13 December 2015
Original: English

Seventieth session
Agenda item 17
Information and communications technologies for development

Draft resolution submitted by the President of the General Assembly

Outcome document of the high-level meeting of the General Assembly on the overall review of the implementation of the outcomes of the World Summit on the Information Society

The General Assembly,
Adopts the following outcome document of the high-level meeting of the General Assembly on the overall review of the implementation of the outcomes of the World Summit on the Information Society at its seventieth session:

Outcome document of the high-level meeting of the General Assembly on the overall review of the implementation of the outcomes of the World Summit on the Information Society

We, the Ministers and heads of delegations participating in the high-level plenary meeting of the General Assembly on the overall review of the implementation of the outcomes of the World Summit on the Information Society, held in New York on 15 and 16 December 2015,

Having taken note of the results of the adoption of the 'Tunis Agenda for the Information Society' that the General Assembly undertakes an overall review of the implementation of the outcomes of the World Summit on the Information Society in 2015, and in this regard reaffirming the role of the General Assembly in this process, and reaffirming also that the Assembly, in its resolution 68/302 of 31 July 2014, decided that the overall review would be concluded by a two-day high-level meeting of the Assembly, preceded by an intergovernmental preparatory process that also meaningfully takes into account inputs from all relevant stakeholders;

Welcoming the constructive and diverse inputs from Governments, the private sector, civil society, international organizations, the technical and academic communities and all other relevant stakeholders in taking stock of the progress made in the implementation of the outcomes of the World Summit on the Information Society¹ and the results of the preparatory process;

¹ See A/69/687.

UNGA Overall Review

Outcome Document

OUTLINE

Preamble

1. ICT for Development

1.1 Bridging the Digital Divide

1.2 Enabling Environment

1.3 Financial Mechanisms

2. Human rights in the Information Society

3. Building Confidence and Security in the Use of ICTs

4. Internet Governance

4.1. Enhanced Cooperation

5. Follow-Up and Review

Outcomes of the Overall Reviews and WSIS implementation beyond 2015

- Call for close alignment between the World Summit on the Information Society process and the **2030 Agenda for Sustainable Development** (P.5)
- Call to all stakeholders to integrate ICTs into their approaches to implementing the Goals, and request **UN entities facilitating WSIS Action Lines to review their reporting and work plans to support implementation of the 2030 Agenda.** (P.12)
- we call on all stakeholders, particularly United Nations entities that are facilitating the World Summit on the Information Society action lines, within their mandate and existing resources, to continue working together to **regularly analyse the nature of digital divides, study strategies to bridge them, and make their findings available to the international community.** (P.23)
- We recognize that ending the **gender digital divide** and the achievement of Sustainable Development Goal 5 on gender are mutually reinforcing efforts, and we commit to mainstreaming gender in the World Summit on the Information Society process, including through a **new emphasis on gender in the implementation and monitoring of the action lines**, with the support of relevant United Nations entities, including the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women). (P.7)

Outcomes of the Overall Reviews and WSIS implementation beyond 2015

- We recognize that certain policies have substantially contributed to bridging digital divides and the value of information and communications technologies for sustainable development, and we commit to continuing to identify and implement **best and emerging practices** for the establishment and functioning of education, innovation and investment frameworks for information and communications technologies. (P.28)
- We also request the Commission on Science and Technology for Development, within its mandate related to the follow-up to the World Summit on the Information Society, and **all action line facilitators**, within their respective mandates and existing resources, to work with all stakeholders to regularly identify and promote specific, detailed actions to support the enabling environment for information and communications technologies and development and provide the demand-driven policy advice, technical assistance and capacity-building, as appropriate, to realize them. (P.33)

