE-IFICnnnn\_NOT\_adm.mdb** file prior to sending that file to the BR. **Please maintain the integrity of the naming convention of the mdb files while sending it to the Bureau in order for proper classification of the mdb file for processing.** Finally, **SpaceCom** includes a facility to send, as an e-mail attachment, the mdb file to the BR along with attachment of  $\Delta T/T > 6\%$  or other calculations.
6. Administrations should also send No. **9.41** request to the responsible administrations whose networks are subject to comments.
7. Necessary explanations for installation and use of **9.41 Module of SpaceCom** are provided in the User Manual document distributed together with the software on the BR IFIC (Space Services) CD-ROM. An online help is provided also in the **SpaceCom**.
8. Model CR/E/---- Special Section is as shown below.
