

El Salvador believes that the focus of the Tunis phase of WSIS should be in the following three issues:

**The first two issues**, that all States agreed to further discuss them, towards and to the Tunis phase, and explicitly expressed it in the Geneva phase (par. 13b and 27f of the Geneva Plan of Action):

- 1. Internet Governance;**
- 2. Financial mechanisms.**

Both issues must be incorporated in due time into the Preparatory Process of the Tunis phase in an orderly manner.

**The third issue**, is that El Salvador believes is very important to address, is to build upon the plan of the Geneva phase. We must respect the spirit and the letter of the Geneva Documents, as an appropriate way to deepen our works. In the Plan of Action of Geneva, we basically agreed, for the most part, to what should be done, and a global deadline by 2015. We didn't go into specifics, on **who will do what, when, where and how**. A way forward should be to elaborate these specifics. It is necessary that all stakeholders offer viable ways and partnerships to realize all the actions agreed in Geneva, and to reflect them in appropriate documents. It is like viewing the Geneva Plan of Action as medium term plan of action and to see the Tunis document regarding this issue as a detailed plan of action. However, this detailed plan of action can only cover the international level. El Salvador believes it will be necessary to repeat this exercise for all other levels.

El Salvador will consider the Tunis phase as a very big success if we ("we" includes all governments and all other stakeholders) can deal with the aforementioned three issues in an appropriate manner. El Salvador offers to the Tunisian Government and to the International Community to do our utmost to succeed in our common endeavor.

For the outcome of Tunis, we foresee, at this point in time the following documents:

1. Action(s) Regarding Internet Governance;
2. Improvement and innovation of financing mechanisms;
3. Detailed Plan of Action.

Finally, El Salvador upholds that the Tunis outcome must be at the same political level as the Geneva outcome.
