Make ideas real

# Agenda

- R&S future vision
- 5G BC/MC – New Business Verticals
- 5G BC/MC – Technical solutions
- 5G BC/MC – Multicast as a Service
- Trials – Worldwide

# Customer Challenges meet r&s future

## BNO

- Change in customer behavior
- Linear TV is losing popularity against streaming services
- Smartphone/Tablets are gaining importance
- No possible access to portable devices

## MNO

- Exponential increase of Mobile video consumption
- Live events are very important
- Consumers desire premium content anytime-anywhere
- No Quality of Service guaranteed – Bad user experience

## R&S vision: Efficient Media Delivery – Anywhere, Anytime, to everybody

- Usage of Broadcast/Multicast approach together with Unicast → eMBB
- Deployment of overlay network with One-to-Many concept
- Deployment of SDL mixed mode and/or dedicated mode in existing Cellular sites
- Usage of frequency below 1GHz (i.e. UHF, SDL, etc.)
- Enable Multicast as a Service (MaaS) and profit from existing resources
- Making broadcasting infrastructure more dynamic
- Avoid infrastructure over-provisioning while reducing CAPEX & OPEX

Internet of Things

Media & Entertainment

Automotive

Industrial Applications

# 5G BC/MC – New Business verticals

Live Casting – Live big/popular events and linear content

OTA Multicast – SW/FM Updates, Centralized Configuration and Control

Vehicle Casting – M&E inside the vehicle, OTA updates, OTA real-time traffic

Venue Casting - Enhance in-venue atmosphere with Live Home Experience

Public Safety Multicast – Emergency alerts, and Weather warning systems

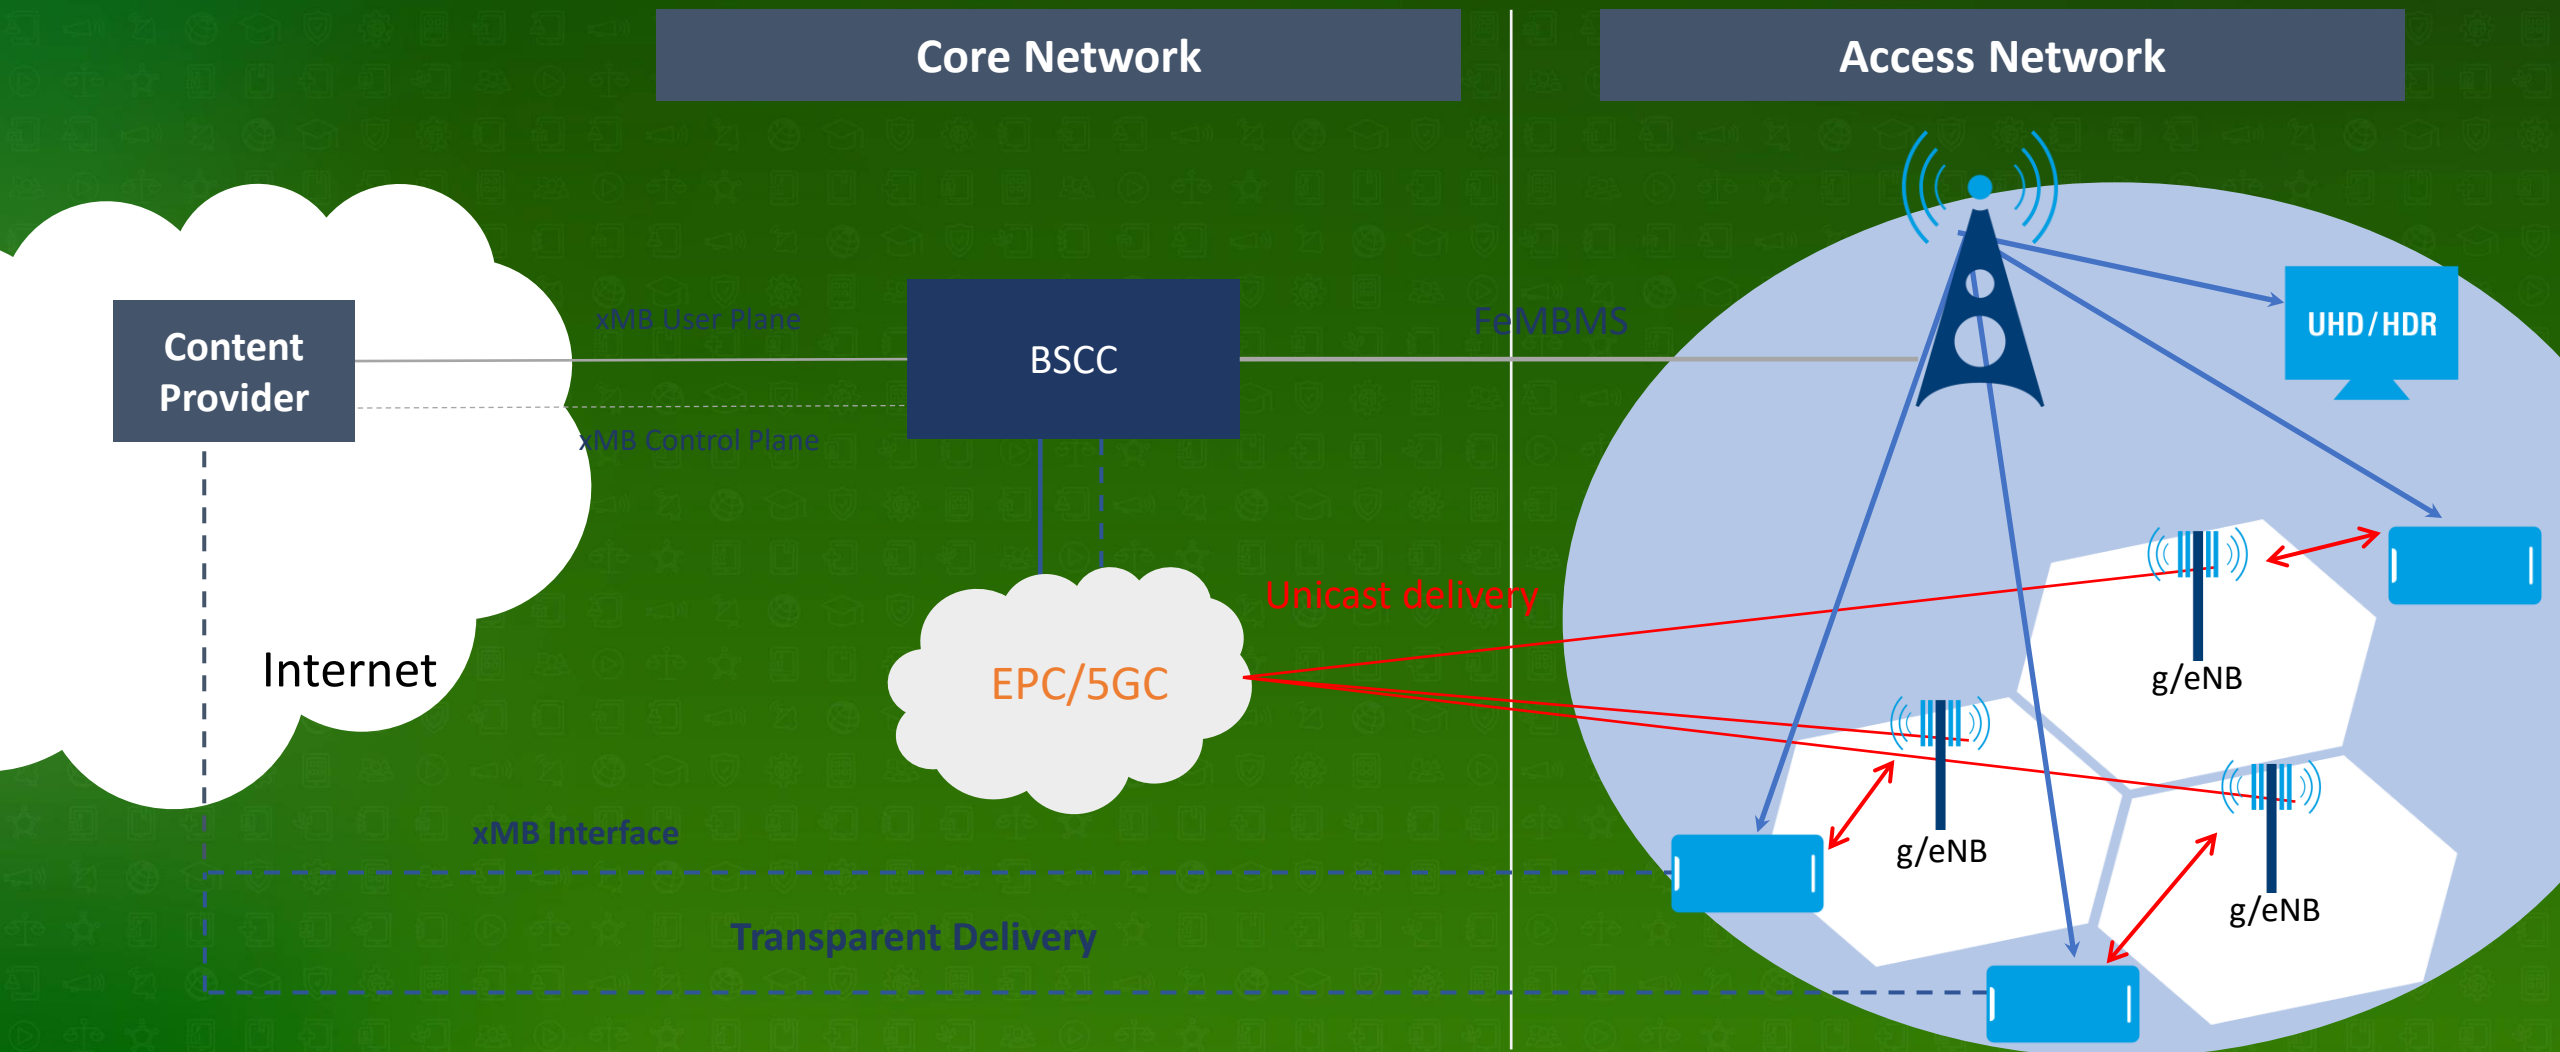

E-Sports – Group gaming Multicasting, All you can Broadcast

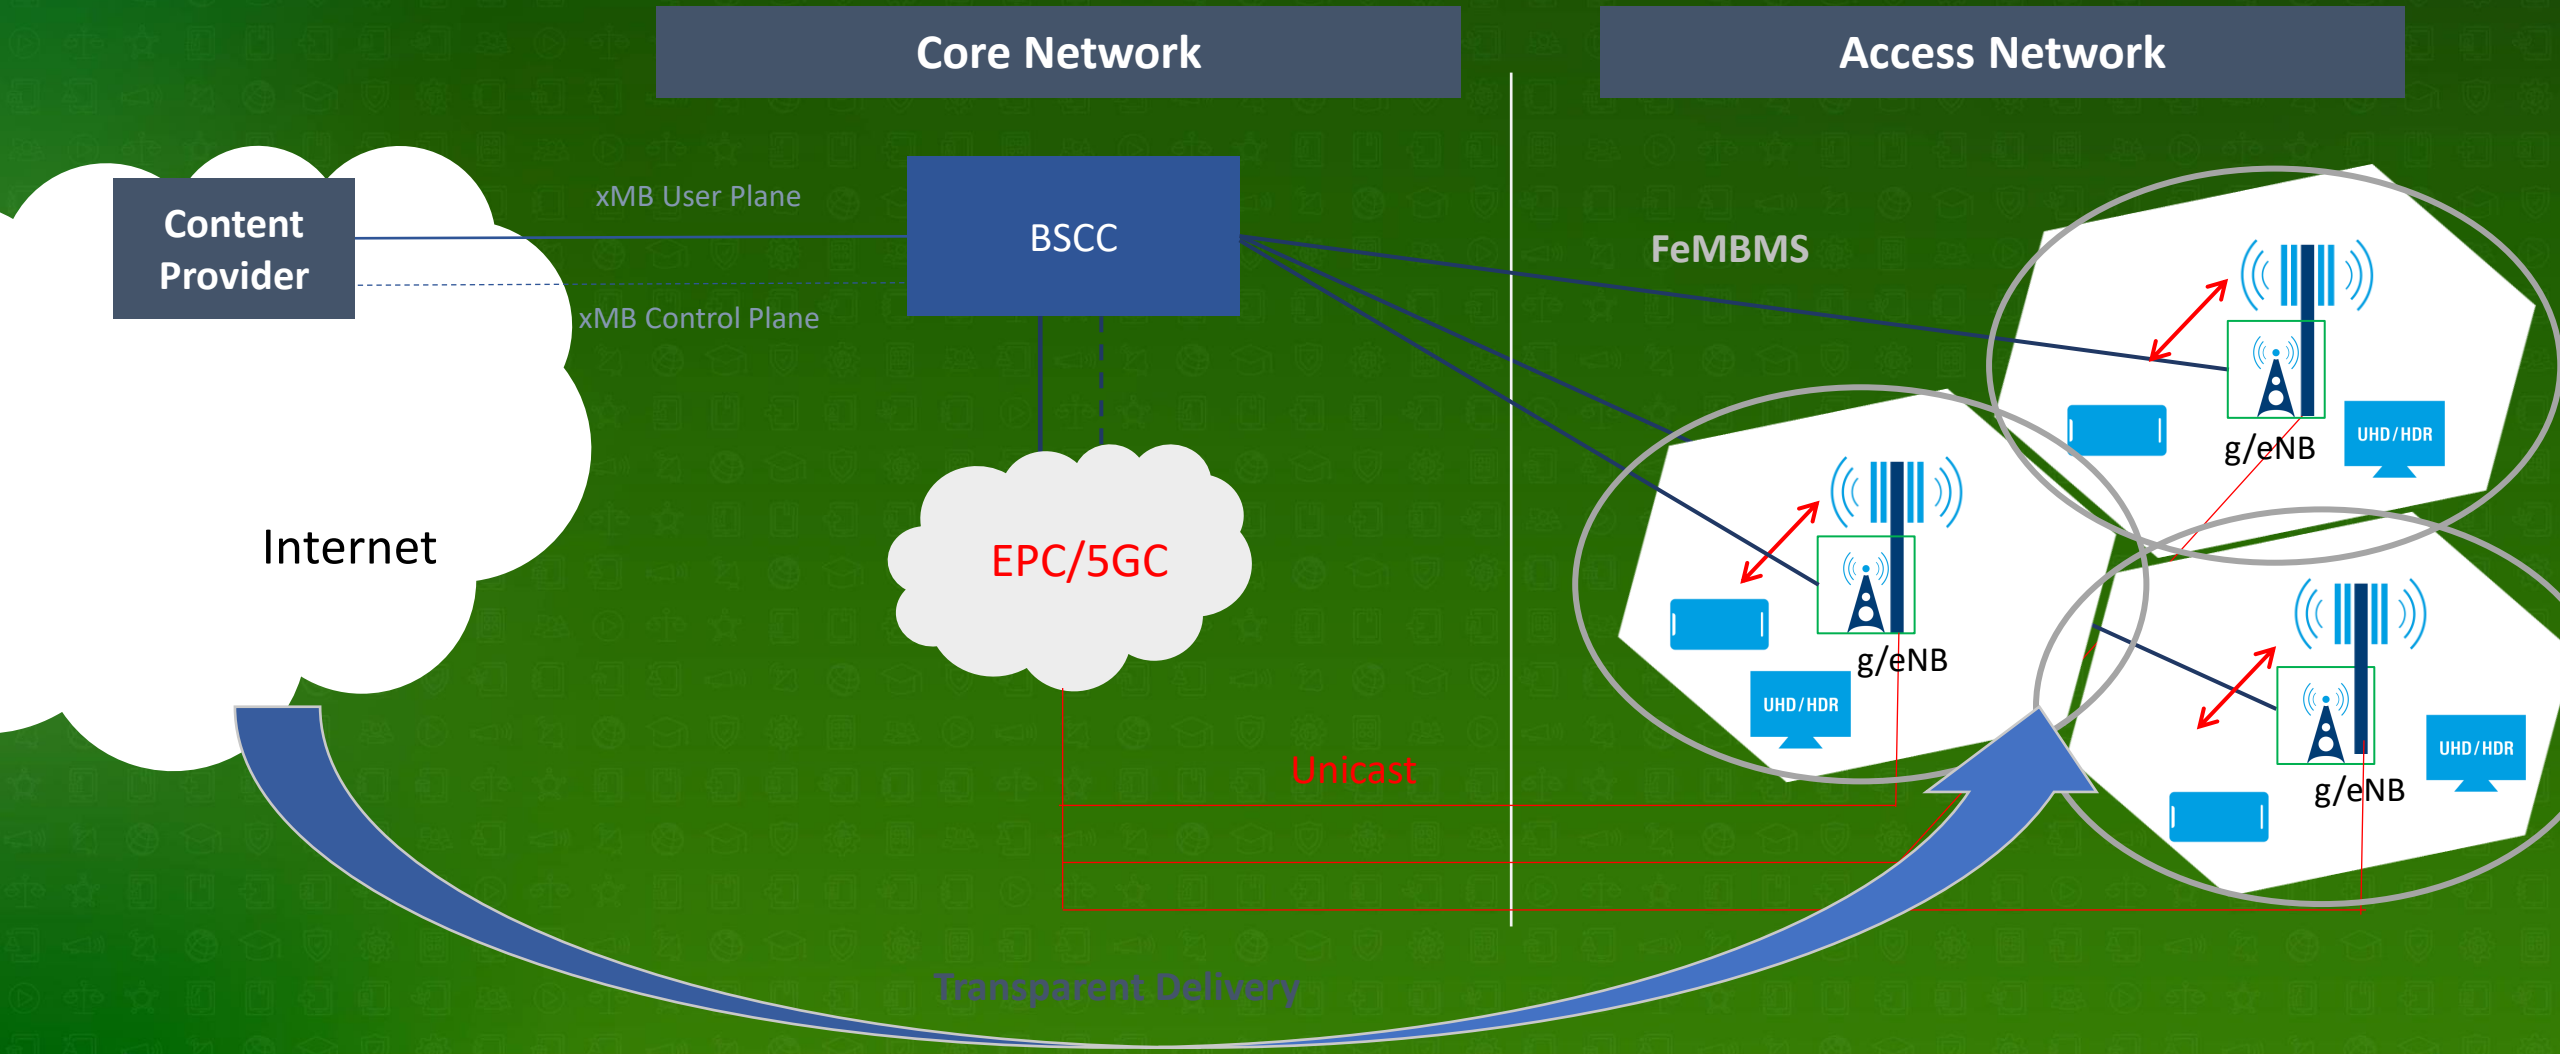

Live Commerce, Rural/Remote E-Learning  
E-Agriculture, VoD with preloaded content on TV and mobile

# Solution 1 : Overlay NSA/SA Simplified Architecture

# Solution 2 : SDL NSA/SA Simplified Architecture

# MNO: INDUSTRY ANALYSIS – MOBILE DATA 2018/2019

- ✓ 69 selected MNO Worldwide
- ✓ Number of Subscribers
- ✓ Data Plan Usage/Month
- ✓ Price/Gb/Month

Data Volume  
Revenues / Year

# Multicast as a service

- Voice over NR
- IoT
- Industry 4.0
- Remote Medical Operations...
- Remote Building...
- High quality VoD
- C-V2X
- E-Sports
  - Live/Linear Casting
- OTA Multicast
- Public Safety Multicast
- Venue Casting
- Live Commerce
- Rural/Remote E-Learning
- E-Agriculture

