SDGs under-represents the significance of ICTs

The Agenda under-represents* the significance which ICTs have in the period for implementation of the SDGs

- i. ICTs can help deliver specific goals and targets
- ii. ICTs can monitor and measure progress against targets such as big data
- iii. But the most important impact of ICTs on sustainable development is likely to be the way in which they change the underlying ways we do things in our economies, societies and cultures

* See blog post from D. Souter "Inside Information Society" from APC

Looking to the future

Looking to the future

2019

EYE-CONTROLLED TECHNOLOGY

Advances in face and movement recognition software usher in an age of machines that are controlled by gestures or eye movements.

Looking to the future

2026 SMART CLOTHING

Nanoporous fabrics, miniaturized electronics, and haptic feedback make for “smart clothing” that change color or shape, and keep you cool or warm as the need arises.

Looking to the future

2030 SUPER ANTIVIRALS

Broad-spectrum antiviral drugs, based on the ISG15 mutation and other genetic therapies, arrive on the market.

Looking to the future

2034

UNHACKABLE QUANTUM INTERNET

A satellite network using entangled photons for quantum-key distribution (QKD) will create a fully secure, unhackable internet.

Looking to the future

2043

RAPID GENETIC SCREENING

Easy home genetic diagnostics lead to customized medicine, genomics-based drugs, and a revolution in the study of the genetic history of life.

Looking to the future

2049

GEOENGINEERING

A program of calcite aerosol geoengineering begins to cool the planet and repair the ozone layer.

There has never been a time of greater promise, or one of greater potential peril.

UN Deputy Secretary-General's remarks at WSIS 2018

“ICTs have unprecedented potential for delivering equitable and inclusive growth, protecting the environment and improving the well-being of people around the world.”

“Your contributions at this Forum will provide inputs to the High-Level Political Forum on Sustainable Development in New York in July.”

National development strategies (NDSs) do not give adequate prominence to the ICTs...

