

INFOMED: National Information Network for Cuban public health professional

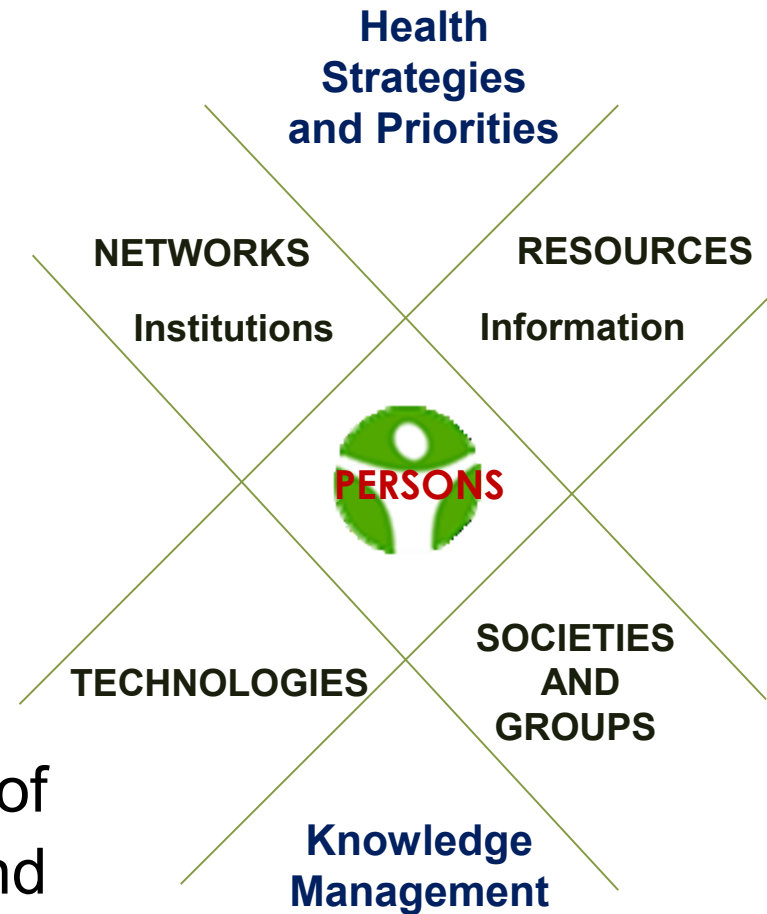

Ileana Alfonso Sánchez, Ph.D.