OPTION 1  
=  
5G UNICAST ONLY

# Multicast as a service

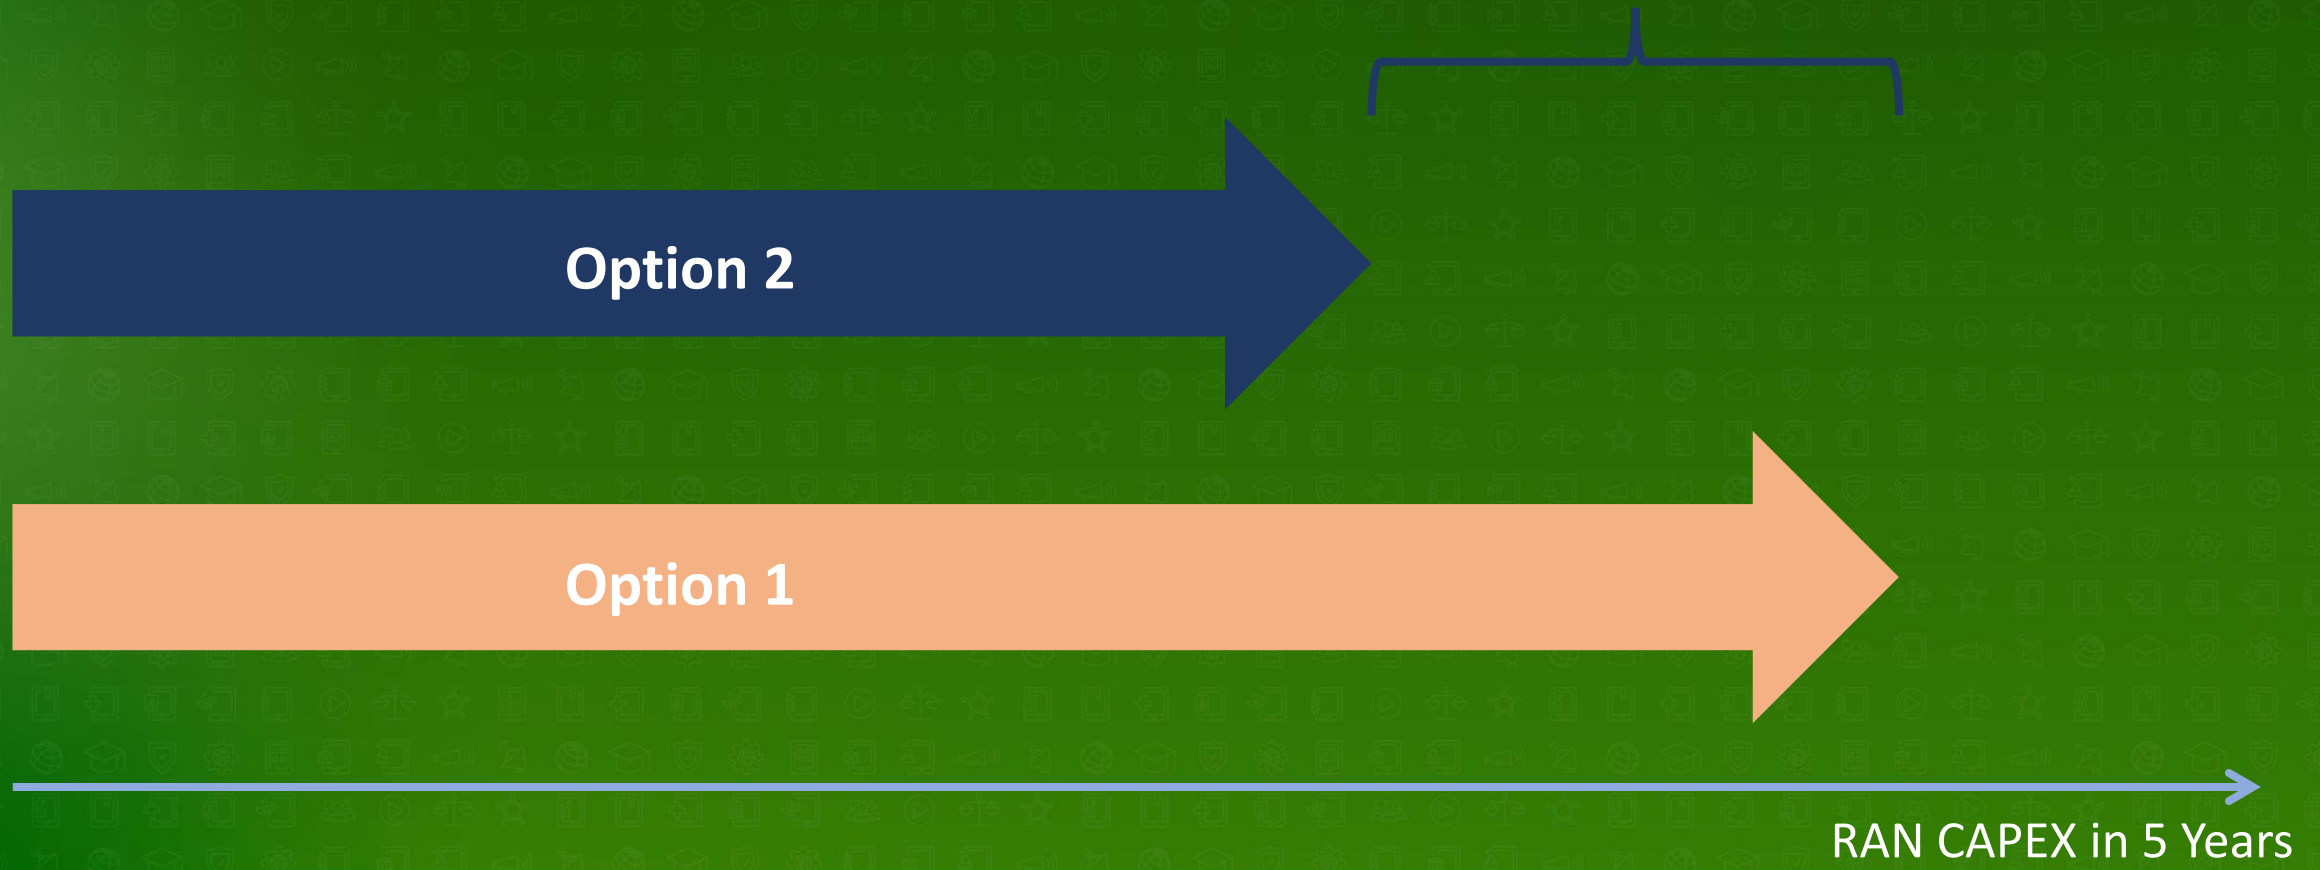

- Voice over NR
- IoT
- Industry 4.0
- Remote Medical Operations...
- Remote Building...
- High quality VoD
- C-V2X
- E-Sports
- Live/Linear Casting
- OTA Multicast
- Public Safety Multicast
- Venue Casting
- Live Commerce
- Rural/Remote E-Learning
- E-Agriculture