HIGH-LEVEL POLITICAL FORUM ON SUSTAINABLE DEVELOPMENT

VOLUNTARY NATIONAL REVIEWS DATABASE

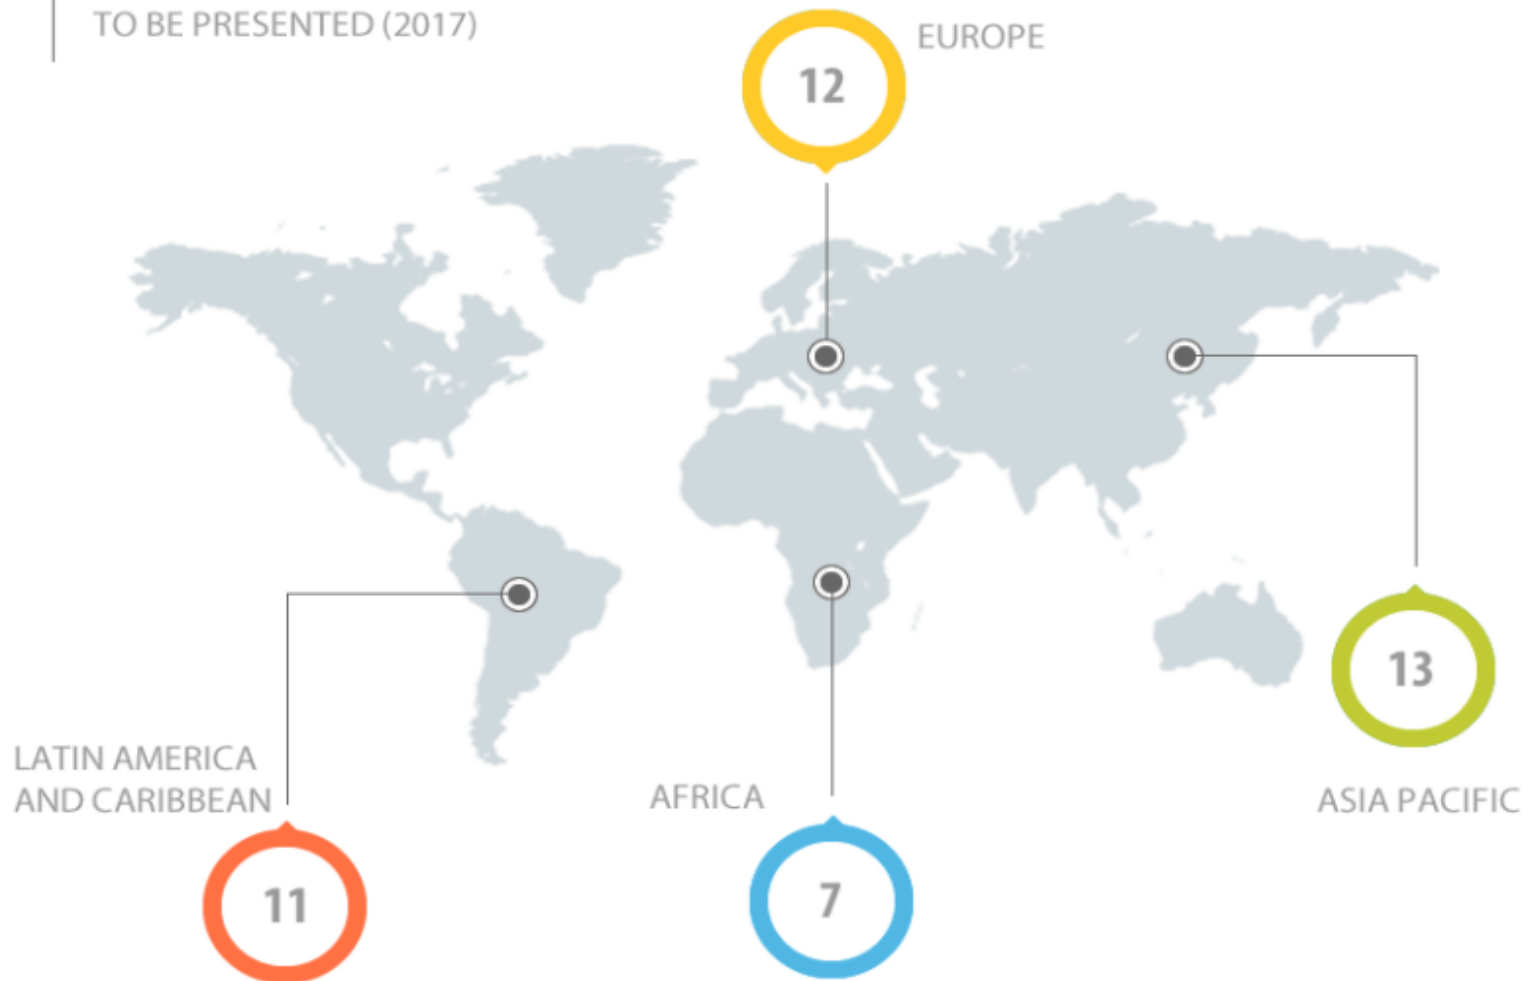

SEARCH INPUTS TO THE HLPF

HIGH-LEVEL POLITICAL FORUM 2017

VOLUNTARY NATIONAL REVIEWS TO BE PRESENTED (2017)

Ministerial Declaration of HLPF 2017

- ICTs mentioned only in two paragraphs
- Also limited mention of ICTs in all Country Reviews

SUSTAINABLE DEVELOPMENT GOALS
17 GOALS TO TRANSFORM OUR WORLD

National Development Strategy

- Principles, goals, targets
- Pillars, priorities, resources

ICT & E-Government Strategy

- Principles, goals, targets
- Pillars, priorities, resources

Questions

1. How can governments **identify and/or generate synergies between ICT strategies and National Development Strategies**
2. What **challenges do governments face in integrating ICT strategies and National Development Strategies?** What are some **solutions** to these problems?
3. How can governments **engage other stakeholders** in this integration process?
4. How can we measure **integration** of ICTs and e-Government in National Development Strategies?