CARACTERIZACIÓN

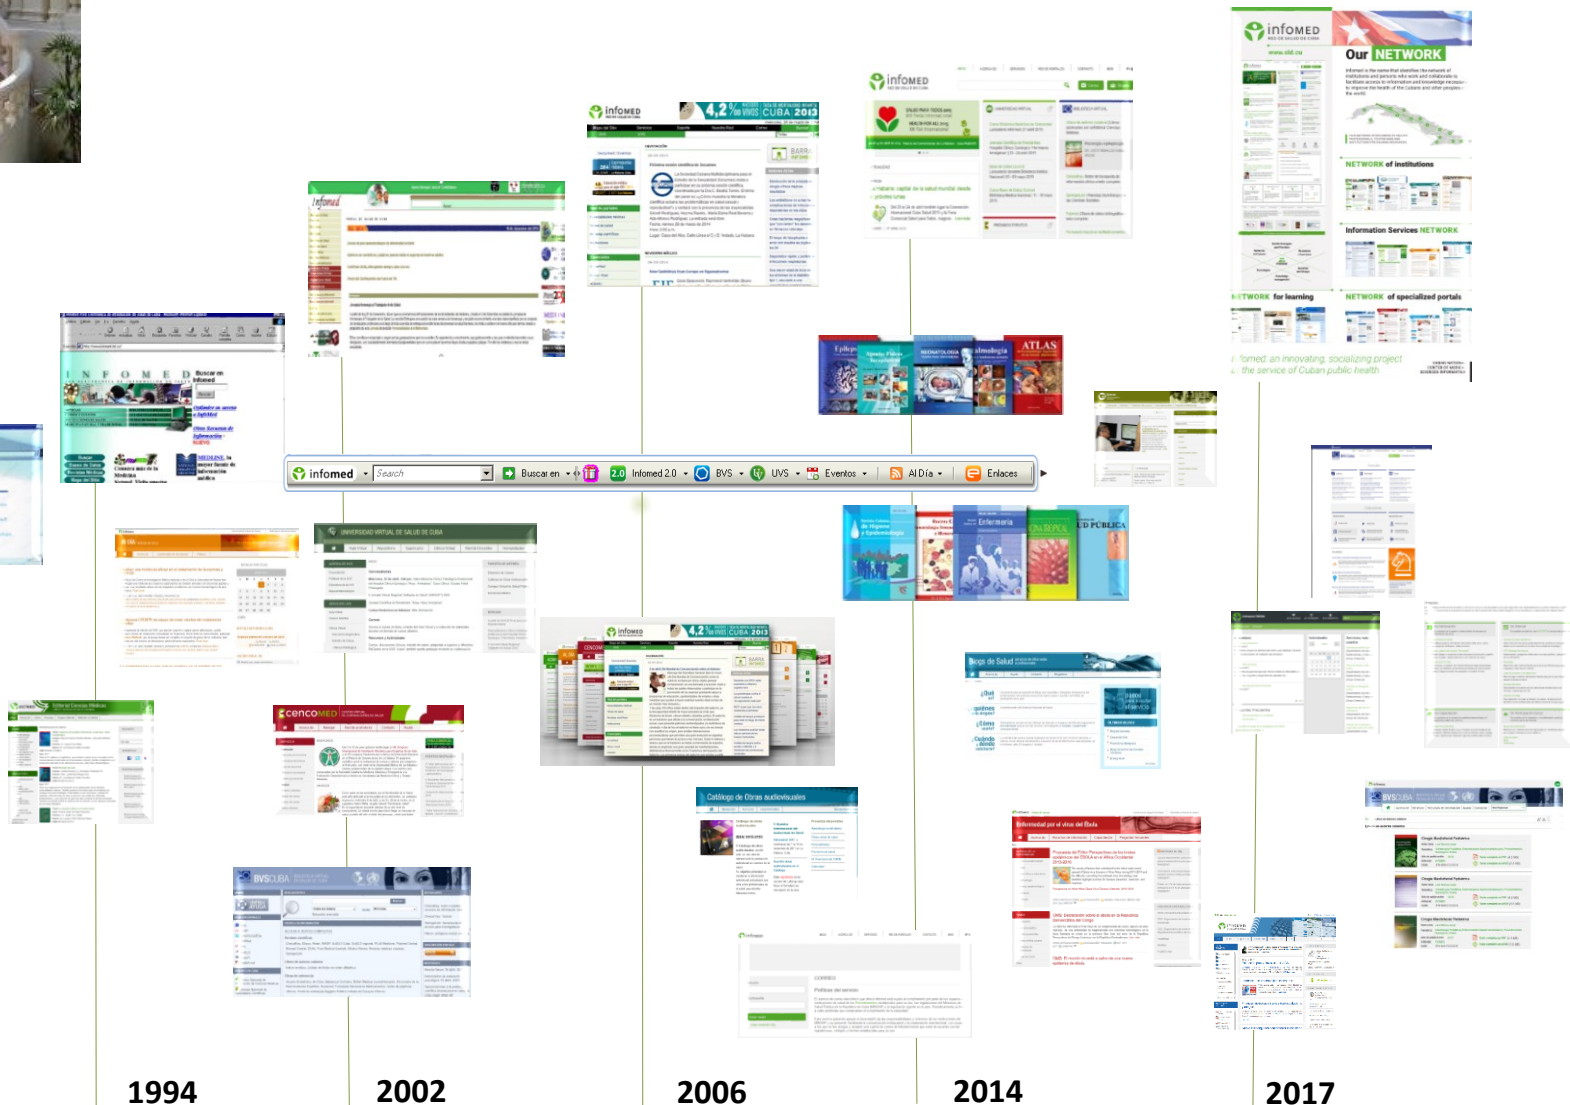

In 1992 the Telematic Network of Information on Health (Infomed) was created.

This Project aims at exploring the possibilities offered by information and communication technologies for the development of a specialized National Information System.

A network articulating to a set of people, institutions, means and resources collaborating in the service of health information of Cuba and of the world.