Outcomes of the Overall Reviews and WSIS implementation beyond 2015

- We encourage a **prominent profile for information and communications technologies in the new Technology Facilitation Mechanism** established in the Addis Ababa Action Agenda, and consideration of how it can contribute to implementation of the World Summit on the Information Society action lines. (P.39)
- **regular review of progress of the full set of Summit action lines** will be essential to achieving the vision of the Summit. (P.66)
- We also call for the **continuation of the work of the United Nations Group on the Information Society** in coordinating the work of United Nations agencies, according to their mandates and competencies, and we invite the **regional commissions to continue** their work in implementation of the World Summit on the Information Society action lines and their contribution to the reviews thereof, including through regional reviews. (P.68)
- The activities of the **Partnership on Measuring Information and Communications Technology for Development** have made a valuable contribution to data-gathering and dissemination and should be continued. (P.70)
- We recognize that the **World Summit on the Information Society Forum has been a platform for discussion and sharing of best practices in the implementation of the World Summit outcomes** by all stakeholders, and it should continue to be held annually. (P.69)

UN CEB Joint Statement on WSIS+10

On the occasion of the WSIS+10 High-Level Event the Chief Executive Board, composed by all heads of UN System, has endorsed a Joint Statement.

 UNITED NATIONS SYSTEM
Chief Executives Board for Coordination

Chief Executives Board Joint Statement to the
United Nations General Assembly on the Overall Review of the
Implementation of World Summit on the Information Society Outcomes

We, the Chief Executives of organizations of the United Nations system, witnessing the momentous events taking place, with the adoption of the Sustainable Development Goals and the ongoing United Nations General Assembly Overall Review of the World Summit on the Information Society (WSIS), held in two phases in Geneva (2003) and Tunis (2005), reaffirm the important role of information and communications technologies (ICTs) as a critical enabler for advancing the globally agreed development goals, in particular in the context of the new development framework in resolution 70/1, entitled "Transforming our world: the 2030 Agenda for Sustainable Development", which acknowledges that "the spread of information and communications technology and global interconnectedness has great potential to accelerate human progress... and to develop knowledge societies" and contains targets on use of ICTs for the empowerment of women, for education and on access to ICTs for least developed countries (LDCs).

Though access to advanced technologies has grown at a fast pace since the celebration of WSIS, the impressive gains observed during the era of the Millennium Development Goals are still hampered by existing gaps in ICT access – between and within countries, between urban and rural settings, among men and women, boys and girls. A major digital divide is still in place, with more people offline than online and particularly poor access in vulnerable developing nations, which include LDCs, landlocked developing countries (LLDCs) and small island developing States (SIDS). The WSIS vision remains valid and we therefore commit ourselves collectively to reinvigorate collaborative action to harness the power of new technologies in promoting sustainable development and making the goal of universal and affordable access to ICTs and knowledge a reality. This should include also a new focus on relevant content, skills, capacity building, and an enabling environment, including multilingualism, to empower the implementation of the sustainable development goals, as well as to further freedom of expression and to promote cultural diversity on the basis of human rights.

In the national development process, use of ICTs need to be systematically integrated into development plans. Renewed efforts should be made to ensure that the enabling ICT dimension is adequately reflected in United Nations Development Assistance Frameworks and equivalent documents as well as in national medium-term plans.

Coherence across the United Nations system in the implementation of multiple goals and commitments is essential. In this regard, we reaffirm the role of United Nations Group on the Information Society (UNGIS)¹ as the inter-agency coordination mechanism for issues related to the implementation of the outcomes of the WSIS and call on UNGIS to include in its strategic priority the alignment between WSIS implementation and the implementation of the Sustainable Development Goals.

We also recognize the WSIS Forum has evolved as an efficient mechanism for multi-stakeholder implementation of WSIS action lines and cross-cutting commitments on gender equality, information exchange, knowledge creation and the sharing of best practices. Beyond 2015, it can serve as a key forum for discussing the role of ICTs as a means of implementation of the Sustainable Development Goals and targets, with due regard to the global mechanism for follow-up and review of the implementation of the 2030 Agenda for Sustainable Development, as set out in General Assembly resolution A/70/1.

As Chief Executives of the United Nations system, we look forward to the successful outcomes of United Nations General Assembly's Overall Review of the Implementation of WSIS Outcomes and we pledge our collective support for their implementation.

