Decentralized Identities (DIDs) in
development projects

Pēteris Zilgalvis, EU
Commission

Virginia Cram-Martos,
Triangularity

Ismael Arribas,
INATBA

Nacho Alamillo
Domingo, Alastria

Irene Adamski,
Jolocom

Jörn Erbguth,
University of Geneva

Marianne Schörling,
Geneva Macro Labs

Programme

- 1 Introduction to the concept of DIDs (Virginia)
 - 2 Discussion of current and possible future use-cases (Irene)
 - 3 Interoperability and standardization of DID-systems (Ismael)
 - 4 Regulations (Nacho)
 - 5 Role of governments (Pēteris)
 - 6 Discussion with the audience and conclusion
- Your moderators: Jörn and Marianne

Decentralized Identities (DIDs) in
development projects

Re: What DIDs are all about

Virginia Cram-Martos,
CEO of Triangularity

» Who controls your
identity and what do
others know about it - is
it your government, your
employer, Facebook ...
or you?

Decentralized Identities (DIDs) in
development projects

Re: DID in practice

Irene Adamski,
Jolocom

» Increasing the self-sovereignty of users and decentralizing control over data will improve the resilience of digital societies.

Decentralized Identities (DIDs) in
development projects

Re: Interoperability & Standardization

Ismael Arribas,
INATBA

» Identification requires good governance and interoperability. INATBA is uniting actors from all over the world to find the appropriate path to establish both.

Decentralized Identities (DIDs) in
development projects

Re: Regulations

Nacho Alamillo
Domingo, Alastria

» DIDs have revolutionised the way we identify people, organisations, objects and processes: will they be used to empower users or to dominate the world?

Decentralized Identities (DIDs) in
development projects

Re: The role of governments

Pēteris Zilgalvis,
EU Commission

» We are looking to enable innovative approaches to give citizens more control over their data and digital identities.