INFOMED IN TIME

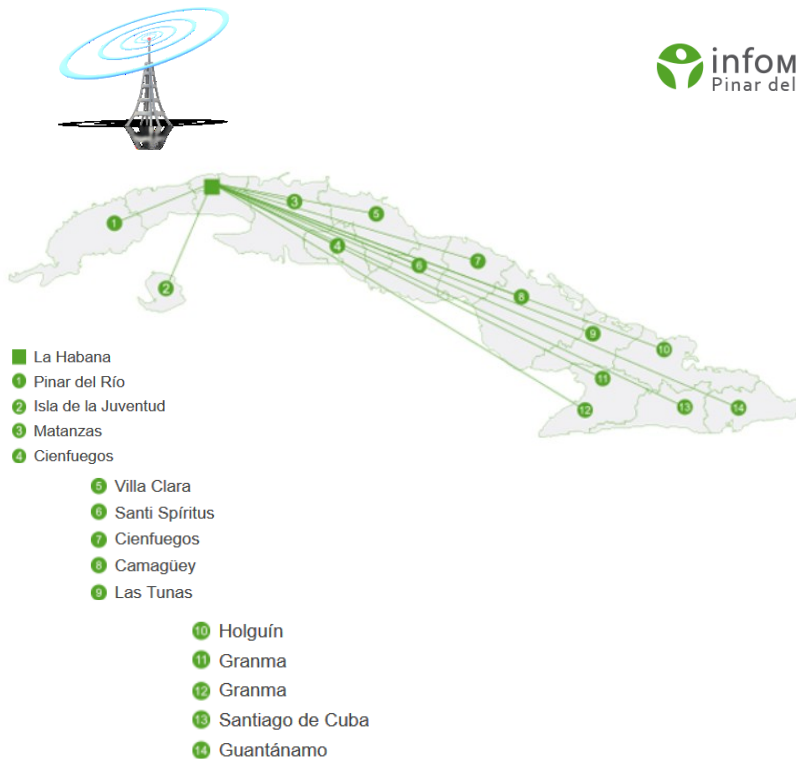

It is part of human development, and health is one of its essential components.

In this dimension, it creates "an environment of possibilities in which people can have a long, healthy and creative life."

It is an integrative portal, according to current trends, able to create communities of practice and socialize knowledge, pioneer in the use of open systems and open sources.

Infomed connects more than 3000 health professionals, in addition to the different institutions of the National Health System.

