

The keys to security project success

Theory vs Practice

- In theory there is no difference between theory and practice. In practice there is.....Yogi Berra***

How do we turn theory into practice?

Key 1 - Make sure the everybody agrees on the problem

- Governments/proposers/managers etc
- Users

Key 2 - Make sure the you can afford it..

- Know the risks
- Make sure the risk is covered by the cost
- Make sure ALL (the lifecycle) costs are covered by someone
- Budget – if you don't have the budget, which security problems aren't fixed?

Key 3 - Make sure the project increases security

- Be sure you don't create newer, harder problems
- Measures
- Audit before and after
- Fix the cause, not the symptom
- Start from the problem, not the solution (eg PKI)