UN CEB Joint Statement on WSIS+10

- Reaffirmation of the important role of **ICTs as a critical enabler** for advancing the globally agreed development goals.
- Call for renewed efforts to ensure that the **enabling ICT dimension is adequately reflected in UNDAF and equivalent documents as well as in poverty reduction strategies.**
- Reaffirmation of the role of UNGIS as the **inter-agency coordination mechanism** for issues related to the implementation of the outcomes of the WSIS.
- Call on **UNGIS to include in its strategic priority** the alignment between WSIS implementation and the implementation of the SDGs.
- **WSIS Forum** recognized as an efficient mechanism for multi-stakeholder implementation of WSIS action lines. Beyond 2015, it can **serve as a key forum for discussing the role of ICTs as a means of implementation** of the Sustainable Development Goals and targets.

Meeting of the United Nations Group on the Information Society

15 December 2015

UN Headquarters, New York

WSIS Forum beyond 2015

Mr Ban Ki-moon, UN SG
UNGA HLM, 15 Dec 2015

We will strengthen the WSIS Forum as a key platform for discussing the role of ICTs as a means of implementation of the SDGs and targets.

Beyond 2015, following the multistakeholder approach, the WSIS Forum, will build upon the outcomes of the WSIS+10 Review and the 2030 Agenda for Sustainable Development. In this regard the WSIS-SDG Matrix developed by UN WSIS Action line Facilitators will serve as the mechanism to map, analyse and coordinate the implementation of ICTs as enablers and accelerators of the SDGs.

Mr Houlin Zhao, ITU
Secretary-General

ICTs and SDGs

The spread of information and communications technology and global interconnectedness has great potential to accelerate human progress, to bridge the digital divide and to develop knowledge societies, as does scientific and technological innovation across areas as diverse as medicine and energy.

TRANSFORMING OUR WORLD: THE 2030 AGENDA FOR SUSTAINABLE DEVELOPMENT

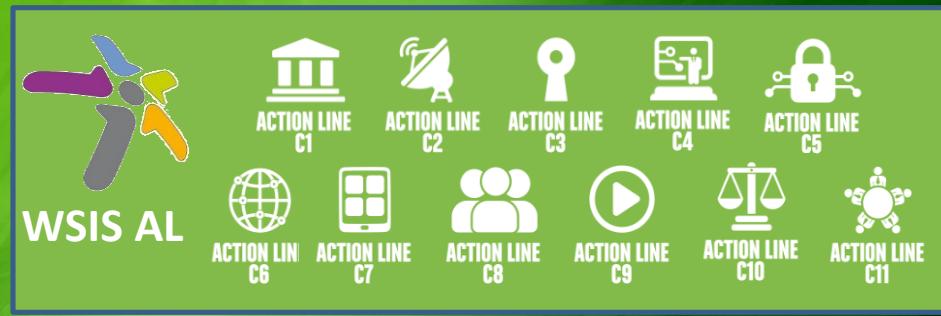

ICTs as a **key enabler** and **mean to implement** and achieve the Sustainable Development Goals and Targets

ICT related Goals and Targets

- **4.b** By 2030, substantially increase support for scholarships available to developing countries, in particular LDCs, SIDS and African countries, for enrolment in higher education, including vocational training and **information and communications technology**, technical, engineering and scientific programmes, in developed countries and other developing countries.
- **5.b** Enhance the use of enabling technology, in particular **information and communications technology**, to promote the empowerment of women.
- **9.c** Significantly increase **access to information and communications technology** and strive to provide **universal and affordable access to the Internet** in least developed countries by 2020.
- **17.8** Fully operationalize the technology bank and science, technology and innovation capacity-building mechanism for least developed countries by 2017 and enhance the use of enabling technology, in particular **information and communications technology**.