...ESPECIALIDADES

BIBLIOTECA VIRTUAL DE SALUD

UNIVERSIDAD VIRTUAL DE SALUD

CFNTRO CONVENCION VIRTUAL

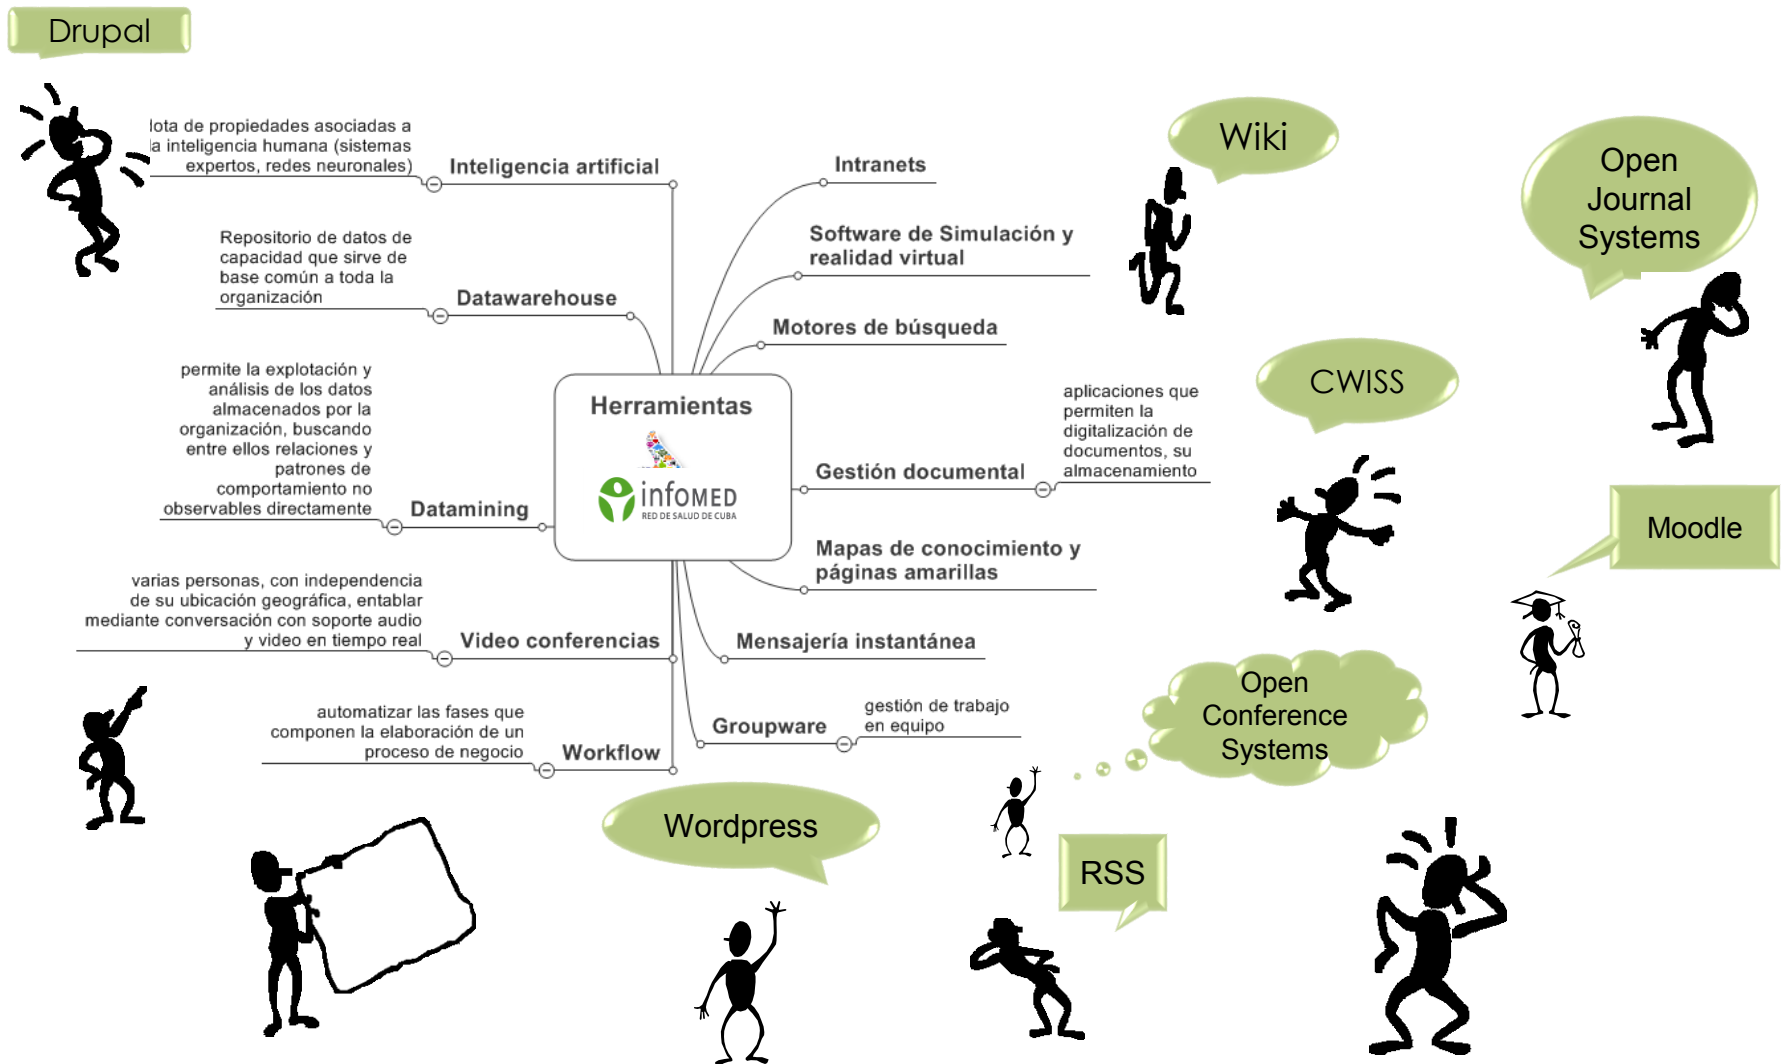

The development process of technical-scientific information services is based on a permanent theoretical and practical exploration, in open and multiuser environments, with capacity to respond to new demands of services.

The system has been fed by the advances made in this field in the last decade in Cuba and in the world, but at the same time, specific experiences have been integrated, systematized and shared.

- Information dimension*
- Formative dimension*
- Research dimension*
- Innovation dimension*
- Service dimension*

- ◆ Infrastructure
- ◆ Creation of capacities
- ◆ Access to information and Knowledge
- ◆ Application of ICTs
- ◆ Regional and international cooperation

Mobilizing knowledge and experience of all stakeholders to induce innovation and creativity.
Committing to continuous learning.

Every action the organization and its Infomed project do, is a way to fight for respect for the person and commitment to the collective, non-denial of the individual to the collective, but the dynamics and dialectics of the collective and the individual.

Creating social spaces, and networks of knowledge, that interact and share with a common goal:
Working for all and for the good of all.

Infomed is committed to achieving objectives, identifying challenges and opportunities in order to develop new goals, aligned with the advancement of our information society and 2030 Agenda to SD, a challenge that can only be faced with the participation of all its members and hundreds of people who have been part of this effort with their generosity.
