

## **Biography**

Name: Aisha Almarzooqi

Country: United Arab Emirates, TDRA

Candidate for vice chair study group 2

Aisha Almarzooqi is an Engineer at the Telecommunications and Digital Government Regulatory Authority (TDRA) in the United Arab Emirates, with a professional focus on regulatory policy, licensing, interconnection, and access frameworks. She leads key regulatory projects at the federal level, drafting and enhancing regulatory frameworks and conducting benchmarks that support evidence-based policy development and national regulatory strategies.

Her Experience includes contributing to the World Telecommunication Standardization Assembly (WTSA) in 2024. Additionally contributed to the work of the World Telecommunication Development Conference (WTDC), supporting the development of regional positions within the Arab Group and strengthening regional coordination on development priorities. Eng. Aisha is also a permanent member of the national team of the UAE responsible for UAE Participation in international regulatory forums, contributing to the formulation of national contributions and facilitating alignment across regional perspectives.

Known for constructive collaboration and strong negotiation capabilities that foster effective stakeholder engagement in multilateral settings, Eng. Aisha is experienced in analyzing regulatory challenges, proposing innovative policy responses, and supporting the modernization of regulatory frameworks in alignment with the UAE's strategic digital transformation agenda. Skilled in cross-departmental coordination, stakeholder engagement, and preparing analytical and technical reports that support senior-level decision-making.

Eng. Aisha holds a Bachelor's degree in Electrical Engineering from the American University of Sharjah and is currently pursuing a Master's degree in Engineering Systems Management.
