Total registered participants* at the ITU GSR-21 Regional Regulatory Roundtable and Regional Economic Dialogue for Asia and the Pacific 2021:

172 registered participants (Male = 115 participants and Female = 57 participants)

Member State = 88 participants

Recognized Operating Agencies = 8 participants

Regional and other International Organizations = 9 participants

Scientific or Industrial Organizations = 10 participants

United Nations and its Specialized Agencies = 11 participants

Other entities = 19 participants

Non-member = 27 participants

**the total of registered participants is excluding the ITU personnel*

REGIONAL ECONOMIC DIALOGUE FOR **ASIA-PACIFIC**

Summary of Day 1

8 June | 10:00 – 15:00 (GMT+7)

- We can see the clear focus and need for regulatory enablers, including ITU's ICT Reg Tracker, in an era where we are making digital transformation a policy objective
- Universal service funds and national broadband funding programs have been in place but there is also a need to emphasize on innovative financing and regulatory schemes that can support infrastructure and other digital services that would drive digital transformation
- Best policy is the one that gets implemented. ICT Regulation has moved from **Obligation** to **Incentive** based with High-level Leadership and accountability gaining more focus
- Data has become basis of regulatory processes and evidence-based Policy decisions, meaning collaboration with stakeholder beyond the traditional industry and licensees.
- Whole of Govt. approach requires moving away from traditional siloed regulatory approach and new technologies especially in the Last mile
- Place digital inclusion and digital empowerment at the center of policies

REGIONAL ECONOMIC DIALOGUE FOR **ASIA-PACIFIC**

Summary of Day 2

9 June | 10:00 – 15:30 (GMT+7)

- Greater engagement to address the digital divide, improving and enhancing quality of access in the urban and rural areas, legacy processes and approaches implementing digital transformation and building digital resilience.
- Greater collaboration between government, industry and academia to accelerate connectivity through greater certainty in national policy and strategies in the area of licencing and spectrum and to develop evidence-based recommendation to support the development of policy which supports the achievement of the SDG.
- Policy and regulations are important as starting point, but business models acceptable to consumers/communities, local content/affordability beyond prices and customized and localized approach to create new incentives also needs to be considered to promote investment and meaningful connectivity in diverse Asia and the Pacific region.
- It is important to consider the wide range of available technology which supports high speed connectivity, particularly to underserve communities, that enables the digital economy and ensure sustainability with innovative financing mechanisms and digitally empowered human capital.
- Critical technologies including AI, collaborative information, governance standards surrounding data privacy and ethics, and regulatory control need to be considered.
- Information needs to be provided both to consumers, industry, and also the government policy makers to engage in this area, with academia playing a role in creating Asia and the Pacific-specific research products and capacity building initiatives.

Emerging Technology for Connectivity: Accelerating Digital Transformation in LDCs, SIDS and LLDCs

Regional events (Africa, Americas, Arab, ASP, Europe);
BDT thematic priority (Youth, Emergency Telecommunications, Digital Networks, Digital applications, Cybersecurity, Statistics, Innovation, Connet2Recover, GIGA);
ITU sectors participation (TSB, SPM, BR); Partners events;

- July 5: Trends on emerging technology for connectivity and digital transformation;
- July 6: Fundamentals of emerging technology for connectivity, e.g, cybersecurity, networks, spectrum;
- July 7: Role of emerging technology to connect the unconnected and accelerate the digital transformation of LDCs, LLDCs, SIDS;
- July 8: Intelligent connectivity and applications (AI, Big Data, IoT, blockchain) and their impact on the digital transformation of LDCs, LLDCs, SIDS;
- July 9: Emerging technology for connectivity in the post Covid era.

11–16 July 2021

5–9 July 2021

Capacity Building

- July 11: Emerging Technology for regulators of Arab LDCs;
- July 12-14: Emerging technology for the last mile connectivity;
- July 12-14: 5G technology, co-organized with GSMA;
- July 13: Cybersecurity;
- July 15-16: Low Earth Orbit (LEO) satellites, co-organized with OneWeb;
- July 15-16: Artificial Intelligence, co-organized with Capgemini.

Draft Plan for Asia and the Pacific events

Time	1100 – 1200 hrs (GMT+7) Bangkok, Jakarta time zone			
Day	Tuesday 6 th July 20201	Wednesday 7 th July 20201	Thursday 8 th July 20201	Friday 9 th July 20201
Session Focus	ASP5: Contributing to a secure and resilient environment	ASP1: Addressing special needs of least developed countries, small island developing states, including Pacific island countries, and landlocked developing countries	ASP3: Fostering development of infrastructure to enhance digital connectivity	ASP2: Harnessing ICTs to support the digital economy and an inclusive digital society
Title	Safe and Secure Resilient network solutions	Emerging technologies: bringing new digital experiences in remote areas	Advanced Digital Networks for data-oriented societies	Post Covid Living: Enabling an inclusive society through IoT and Smart Cities/Village