OPTION 2  
=  
5G UNICAST + MULTICAST

# Multicast as a service

Saving at least 19.5% CAPEX with less  
OPEX and better QoS/QoE

# BENEFITS FOR ECOSYSTEM PLAYERS

1. Lower CAPEX
2. Better Coverage
3. Lower Latency
4. Higher Reliability
5. More Flexibility
6. Higher Efficiency
7. More Business

1. No OPEX
2. Better QoS
3. Higher QoE
4. Higher Reliability
5. Lower CAPEX
6. Higher Efficiency
7. More Business

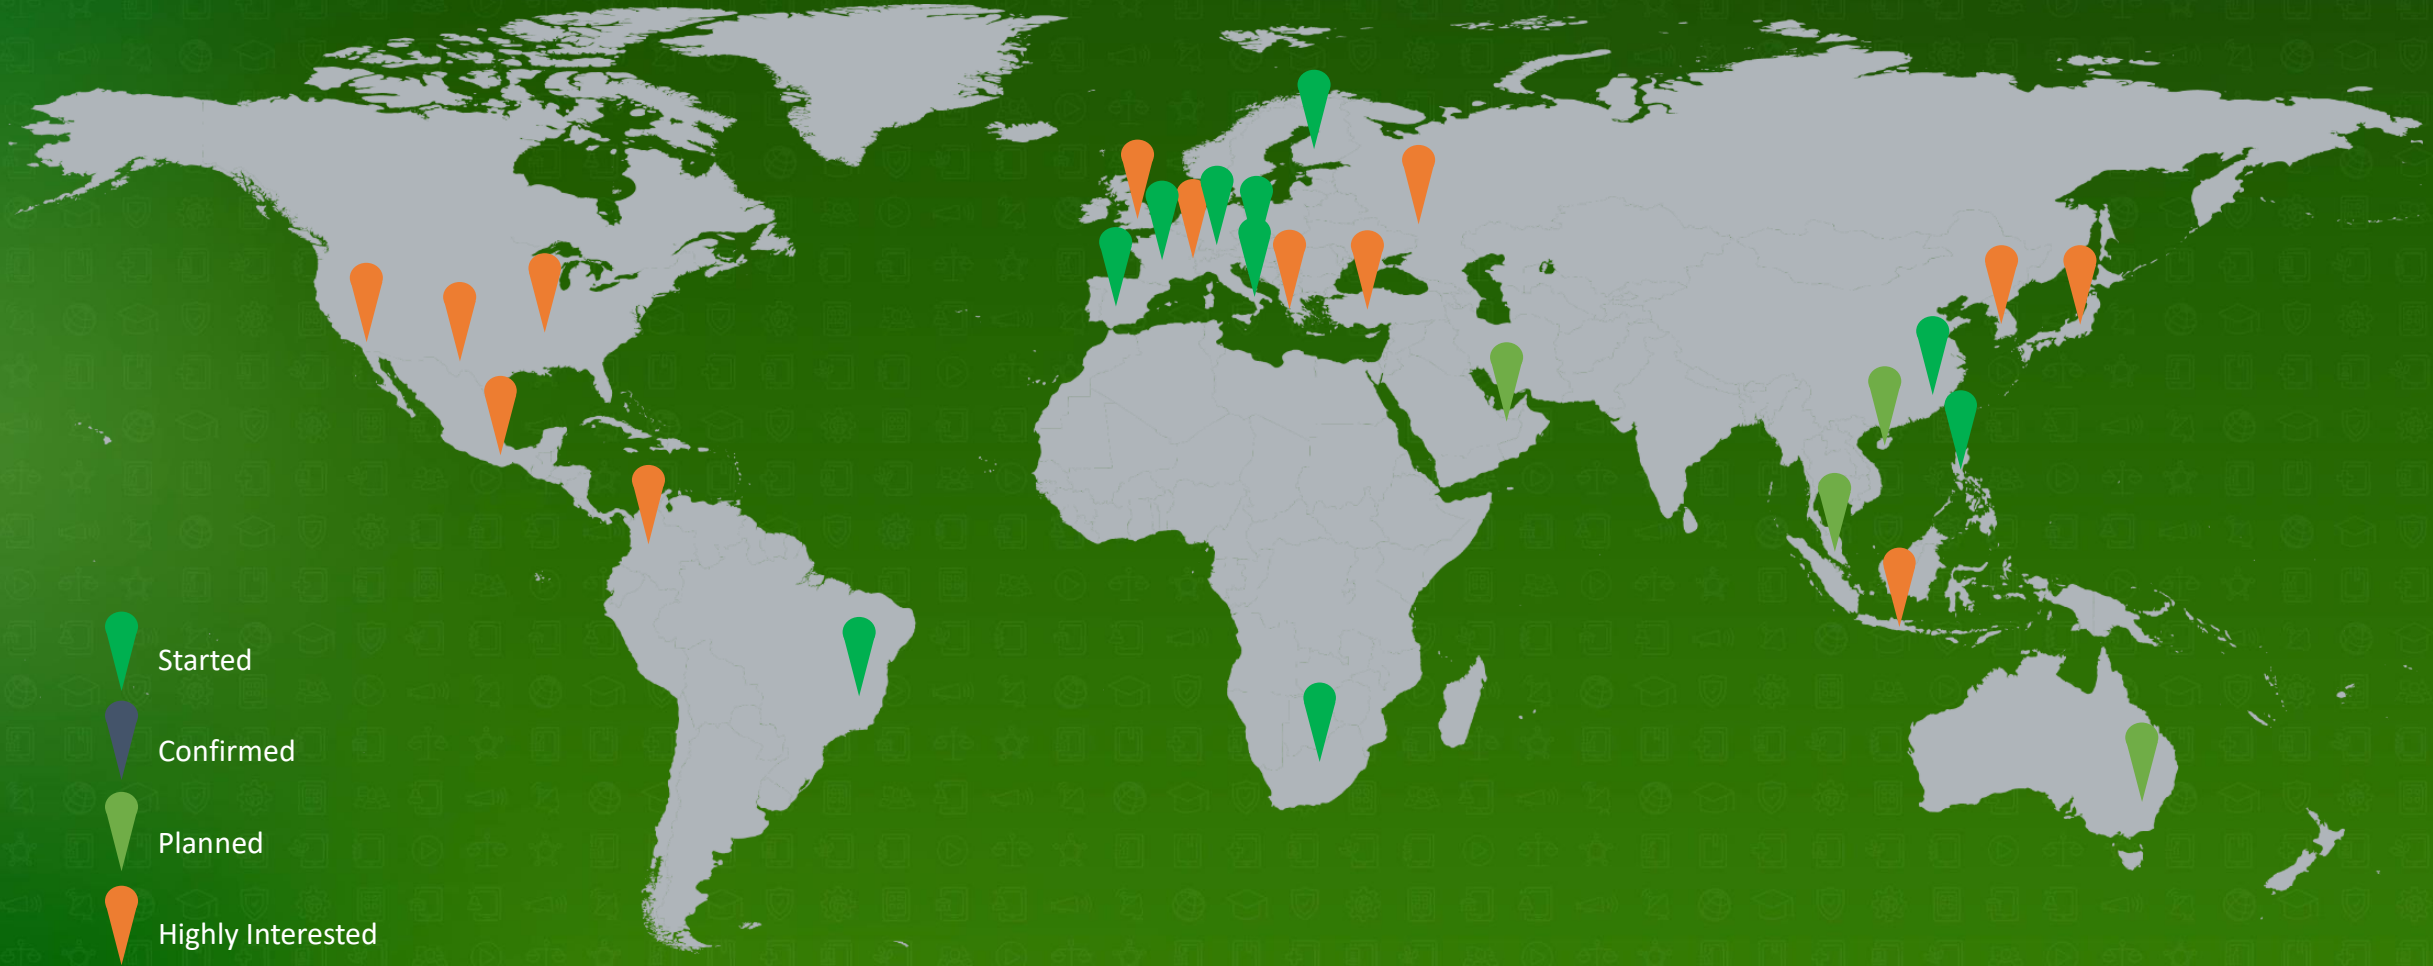

1. More Dynamic
2. Lower CAPEX
3. Higher ROI
4. More Flexibility
5. Higher Efficiency
6. New B2B Model
7. New B2C Model

1. No data volume
2. Better Coverage
3. Lower Latency
4. One contract only
5. Better Service
6. Higher Experience
7. More Real-Time Apps

# trials worldwide

Thank you for your attention!