WSIS-SDG Matrix Revealed

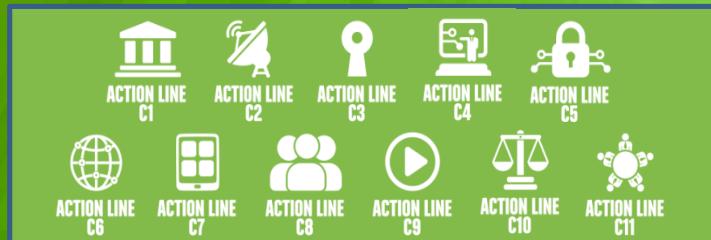

Identified challenges

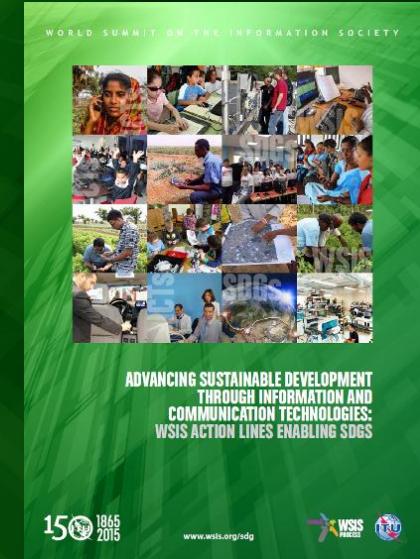

- Two communities (ICT4D and Post 2015)
- Converging objectives (Sustainable Development)
- Parallel review processes (WSIS and MDGs)
- Gradual recognition of ICTs as enabler for sustainable development
- Invite to support through relevant UN processes the creation creation of synergies and institutional linkages between WSIS and Post 2015 Development Agenda to continue strengthening the impact of ICT for sustainable development (Res.140, PP-14)

WSIS ALs-SDG Matrix

Impact of WSIS Action Lines on Sustainable Development Goals

- Released during WSIS Forum 2015
- Joint effort of all United Nations Action Line Facilitators
- Aims at drawing direct linkages between WSIS Action Lines and proposed SDGs, to continue strengthening the impact of ICTs for sustainable development
- analysis by each Action Line Facilitator, of connections and relations between their respective Action Line with the proposed SDGs and their targets

Towards the Third Dimension of the WSIS-SDG Matrix Empowered by WSIS Stocktaking Process

- Unique global platform, embraced by WSIS multistakeholder community in 2005 with the aim to provide an international register of ICT activities enabling development.
- Check out 7,000 entries on WSIS Stocktaking Platform www.wsis.org/stocktaking
- WSIS Stocktaking process has so far involved close to 140,000 stakeholders worldwide.
- Year-around ongoing Call for Updates and New Entries – Continue Sharing

NEW WSIS Forum 2015 proposed inclusion of Reporting on ICT Projects Enabling SDGs

WSIS STOCKTAKING PLATFORM

The screenshot shows the WSIS Stocktaking Platform homepage. On the left, there's a grid of 11 icons labeled C1 through C11, each representing a different aspect of the stocktaking process. The main header features the 'WSIS STOCKTAKING' logo with a stylized orange and purple graphic. To the right of the logo, a call-to-action reads: "CONTINUE SHARING YOUR PROJECTS AND EXPERIENCES ON THE IMPLEMENTATION OF WSIS ACTION LINES". Below this, key statistics are displayed: "133683 members", "6568 entries", and "2551 entities". To the right of the stats is a large graphic showing the links between WSIS projects and the Sustainable Development Goals (SDGs). The SDGs are represented by colored squares with icons and labels: G1 (No poverty), G2 (Zero hunger), G3 (Good health and well-being), G4 (Quality education), G5 (Gender equality), G6 (Clean water and sanitation), G7 (Affordable and clean energy), G8 (Decent work and economic growth), G9 (Industry, innovation and infrastructure), G10 (Reduced inequalities), G11 (Sustainable cities and communities), G12 (Responsible consumption and production), G13 (Climate action), G14 (Life below water), G15 (Life on land), G16 (Peace, justice and strong institutions), and G17 (Partnerships for the goals).
